*Spring Production Sale*  
*held at the ranch*

**Monday, May 2, 2016**  
**1 p.m. • Glenfield, ND**

*Offering*

**200 Yearling Angus Bulls**

## Welcome Cattlemen and Friends!

We would like to invite you to attend our Spring production sale to be held here at Spickler Ranch, on Monday, May 2, 2016 at 1:00 PM CDT. The bulls sell in the order they are listed in this catalog. We will also provide videos of each individual lot in the sale through a link on our web site to Northern Livestock. The videos should be ready a couple weeks before the sale. Northern will also provide internet or phone bidding sale day for buyers unable to attend the sale.

Spickler Ranch has been in a state of transition for almost 3 years, which is now complete. The May 2016 sale offering is the first set of bulls resulting from significant management changes to our cowherd. In 2003, we purchased a group of fall calving cows as an addition to our operation. Those cows are a huge blessing to our operation as that first crop of calves resulted in the birth of S Alliance 3313, Chisum's sire. In June of 2013, we made the decision to move the calving date of our fall calving cows from fall to spring. This also prompted us to move from calving all of the cows at one site to two, better accommodating the increased number of heifers and cows calving in March. We also added the Farview cowherd in the spring of 2014 which further increased our cowherd size.

The Spickler pastures are now nearly stocked and that has tremendous advantages to all who are interested in our genetics. We begin calving our heifers at 23 months with a due date in early March, but the first calves arriving in late February. The three-year-olds also begin calving in late February at 35 months of age. Our mature cowherd begins calving in mid to late March with a due date of March 22, and they are exposed to a bull for 55 days following 1 AI service. These management changes have stretched our calving season out to better accommodate our increased female numbers at calving time in the event of inclement weather. We are putting increased selection pressure on our young females to reach puberty earlier and to rebreed more quickly while nursing their first calf. All females detected open in the fall are culled.

What are the advantages now available to producers interested in our genetics? We are able to continue to offer large groups of half,  $\frac{3}{4}$  and full brothers. We also cull our bull calf crop very heavily to eliminate the bottom 35 to 40 % of the bulls. We retain ownership on our steers and finish them on site collecting actual carcass data in the packing plant. Our increased cowherd size allows us to offer a few more bulls to producers, but even more important is the increased quality and depth of the bull offering due to the increased cow numbers and rigid requirements for bulls that are allowed to sell. The bulls offered in May are now a bit older and can handle the breeding season better as yearlings. All of the bulls born in April and early May that ratio high enough are held over to sell as coming two's in December.

Our family has been ranching and selling seedstock in the James River Valley since the 1940's. As third generation seedstock producers raising and teaching the fourth generation of Spicklers, we also know there are some things that do not change – sound, functional, adaptable, maternal, efficient cattle. We have taken a responsibility to you, our customer, to provide herd changing genetics that will move your program forward. Our customers are the most important aspect of our business. We value the trust you have placed in us and welcome the opportunity to serve you as a seedstock source. Please, never hesitate to call us with questions and comments, especially if we are slow to contact you. We are very excited to present this sale offering for your inspection, and welcome your input throughout the year. We also want to express our thanks to all who have invested in our program through time spent visiting our ranch as well as through the purchase of our genetics. We value this time spent with cattle industry peers and have learned something from each of you.

Please join us for a complimentary beef lunch prior to the sale. The meal will be served at 11:00, so come early, look over the bulls, have lunch with us, and enjoy the sale.

Quality Inn & Suites.....(701) 252-3611

### Air Travel Information:

Carrington Airport is located just west of Carrington and has a 3800 foot runway with 2700 feet lighted. For transportation from Carrington Airport to Spickler Ranch, call 674-3170 or 674-3169. Jamestown is 45 miles south of Spickler Ranch and is served by a commercial airline. Fargo is located approximately 120 miles southeast of Spickler Ranch and is served by several major airlines. Bismarck is located approximately 145 miles southwest of Spickler Ranch and is served by several major airlines also.

### Insurance:

Insurance will be available sale day but is not necessary as the bulls are fully guaranteed.

### Semen Test:

All bulls in the sale have been fertility tested and have passed a breeding soundness exam performed by Dr. Nate Zieman.

### Ultrasound Carcass Data:

Ultrasound carcass data collected by Jason McLennan on all the bulls is listed with their individual lot in the catalog and has been adjusted to 365 days of age.

### Herd Health:

Nate Zieman, DVM and Trisa Tedrow, DVM

At weaning the bull calves all received Ultrabac 7- Somubac, Bovi-Shield Gold 5, Pulmoguard, Inforce, and Dectomax dewormer. The bulls have all been vaccinated with Bovi-shield Gold FP 5VL5 HB, poured to control lice, given two shots of Fusoguard for footrot, and dewormed with Safeguard. The bulls have all been tested negative for Persistent Infected BVD and BLV. Health papers will be furnished sale day for interstate shipment.

### Genomic Enhanced EPDs:

All sale bulls have genomic enhanced EPDs by either the GGPLD or GGPHD test. Cattle that have GE-EPDs have the same amount of EPD accuracy as if they had recorded 8-20 calves, depending on the trait. Also, all bulls have their parentage verified.

### Volume Discounts:

We will discount your purchase price 2% on 2 registered Lots up to 5% on 5 or more registered Lots.

### Guarantee:

All cattle sell under the standard terms and conditions of the American Angus Association. All of the bulls are fully guaranteed against injury or death by Spickler Ranch for their first breeding season. Every individual in this sale has been determined to be free of the AM, NH, CA, DD, and M1 gene through a combination of DNA and pedigree assessment.

### Delivery:

1000 mile free delivery. Delivery beyond at cost. Leave delivery instructions at settlement time. **If you bring your trailer and haul your purchases home sale day, we'll give you a \$50 discount per registered lot.**

### Terms and Conditions:

Terms of the sale are cash. Phone or mail bids are welcome and may be given to the auctioneer or any of the sale representatives. Each animal will be sold to the highest bidder. Any bidding disputes will be settled by the auctioneer. Any person attending the sale does so at his/her own risk. Neither the owners, nor any person connected with this sale assumes any liability, legal or otherwise.

### Viewing:

Viewing of sale cattle is welcome any time prior to the sale. On Sunday, May 1st, we will serve smoked brisket provided by Barton Meats during the afternoon and evening. You are welcome to come and spend the afternoon with us.

### Lunch:

A complimentary CAB® beef lunch will be served from 11:00 a.m to 12:30 p.m.

### Internet Live Auction:

The auction will be live on the Internet at [www.cattleusa.com](http://www.cattleusa.com) or you can bid on the phone by calling 1-406-245-0889. To bid via Internet or phone please pre-register with Northern by calling 1-866-616-5035.

Anchor is a consistent sire of progeny that excel for convenience traits including: quality hoof structure, quiet dispositions and early shedding. His sons are thick butted bulls that are sound structured, easy fleshing and are built to last. We have 36 sons by Anchor to sell this spring, making him our heaviest used young sire. Several of his sons will be suitable for use on heifers. His daughters are feminine, big bodied females that we are anxious to calve for the first time in March of 2016.

**32 sons sell!**

## S Chisum 2139

S Chisum 2139 was bred and raised here and was selected by Farview Angus Ranch in 2013 as a calving ease sire. He is an impressive mature bull. He is very long bodied and is an extremely heavy muscled, thick quartered bull. He has earned his place in our lineup by naturally covering 50 plus heifers as a yearling and a two year-old. We calved all of those heifers and only assisted one calf each year. He no longer reads like a heifer bull, but consistently transmits length and muscle to his offspring much like Chisum 6175, his sire. 2139's daughters are really close to calving. They are a stand out sire group at this point for thickness and fleshing ability.

**20 sons sell!**

Summit is a proven calving ease sire whose popularity continues to grow. He is an unmatched sire for maternal superiority and udder structure, and qualified as a Pathfinder sire this fall as nearly half of his eligible daughters made Pathfinder status. Summit's 143 daughters in 25 herds are a testament to his maternal potency with their 103 average nursing ratio. This sale offering includes 10 Summit sons, most of whom are sure-fire calving ease bulls. **10 sons sell!**

S Pride Anna 709  
WR 4/114. Donor dam of herd sires Summit and Whitlock. Her Open Country son sell as Lot 30.

Revere was purchased from Tehama Angus Ranch in California in the fall of 2013. He is an impressive individual possessing extra depth, extreme muscle shape and excellent feet with added heel depth. He has met and surpassed our expectations as a sire. Revere added muscle mass, depth and excellent hoof structure to his bull calves without increasing frame size. His daughters are big bodied, power females. Revere is a very potent and consistent sire passing on depth, muscle and power, coupled with clean, attractive fronted progeny regardless of the phenotype or pedigree of the female he is mated to. Revere's dam is a productive cow who records a WR of 3/109. Her production coupled with the udder quality of the Sierra Cut females has us expecting Revere's daughters to be very nice uddered, high raiting cows. Revere froze semen only one time and consequently we will continue his influence with several of his sons. **13 sons sell!**

Courage became a must use sire for us after sorting through the first group of paternal brothers sired by Confidence at Connealys. Jerry speaks very highly of his VRD dam. We were searching for an outcross calving ease bull to use heavily and after sampling Courage, we were impressed enough to make him our heaviest used outside AI sire for our 2015 calf crop. His sons are long bodied, have plenty of middle and muscle and offer a bit more total performance than his sire, Confidence. His daughters are feminine, moderate females that are very easy keeping. We anxiously await the production potential of the Courage females. **23 sons sell!**

Dominion was retained out of our 2010 fall calf crop as the best son to date of S Queen Essa 208, one of our herd matriarchs and top donor cows. Dominion has exceeded our expectations as a breeding bull. His progeny exhibit excellent Angus breed character, are deep middled and sound structured. These traits are complimented with excellent calf vigor and calving ease. Dominion's flush sisters are very nice uddered, feminine, fertile young cows, and two of them are now in our donor lineup. The progeny of Dominion represent a home grown outcross calving-ease and maternal sire with competitive performance at weaning and yearling. **12 sons sell!**

S Queen Essa 208  
 WR 7/110. Donor dam of S Dominión 0508. Her ET sons by Anchor sell as Lots 56, 87 & 88.

# Terms & Abbreviations

EPDs - Expected Progeny Differences - describes genetic differences between animals within a breed and between herds. Research shows they are 7-9 times more accurate than any other measurement including individual performance data. It is the **BEST** way we have to compare animals for the genetic contribution they will make to your cowherd.

The bull's scrotal circumference measured in centimeters. Scrotal measurements were taken in Feb. 15-16, 2016 and are adjusted to a year of age.

CED is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

A predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

A predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

A predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

CEM is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires.

A predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

A predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires.

A predictor of the difference in ribeye area of a sire's progeny at a given end point compared to the progeny of other sires.

## \$ Values

**\$W**: an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**\$F**: an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**\$B**: an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

The percentage above or below average (100=average) a bull is for his 205 day weaning weight.

Yearling weight adjusted to 365 days.

The percent above or below average (100=average) a bull is for his 365 day weight.

Pounds per day a bull gains during our test period.  
April/May bulls = 165 days  
Fall bulls = 146 days

Weaning weight adjusted to 205 days of age

Actual birth weight.

The percent intramuscular fat (marbling) adjusted to 365 days of age.

The percent above or below average (100=average) a bull or female is for its marbling scan with its contemporary group.

Each bull's ribeye area measured in square inches and adjusted to one year of age.

The number of calves a dam has birthed and their combined average ratio for birthweight (100=average).

The percent above or below average (100=average) a bull is for his adjusted ribeye area.

The number of calves a dam has weaned and their combined average 205 weight ratio (100=average).

The number of calves a dam has had 365 weights taken on and their combined average ratio (100=average).

The percent above or below average (100=average) a bull is for his fat thickness.

This is the off-test backfat measured in inches adjusted to 365 days of age.

The number of calves a dam has had rib eye area measurements taken on and their combined average ratio (100=average).

The bull's hip height measured in inches, and converted to a frame score using the American Angus Association frame score chart. The bulls were framed scored 10/30/15.

The number of calves a dam has had IMF measurements taken on and their combined average ratio (100=average).

Calving ease prospect sired by Tehama Revere out of a beautiful uddered Summit daughter. Powerpoint is a thick topped, wide tracking, sound structured bull with excellent feet. He is deep bodied, easy fleshing and has been a standout since birth. Powerpoint performed well at each measuring point capped by his IMF ratio of 221. His Summit sired Queen Essa dam is tidy uddered, small teated and well on her way to Pathfinder status after her first two calves. Lot 1's granddam is a Pathfinder Queen Essa with a WR of 4/103, 3rd dam WR of 9/102, 4th dam WR 10/101, 5th dam 10/104. His fourth and fifth dams are both cows that raised calves until they were 14 and 15 respectively. This light birth bull has multigenerational genetics for calving ease, longevity and fertility, we look for him to have a tremendous impact on our program as a calving ease sire. **Suitable for heifers. Retaining an in herd semen interest, selling full interest and full possession.**

Performance prospect sired by Revere out of an extremely productive daughter of our Pathfinder sire S Summit 956. Thrive is a standout in this bull offering. He is extremely level topped, square hiped and deep middled. He has performed well above average all year, is one of the highest gaining bulls on test and ratioed significantly above average for both IMF and REA. Thrive's disposition is quite possibly his best trait as he is gentle enough to scratch. His dam is a feminine, angular cow who will likely make Pathfinder this year. He is lineage includes a Pathfinder granddam WR 4/107, 4th dam WR 9/104 5th dam WR 11/104 and 6th dam WR 6/111, as well as 5 generations of quiet disposition, good uddered cows. **Retaining an in herd semen interest, selling full interest and full possession.**

High performing Revere son out of deep bodied Max 602C daughter. His dam is a low BR solid producing cow with a pedigree stacked with proven sires including Foresight, Alliance, Dateline, and Right Time. This power cow bull gained well, is very deep middled and was one of the high indexing bulls at weaning and yearling with ratios of 118 and 116 respectively. This high performance bull should add pounds to his offspring and his daughters should make tidy uddered, heavy milking cows.

Anchor cow bull with extra muscle, mass and performance gaining 3.64 lbs per day on a 148 day test. His dam is a model Angus cow sired by Chisum. She is very easy keeping, big middled, and square hipped. She has a tidy udder with small teats and is a member of our noteworthy Cora cow family where her dam, granddam and 4th dam are all Pathfinder cows. The Cora cow family produced our lead off bull last spring and is best known here as the cow family with extra longevity, good udders, and superior production.

Phenotypic standout sired by Unanimous. Lot 13 is long sided, correct structured, level hipped, expressive in his muscle pattern, and sound on the move. This large scrotaled bull has a calm attitude, gained well above average and is very complete. His donor dam is a productive Chisum daughter whose impact on our herd is just beginning. This good numbered standout is a herd bull.

High performing herd bull prospect sired by Courage. Lot 16 is expressively muscled, thick quartered, long bodied, and clean fronted. This standout indexed 119 at weaning and was the big ribeye bull in his contemporary. His dam is a near perfect uddered Summit daughter, who has extra rib and depth. She stems from a high volume, broody Rock daughter who is a maternal sister to Chisum. I'd mark this bull - he's a good one.

## Bull Development at Spickler Ranch:

The yearling bulls were weaned in late September 2015. We started them on a ration consisting of alfalfa haylage, alfalfa, straw, ryelage, corn silage, modified distillers, beet pulp, wheat midds, and corn which started at about 40 MCal. The ration has changed slightly from the past. We did not include oat grain in our ration as we cut and baled our oats for hay. We have substituted beet pulp pellets in the diet in place of oats. We also included corn silage in the diet because we were able to purchase some corn from our neighbors. We did account for the corn in the corn silage at all times and took bunk energy samples to ensure that we were not overfeeding the bulls and that the ration was maintained at 46 Mcal from December 15 until the bulls were scanned on February 18. We target a 3 pound gain on the yearling bulls and the test is usually around 160 days (the distance between weaning weight date and the yearling weight date). We target .25" back fat on the yearling bulls. After scanning we removed the corn from the diet and replaced it with oats, dropping the ration back to a 42 MCal diet which is what they are on until sale time in May of 2016. We purchase all of our corn and would much rather save that for the home raised steers in our finishing pen. The bulls are managed to the best of our ability to display genetic differences with regard to performance and carcass ultrasound, while never compromising their soundness or longevity.

S Rosemary 247  
WR 10/109. Past donor and granddam of Lot 36.

Standout calving ease bull sired by Summit. The +12 CED herd bull prospect is clean fronted, thick topped, correct in his structure and is backed by a young X Factor dam whose udder quality is second to none. Furthermore his granddam is a "VRD" daughter who is a past donor for us who recorded 10 calves with an average weaning ratio of 109. With this bull's pedigree combination of Summit and our Rosemary cow family, his maternal sire ability should be foolproof. **Suitable for heifers.**

Phenotypically appealing Open Country son with a ton of genetic potential. This correct structured, clean fronted, level made bull's dam is a tidy uddered, small teated maternal sister to S McCoy 124. Furthermore, this bull performed above average at weaning and yearling and boasts an EPD tabulation that has him marked as a performance adding sire.

Another performance adding Open Country who weaned well above average. This 118 marbling ratios bull's dam is a perfect uddered, calving ease daughter of Game Day, who traces to the performance sire Baldrige Rock. Open Country's influence will add length, performance, and pounds without drastically increasing mature size.

Phenotypic standout with a gentle disposition to lead off the last three ET Unanimous sons. Lot 57 is long bodied, strong topped, level hiped, and performed very well. His donor dam is a powerful Chisum daughter who adds body depth and performance to her progeny. ET full brothers sell as Lots 13, 58 and 59.

High performing stud with added frame. This member of this potent flush of Unanimous bulls offers the most frame, depth, and biggest EPD spread. If you are in need of several bulls for a set of cows, consider these Unanimous ET bulls - they are high performing, good gaining, payweight adding bulls that will sire front pasture females. ET full brothers sell as Lots 13, 57, and 59.

One of the really powerful performance bulls in this offering. Lot 60 is long bodied, massively built, thick quartered, and wide hiped. Furthermore, he ratioed 113 at weaning, 116 at yearling and 119 for gain. His Pathfinder dam is quickly establishing herself as one of our elite females and appears to be headed for donor status. If you are in need of a really good cow bull, look up this good scamp.

Phenotypic standout sired by Ten X. Lot 63 is correct structured, thick topped, level hiped, and sound on the move. He is a strong performing, high CED bull with added carcass merit. His donor dam has long since established herself as a calving ease female with carcass to burn. The Ten X cattle have been really popular and this good scamp is a prime example as to why.

Calving ease Anchor son out of a picture perfect uddered daughter of S Dominion 0508. This expressively muscled, heavy weaning bull blends some of our strongest maternal genetics as the bottom side of his pedigree includes our Queen Essa and Gloria cow families.

Suitable for heifers.

Powerfully built February born Dominion ET bull. Lot 89 is thick topped, wide hipped, deep ribbed, and masculine in his design. His donor dam, Camilla 495, is a steady producing daughter of the performance sire "VRD". If you are in need of a high CED, low BW EPD bull with loads of phenotypic muscle and performance make sure to find this good rascal.

Maternal genetics at its finest in this ET bull. This above average marbling bull is a direct son of Queen Essa 208 whose maternal influence will be felt throughout our herd for several years to come. Queen Essa 208 has 76 ET progeny recorded and her ability to pass on her impeccable udder structure to her daughters is second to none. If you are seeking to improve maternal strength don't miss the opportunity to purchase these ET full brother bulls. ET full brothers sell as Lots 56 and 88.

Stand out, light birth herd bull prospect out of a moderate, easy keeping McCoy daughter. He is sired by Dry Fork and his dam is a member of our Lady Ann cow family. This deep middled, thick topped bull couples a negative birth weight EPD with solid growth and excellent carcass ultrasound ratios. Take a look at this bull sale day; he is one of the most complete prospects in the offering. **Suitable for heifers.**

The first of a uniform and powerful pair of ET full brothers sired by Revere and out of S Camilla 6144. This big ribeye bull has a big performance spread from weaning to yearling both on his EPDs and his actual performance. If you need to increase muscle, performance, body depth, and power up a set of cows be sure to look over the Revere sons in this sale offering.

DAM PROD.	BR 9/90	WR 9/108	YR 7/104	IMF 7/100	RE 7/97

The last direct son of Summit offered in this sale. Lot 182 is a bona fide calving ease bull as he weighed 66 lbs. at birth, has a +17 CED with a -1.8 BW EPD and is backed by a mature dam who records a progeny birth ratio of 9/90. This steady performing bull should calve easy, and sire highly sought after replacement females. **Suitable for heifers.**

DAM PROD.	BR 1/95	WR 1/98	YR 1/98	IMF 1/104	RE 1/101

Another high CED son of Summit 2448 with added frame. This long bodied, smooth made bull's dam is a small teated daughter of Connealy Capitalist out of our revered donor, S Queen Essa 208. If you retain replacement females Lot 198 would offer tremendous maternal potency as he combines three of our best cow families: the Queen Essas, Camillas, and Pride Annas. **Suitable for heifers.**

Sure-fire calving ease son of Chisum 255. This moderate framed bull's dam is an ET Game Day daughter of Lady Enchantress M009, who is best know as the dam of S Chisum 0139, the high selling bull in our 2011 sale. There are several Chisum grandsons in this sale offering that will make excellent calving ease bulls and Lot 200 needs to be included on that list as well. **Suitable for heifers.**

## Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Atgus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs). EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

- Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
- Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
- The ability to make more rapid progress for traits that are important to you, due to:
  - more accurate selection
  - easier identification of genetic outliers
  - the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-20 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation at [www.angus.org](http://www.angus.org).

**How do you know if EPDs are genomic-enhanced?**  
 Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo or those of partnering labs Zoetis (HDSOK, ISOK) or GenSeek (GGP-HD, GGP-LD).

# EVALUATING ACROSS BREED EPDs

When contemplating crossbreeding or using multiple breeds of cattle across breed EPD adjustment, factors must be used. Each year the US Meat Animal Research Center updates their across-breed EPD adjustment factors. These adjustments are calculated using head-to-head competition of AI sires from all major beef breeds used on similar crossbred beef cows in the same pastures at the center. To compare breeds, simply convert each breed's average EPDs to the same breed base, such as Angus. The tables provided list the average EPDs of each breed as of summer 2016 converted to an Angus EPD base. Percentile rankings of each breed's average value in the Angus population are also provided. The tables below show how Angus rank for the 3 selected traits. A complete across breed EPD chart with conversions to an Angus base for all traits is available at <http://www.bifconference.com/bif2015/documents/2015-ABEPD-press-release.pdf>  
Source: Dan Moser, President of Angus Genetics Incorporated.

## Birth Weight
