EPD'S & INFORMATION

- All Epds will be current as of catalog deadline. Check AAA for any newly updated EPDS from then on.
- Free Delivery within Montana & free wintering until April 1st, 2018.
- \$100 rebate if bulls are taken home within 48 hours of the sale.
- Female buyers are responsible for trucking on all purchases immediately following the sale. We can help accomodate trucking if needed.

INSURANCE

As always we will offer our first breeding season guarantee but in addition this year we are offering insurance on the bulls. If you choose the option of insurance Clear Creek Angus will pay 50% of the premium for you. We feel this is another great way for us to stand behind these bulls. Please study the options and decide which is best for your operation.

FIRST BREEDING SEASON GUARANTEE

- Breeding season is defined as 90 days after bulls are turned out with cows.
- All bulls are covered 50% minus salvage value.

TERMS AND CONDITIONS

Payments must be made to the clerk at the conclusion of sale.

HEALTH

- All bulls will be fertility tested and vaccinated for foot rot.
- Bulls were vaccinated with Bovi-Shield Gold, Vision 7 with spur, and Autogenous pinkeye vaccine.
- Bulls will be poured with Ivermectin and Clean-up.
- Bulls are free of all defects unless otherwise stated in the sale book.

VOLUME DISCOUNT

Buyers purchasing 5 bulls will receive 5% off their purchases. Buy more then 5 bulls and get 5% off the first 5 and an additional \$100 off each additional bull.

RETAINED INTEREST

We will be retaining a 1/3 revenue sharing interest on every lot selling. Full ownership goes to the buyer. If we choose to have semen collected it'll be at our cost and your convenience.

We would once again like to take this opportunity to invite one and all to our 11th Annual Production Sale. We are extremely grateful for the support we've experienced over the past years and look forward to the future years.

This years offering is one of the best to date. We have stuck to our beliefs and once again bred large sire groups to offer quality and consistency from start to finish. Our main proven sires this year include Connealy Jet 4405, Connealy Artillery 4236, and our AI sire is once again Mill Bar Hickok 7242. These are all bulls we've used in the past and have great confidence in. Our newest sires are Vermilion Huntley and Felton Capitalist 10F5. The Huntley bull is a Connealy Spur son we purchased from Vermilion Angus in the Fall of 2016. He's a bull that will add length, growth, and bone. On top of that he stands on a solid foot. We have used Huntley heavily so expect lots of them next year. The Felton Capitalist bull we purchased in the spring of 2017. We used him to clean up our heifers so every calf in the sale by him is out of a 2-year-old heifer. He's a moderate framed bull that is extremely thick and easy on the eye.

The bulls are once again being wintered at Hould Feedlot in Malta, MT. Bruce, Linda, and all of the crew do an excellent job developing the bulls and taking care of the health on them. We greatly appreciate their time and efforts. Once again it was a dry summer here, but the bulls came through good and weaned off well. These bulls rely on mothers' milk and what mother nature provides only. NO Creep. We feel this allows you to be able to buy with confidence.

This years offering will also include 155 commercial replacement heifers. These are all out of the top end of some of our really good bull customers herds. They will include 25 F1 baldy heifers, 49 No Brand heifers, and 80 heifers off the Kellam Ranch.

Once again, we are joined by MY Angus and Weaver Herefords. Both programs are very solid and are always looking to move their herds forward. I encourage everyone to look over their stock and contact them if you have any questions on their programs.

Lastly, we would like you to consider this our personal invitation to attend the 2019 Clear Creek Angus Sale. Hope to see you all there!!

Sara, Kruz, Jaxton, Kane, and I would like to extend this invitation to all of you to join us at Bear Paw Livestock, on March 4th for lunch and to view the offering.

Bull Mortality & Infertility Insurance

We purchased Jet from Connealy Angus Ranch in 2015. He was our pick of the Greeley sire group for his superior phenotype and excellent growth numbers. I believe this set of Jets we have is the best sire group we've ever had. They are very consistent in type, moderate framed, deep flanked, and flat out thick butted. We calved the first Jet daughters last spring and they did not disappoint. They are moderate easy keeping females with some of the better udders I've seen on a set of heifers in a while. Selling 25 Sons!

Artillery was our pick of the Arsenal sire group from the 2015 Connealy Angus Sale. He was the high selling Arsenal that day at \$55,000. Artillery sires long bodied calves with a touch more growth to them. The calves are born jet black and have excellent vigor at birth. The first Artillery daughters calved last spring and they are excellent. I do believe the females that Artillery leaves us will be superior. They are long, clean fronted, feminine females with excellent udders and ample milk. If you're wanting replacement females, I'd recommend the Artillery sons to anyone. Selling 19 Sons!

Huntley was our pick of the 2016 Vermilion fall sale. He was the high selling bull that day at \$37,500. Huntley was a man amongst boys when going through the bulls that day. Huntley is a high growth bull with some added bone and is long as can be. He stands on an excellent foot and has very few holes in his epd profile. He excels in growth, carcass, and maternal traits. If you're looking to add pounds be sure to check out these Huntley sons. Selling 14 Sons!

Hickok is the Abs sire we've used on our heifers the past two years. In 2 years of use we've only assisted one birth. The calves come right have good vigor and really grow when they hit the ground. The first daughters are getting ready to calve and they look like they're going to be really good. We will have a large group of Hickok sons and grandsons in next years offering also. Selling 13 Sons!

We purchased Capitalist from Felton Angus Ranch in the spring of 2017. 10F5 was the high selling bull that day and a standout. He is a very eye appealing bull with extra muscle shape to him. All of his sons this year are out of first calf heifers and most are a touch younger. These Capitalist sons will sire heavy muscled calves that will add pounds. I'm expecting the females to be the good easy keeping type. Selling 8 Sons!

Bear Paw Livestock ★ Chinook, Montana

★ Replacement Heifers ★

Lot

H1

79 Head of Fancy Angus
Commerical Replacement Heifers
Clear Creek Angus

These heifers all originated off the Kellam Ranch south of Chinook. The Kellam's have been buying top end bulls from us since we started. The steer mates to these consistently wean at 650 pounds plus. No replacements are kept out of this herd and this will be the top cut of 250 head. These will make excellent cows that will raise big calves. Past reports on these heifers have been positive as they breed up well and look the part come fall.

Lot

H2

49 Head of No Brand Commerical
Replacement Heifers
Clear Creek Angus

These heifers all come off the Cossett Ranch of Sheppard MT. Jerry and his family have been buying top end bulls from us for several years now. They come out of a very productive fertile herd of Angus, Angus. These heifers are gentle and will grow into extremely long bodied females with some production in them. Steer mates to these consistently wean at 625 pounds the first half of October. Whether in the bred heifer market or looking for replacements, these will get the job done.

Lot

H3

25 Head of F1 Baldy
Replacement Heifers
Clear Creek Angus

These heifers all come off the Weaver Ranch south of Big Sandy. Everyone of them is out of a Weaver Hereford cow and a Clear Creek Angus bull. Most will be half-sisters out of Vermilion Bear Paw sons. This set of heifers has topped or sold right at the top of the anual stock cow sale in Chinook the past two years. Everyone who has owned these heifers has had very positive feedback to date.

----	----	---------	-----	---------	-----	----	-----	--------	-------	-----------	------	-------	-----

840 is one of the most impressive bulls we've raised to date. He came off the cow at an impressive 855 pounds and boasts the largest yearling weight we've ever had at an impressive 1648 pounds, giving him ratios of 117 at weaning and 122 at a year. He stands on an excellent foot, with extra bone. 840 is moderate in frame size with lots of length and as much capacity of any bull I've seen in quite some time. His dam is a pathfinder daughter of Ten X 9903 that has always done a good job for us, she has good feet and small teats. This is a bull that we may use back in our program if it works with whom ever buys him. Herd bull prospect!!

Here is an Artillery son that came with a moderate birth weight and has exploded into a powerful bull. 854 is a high growth, big middle bull that is stacked up with a very maternal back ground. The dam to 854 is a pathfinder Upward daughter with 6 calves at an average BW of 82. This cow is good footed and has a good udder at 9 years old. She caught AI and will calve early again in 2019. Use on large heifers or cows.

In my mind a herd sire prospect here. 8411 has an excellent profile with a long body and clean front. He's got a big time spread on his EPDS of -1.6 BW to +96 at a year. He ranked top 4% for CED and top 2% BW on his 50K data. A full brother sold to Adam Hellie in last years sale as our lot 3 bull. His dam is one of my favorite 9903 daughters. Heifer Bull.

A more moderate deep sided Huntley son that I've liked since birth. 860 stands on a good foot and is wide based. His dam was 12 years old last year and bred back again. She has been a very consistent producer for us with no faults. Cow bull.

Another long-bodied Hickok son that weaned off well. 8408 came small and exploded into a good thick calf. His 11 year old dam got stifled last winter so we had to graft him onto another cow hence the 100 ratio. His original dam was an excellent uddered VRD granddaughter. Keep the replacements out of this one. Use on large heifers or cows.

804 is as deep and thick as any of the Huntley calves in the offering. He's one of my favorites also. He is a moderate birth bull that will sire calves with bone and power. His dam was an 11-year-old Image Maker daughter that got injured last spring. We had to graft him onto a 2-year-old heifer that did a good job with him. He has performed very well at the feedlot. Cow bull.

862 is built a lot like lot 23. He is a very stylish calf that sticks out in the pen. His dam has a good udder and always brings in a good one. Cow bull.

Hello Everyone -

I hope this catalog is finding everyone in great spirits and health. This last year some pretty big changes have taken place for us. Devyn and I got married in June. She is a huge asset to us and often time I wonder how everything got done around here without her help.

I think everyone would agree that it's a good thing 2018 is over and we can start fresh with 2019. I think everyone would agree that this winter has been much more pleasant than last winter. Lets just hope that we get some nice warm rains in may and june to bring us lots of hay and grass.

For everyone that isn't familiar with my program, it started as a 4-h project for me in the fall of 2005 and most of my herd be traced back to that cow. I don't give my cows any special treatment and I try to raise bulls that will excel in any environment. I try to raise cattle that are big enough to provide the performance needed to raise big calves yet moderate enough that they don't eat everyone out of house and home.

The bulls were weaned on October 2nd this year. I changed up my feed program a little this year. I hand fed them for 28 days before pulling the self feeder in. I plan on leaving the self feeder in until the 25th of January or first of February. At that point I will feed them by hand again. Slowing the grain intake down and transitioning them to a strait hay diet. I feel that they will hold up a lot better this way and help them remain in good condition throughout the summer.

I would like to thank all of my previous customers for believing in my program, Teddy, Sara, and Crew for allowing me to be a part of their sale again and last but definitely not least, my parents. I wouldn't be where I am without their support and help. If anyone has any questions or would just like to visit please don't hesitate to call. I enjoy visiting with everyone. See you all March 4th.

Merle & Devyn

4504 was my parents pick of the 2015 sale. He is a unique in the fact that he is a chism son that works on heifers. we used him this last year on our commercial and registered heifers and he worked well so we are trying it again. I will know a lot more coem sale time but we are very excited to see how it goes this year. His calves are larger framed with lots of length and meat on them. His sons and daughters have lots of eye appeal and great dispositions. I am very excited to see what the future holds with these calves! 1 son sells. Semen Available.

WR	98	Dam NR	3/98	365 Wt/Yr	1316	Ratio	98

Moderate birth weight on this good Huntley son. His dam is another good young Bear Paw daughter with a good udder. I'd recommend this one be used on cows with his mothers background.

878 is a bull that could have easily been at the top of the sale order. He's another jet that has that standout look to him. He ranks in the top 10% WW, YW, and docility. The dam of 878 is a young 9903 daughter with a high tight udder. Cow bull.

872 really pushed the scale down at weaning time. He has a touch more length then some of the Jet sons with the same great thickness and growth. His dam is an excellent young 9903 daughter. She has good feet and udder quality. Cow bull.

LOT 42 **Clear Creek Jet 8218** Reg: AAA 19178762
Clear Creek Angus Birth Date: 02/18/2018

8218 is a wide based moderate framed Jet son that weaned heavy. His dam is bigger framed Surenuff daughter that has done a good job for us. Cow bull.

Another younger calf that performed well. Comes with mode Stout, big boned Jet son that will pack the pounds on. Dam is a 10-year-old cow we purchased from Armtzen Angus as a calf. 821 should leave behind some nice females, rate birth and explosive growth. The 375 sire has been a good breeding bull for us and should clean up feed and udder issues. Use on large heifers or cows.

LOT 44 **Clear Creek Artillery 8418** Reg: AAA 19178747
Clear Creek Angus Birth Date: 02/20/2018

Artillery son with a lot of eye appeal to him. 8418 is moderate and stout with a good clean front. Dam is an excellent uddered Upward granddaughter. She had a son sell to Scott Snider last year. Cow bull.

803 is a jet with a little more frame and lots of length. This calf got sick right before weaning which knocked his weaning weight back considerably. He was one of our best all summer. His dam is 11 years old, bred back AI and has an udder like a 2-year-old. Cow bull.

8227 is along bodied bull that should have a little more frame to him. His dam is a bigger framed TC Blaine cow that has done us a good job. Cow bull.

Here's a late March calf that crushed the scale in the middle of September. If you like weaning big calves this one will sire the progeny to do it. His dam is a big framed Dutchman daughter that is a pathfinder. Cow bull.

8115 is another late March calf that weighed up really good. This will be a big long stout made bull when he's done growing up. 8115 is another one that will add to a guys weaning weights. His dam is a Franklin daughter with a little extra frame to her. Cow bull

831 is built much like the last two lots. Long with added growth. Keep these half brothers together for a uniform set of calves. Dam is a 12-year-old Danny boy daughter with an excellent udder. Cow bull.

This was one of our top Hickok sons prior to an injury at the feedlot. He has recovered and should be good by sale time. Use on large heifers or cows.

(406) 386-2244

It is our pleasure to welcome you to the 11th Annual Clear Creek Angus Sale. Thank you Teddy and Sara for allowing us to market our bulls in your sale. We would like to thank all the past bidders and buyers. We sure appreciate our great customers. We always enjoy hearing how the bulls have worked for you. It is extremely gratifying to hear that the bulls have added extra pounds, or have benefited your herd in any way. We continue to manage our cows like most commercial outfits do. Our cows get no special care and the calves are never creep fed. We expect them to perform in the real world. Our goal is to raise problem free, easy calving and fast, explosive growth cattle.

The bulls have been back poured with 'CleanUp, vaccinated with Cattlemaster Gold PF5, Blackleg, and Multi-Min 90. The bulls also have been vaccinated twice with the foot rot vaccine.

Check our website, www.weaverherefords.com for video's of the bulls or you can view them anytime at the ranch. The bulls can also be viewed the afternoon of March 3rd at Bear Paw Livestock.

We wish you the best in 2019 and look forward to visiting with you down the trail.

Don & Dolly

SCURS

1810 was born unassisted from a 2 yr. old heifer. He is from an excellent cow family. His maternal Grand Dam is a Dam of Distinction.

We would like to thank everyone for the support of our program over the years. It is truly appreciated. We look forward to working with customers old and new into the future!

The Crowley's

WHY WE TEST WITH HD50K FROM ZOETIS

Powered by HD50K from Zoetis, our cattle sell with genomic-enhanced expected progeny differences (GE-EPDs).

With GE-EPDs, we're confident that customers like you can minimize risk in their investment — and enhance the productivity of your cattle.

The benefits of buying HD50K and i50K-tested bulls and heifers goes beyond added accuracy for the complete range of traits for more productive daughters and progeny. You'll know early on what that animal is likely to transmit to its offspring and potential for performance in the feedlot and on the rail. You can also match the HD50K tested sires you buy from us to calves and replacement heifers — through GeneMax[®] Advantage[™] and GeneMax[®] Focus[™] — to make better breeding and management decisions down the road.

Knowing an animal's potential. Continuous progress of your herd. That's why we test with HD50K.

Number of progeny records in conventional genetic evaluation needed to achieve the same accuracy as GE-EPDs for non-parents with HD50K and i50K[™] in the Angus Single-Step genetic evaluation
