

Friday

ANNUAL BULL SALE

MARCH 17, 2023

12:30 PM / AT THE RANCH / NORTH PLATTE, NEBRASKA

Most of the Best

a customer

**A CUSTOMER IS THE MOST IMPORTANT
PERSON IN ANY BUSINESS.**

A customer is not dependent on us.
We are dependent on them.

A customer is not an interruption of our work.
They are the purpose of it.

A customer does us a favor when they come in.
We are not doing them a favor by serving them.

A customer is a part of our business.
Not an outsider.

A customer is not just money in the cash register.
They are human beings with feelings, like our own.

**A customer is a person who comes to us with
their needs and wants.**
It is our job to fulfill them.

A customer deserves the most attention we can give.

**THEY ARE THE LIFEBLOOD
OF EVERY BUSINESS.
THEY PAY OUR SALARY.
WITHOUT THEM, WE WOULD HAVE
TO CLOSE OUR DOORS.**

welcome

GREETINGS FELLOW CATTLEMEN -

Welcome to our annual bull sale where this year we will market the largest number of bulls to sell on this ranch with over 400 head. With the expansion of the TD Feed Test, our heifer development program and our feeder cattle buy back program we have continued to meet customer demand and keep these bulls affordable and add more selection for the commercial cattleman, who is the backbone and focus of this disciplined cow herd. It is not only our largest offering to date, but also our largest offering of embryo transfer bulls that are out of the top 1% producing cows of the herd. Over 112 head are ET bulls, a whopping 35% of the offering. That is a unique and rare opportunity for customers to sort through the front end of the cow herd and make genetic selection and improvement unlike ever before at the Most of the Best.

It was one of the most difficult years for our program, but it was also the most productive. In one of the worst droughts in modern history, crazy inflation and rising interest rates, it was one thing to grow, but it was another to just stay in front of the note. But we did and at

printing time we have seen some of the highest priced feeder cattle prices in almost decade and just this week we sold fat cattle for live weight price for the highest of all time. Feeder cattle and cow inventory is at record lows, levels never seen before and the futures market confirm what we are seeing in the live market and that great times lie ahead for those that stay the course and weather the storm. It has never been more important to keep your cow herd and calf crop genetically important than today because in the near future, the most of the best will be worth more than ever.

A special event for this year's sale is the Supply Chain Panel we are hosting the night before the sale. We have invited some of the most prominent industry leaders and customers to come and speak about the industry in it's entirety and we will have producers representing the cow-calf, cattle feeder, meat packing and retail industry. This is a first of its kind and exclusively for our customers to sit in and hear what this vision looks like with TD Angus and Sustainable Beef. Never in history have we had every aspect of the beef supply chain in the same room with the same goal, from conception to consumer, to make a safe and efficient beef supply chain that all aspects of the industry can benefit and be profitable from. In the end, profitability is sustainability and we could not be more proud to offer never before seen programs and premiums to our customers. Please join us the night before the sale for our Supply Chain Panel on March 16th with brisket and beer and the next day for our annual bull sale, Friday, March 17th on St Paddy's Day, where the one day a year we sell the Most of the Best, and the other days we go to work for you.

TREY & DAYNA WASSERBURGER

WESTYN, GENTRY, GWYN, AND WACEY

SALE LOCATION

3230 E Watts Rd. / North Platte, NE 69101

SALE SCHEDULE (All Times Central)

Thursday, March 16th, 2023

8:00 AM - Cattle Available for Viewing

6:00 PM - Supply Chain Panel

Friday, March 17, 2023

8:00 AM - Cattle Available for Viewing

11:00 AM - Complimentary Beef and Noodles Lunch

12:15 PM - TD Angus Feed Test Winners Announced

12:30 PM - TD Angus Bull Sale

Please join us for a Certified Angus Beef meal and beverages following the sale.

ANNUAL BULL SALE

FRIDAY, MARCH 17, 2023

12:30 PM CT / AT THE RANCH / NORTH PLATTE, NEBRASKA

**SELLING 280 YEARLING ANGUS BULLS
AND 100 FALL ANGUS BULLS**

LOAD OUTS

Load outs will take place after the completion of the sale.

LIABILITIES All persons attending the TD Angus sale do so at their own risk. TD Angus assumes no liability, legal or otherwise, for any accidents that might occur on or about the premises.

FERTILITY AND BVD TESTED All Angus bulls selling have been fertility and BVD tested and scrotal measurements were taken by Dr. Kevan Albertson, Stockman's Vet Clinic, North Platte, NE.

RETAINED INTEREST TD Angus will retain 1/3 revenue-sharing semen interest in all bulls selling. The buyer has full possession and 100% of the salvage value of the bull. Should we want semen on any bull selling in the sale, semen for our use would be collected in the off-breeding season at your convenience and at our expense.

GENOMIC TESTING

All of our cattle have been genomically tested using AngusGS powered by Neogen GeneSeek.

ULTRASOUND Samantha England performed all Angus ultrasound work.

LIABILITIES All persons attending the TD Angus sale do so at their own risk. TD Angus assumes no liability, legal or otherwise, for any accidents that might occur on or about the premises.

SUPPLEMENT SHEET A supplement sheet will be available with complete and up-to-date information on sale day and will be posted online at TDAngus.com.

#The PROGRAM

VOLUME DISCOUNTS

5% discount: 5-9 bulls purchased
10% discount: 10 or more bulls purchased

DELIVERY Free delivery to any state in the continental United States. Haul your own bulls within a week of the sale and we'll deduct \$200/bull. Our goal is to complete all deliveries by May 15. Buyers cooperation in this regard is greatly appreciated. Contact Trey when you brand your calves and he will bring your bulls with him. It gives him an opportunity to view the calf crop and understand your program and its goals with more clarity and direction.

GUARANTEE All bulls are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 60-day period following the first turnout of the bulls. Please notify us as soon as possible when an injury occurs and prior to the injured bull being sold for salvage. Credit for the amount of purchase less the salvage value will be given in next year's bull sale. This guarantee does not include death loss. Mortality insurance available sale day.

CAN'T MAKE IT? Buy with confidence on sale day! A TD Angus representative will buy on your behalf, within your budget, and we guarantee your satisfaction upon delivery.

CHECK OUT THE QR CODES!

Next to each lot is a QR code that will take you directly to a video of that specific bull. Just open the camera app on your smart phone, hover over the QR code and tap the link that appears.

ONLINE BIDDING

The sale will be broadcast on NorthernLivestockVideo.com.
Please register to bid by March 16th.

SUPPLY CHAIN PANEL

Feeder

MARCH 16, 2023

6:00 PM at TD ANGUS

Conception

ANDREW WASSERBURGER

CASSIE LAPASEOTES

BILL RUPP

GRANT KEENAN

Please join us the night before the sale for the first time we sit down with leaders and customers from all aspects of the industry, from conception to consumer, and discuss what the TD Angus to Sustainable Beef supply chain looks like. This will be in an interactive discussion that for the first time we have everyone along the beef supply chain in the same room, discussing the same goals for all involved to be profitable and truly sustainable

Panelists

ANDREW WASSERBURGER - Cow Calf Producer

Fifth generation rancher and owner at Bootheel 7 Livestock in Lusk, WY established in 1916 and Ranch the 2022 Certified Angus Beef Commercial Commitment to Excellence Award Winner and 4X TD Feed Test Winner.

CASSIE LAPASEOTES - Cattle Feeder

Fourth generation of Lapaseotes Inc, a diversified farming and ranching family operation in Bridgeport, Nebraska that focuses on cattle feeding. An innovating company who is member of Dinklage Feedyards, Engler program and a founding family of Sustainable Beef LLC.

BILL RUPP - Sustainable Beef

Founder of Sustainable Beef LLC with 35+ years in the meat packing industry and started from the ground up from meat cutter and eventually became CEO of Cargill Meat and JBS USA and inducted into the Meat Industry Hall of Fame 2021.

GRANT KEENAN - Walmart Procurement

A cow/calf producer with 30+ years of experience in animal husbandry and director of cattle management & procurement for Wal-Mart. He works with ranchers nationwide in his position to provide the kind of beef consumers are wanting for the nation's biggest beef buyer.

SUSTAINABLE BEEF

Coming early 2025 / A new live cattle market coming to North Platte, NE
1,500 capacity producer owned packing plant

Packer

Consumer

SUSTAINABLE BEEF

Sustainable Beef LLC is a rancher-driven and owned beef processing facility proposed for North Platte, Neb. The 500,000 square-foot plant will have the capacity to process about 1,500 cattle per day and is expected to employ 875 workers and have a \$1 billion dollar impact on North Platte's economy. The plant is expected to be operational in early 2025.

The project received a boost when Walmart announced Aug. 31 it would acquire a minority stake in Sustainable Beef and have representation on the board of directors. Walmart's partnership offers the startup access to its large retail food outlets nationwide. Sustainable Beef also committed to following Walmart's Position on Antibiotics in Animals, which requires suppliers to adopt and implement the American Veterinary Medical Association Judicious Use Principles of Antimicrobials.

"We set out on a journey two years ago to create a new beef processing plant to add some capacity to the industry and provide an opportunity for producers to integrate their business of raising quality cattle with the beef processing portion of the industry and do it in a sustainable manner," said David Briggs, chief executive officer of Sustainable Beef. "During this journey we found that Sustainable Beef and Walmart aligned on continuing to improve how we care for our animals and crops and provide consumers the positive experience of enjoying quality beef."

- Excerpt from DROVERS by GREG HENDERSON October 6, 2022

TD ANGUS *Industry Action*

2022 Entrepreneurs of the Year

Trey and Dayna were awarded the North Platte Chamber & Development Entrepreneurs of the Year Award in October 2022 alongside fellow founders of the Sustainable Beef Project, Rusty and Rachael Kemp of Pioneer Ranch and Kirk and Tracy Olson of Olson Farms.

2023 Tomorrow's Top Producer Horizon Award winner

Each year, the Farm Journal's Top Producer recognizes a producer under the age of 35 who demonstrates excellence in the business of farming, specifically marketing, finance, technology and family and employee relations. Trey and Dayna were selected as the 2023 recipients of the Tomorrow's Top Producer Horizon Award awarded at the Top Producer Summit in Nashville in January 2023.

BOOTHEEL 7 RANCH

Honored for Commitment to Excellence

Bootheel 7 Livestock Recognized as the CAB Commercial Commitment to Excellence Honoree

Like generations before, Eric and Andrew looked for every opportunity to build and buy. They added farming to the mix and most recently built a grow yard for another element of control in cattle marketing. The only way to keep tradition alive, they figure, is to allow it to change and evolve with a competitive edge. After all, it's competition that drove Henry and JD to move the cow herd to an Angus base decades ago.

"In this country, you just have to have cows that can do it themselves," Andrew says, nodding across the wide, Wyoming prairie of big grasslands cut by deep coulees and rocky enclaves. "If she has bad feet, she's not going to travel to water, she's not going to travel to cake or mineral, which means she's more likely to slough a calf or short him on nutrition. It just doesn't work." He studies their performance records, willing the cows into a competition with one another.

Andrew points to one definitive training tool that helped the ranch grow to support several families. "The use of technology is really what inspires me to keep moving forward, because you can actually measure progress on ranches now," Andrew says. From range conditions to water use to breeding, feeding, carcass and nutrition, the technology offers a score board of progress.

About six years ago, the family got curious about how competitive their beef could be on the plate, too. They started ultra-sounding potential replacement heifers to gain a clearer picture of marbling ability and ribeye size and soon moved to scanning every heifer on the place. Sorting ensures every keeper has the targeted 1.1 square inches of ribeye per 100 pounds of body weight and an intramuscular fat (IMF) score over 3.5 - the threshold for Choice marbling. This year, they invested in genomic testing for each heifer, with an even-more detailed, analysis of maternal, carcass and performance traits. Now they know exactly what the scorecard will show before they step into the ring.

"That's the fine-tuning," Andrew says. After sorting phenotypically for the top 500, they used the genetic data to sort by ribeye size, IMF score and weight. That focus pays off. The Bootheel 7 steers handily won the Nebraska-based TD Angus Feed Test "Highest CAB Percentage" category two years in a row with pens at 64% Feed Test "Highest CAB Percentage" category two years in a row with pens at 64% and 65% CAB and 100% Choice or higher. They topped the Percentage Prime category, too.

Topping two out of five categories was an honor, a brief moment to glance at the scoreboard and be proud to see their name in lights. "But we didn't win 'em all; that means we still have a lot of work to do," Eric says.

Spring Yearling Bull Management

This year, the spring bull offering has never been tested to do more with less during one of the worst winters in a decade to boot. You'll notice each bull has an ultrasound scan box stating their actual data. You will also notice the Rib Fat box, this is expressed in inches and to give you a mean, the industry standard for beef cattle is .48 inch of back fat. This offering average is .18. That is a huge difference. Instead of the seedstock producer trying to convince you that the offering has not been pushed with grain, we are proving it.

These bulls are developed for longevity and fertility first, one of the main profit drivers in sustainability in today's commercial cow herd. These bulls are raised in the Sandhills on grass and their mother's milk, that is it. No creep or grain. Last year there was a discussion at the sale how our bulls are developed and our good customer Tom Walz, leaned over and said, "I run right next to these cattle in the summer. We can't even get a truck up there, more or less a creep feeder. This cow herd is a direct reflection and reality of a commercial cow herd. Trust me." With the largest offering ever, have confidence that these bulls will go out and hold up and breed more cows than ever before because they are designed and developed that way. Guaranteed.

T/D DOC RYAN 049 #19820224

first sons of
DOC RYAN
to sell!

CED	BW	WW	YW	DOC	HP	CEM	MILK
7	0.9	95	162	17	14.0	9	28
CW	MARB	RE	\$M	\$W	\$F	\$B	\$C
80	1.18	1.01	77	90	120	201	338

This should be the easiest footnote to write, but it's coming harder than ever. The one that has done it all. The record setting all time seller of \$525,000 to Herbster Farms in Fall City, NE is everything we thought he was and more and his first offering have awoken the breed that you can have phenotype and genotype. You can have the Most of the Best, and he is that. I have total strangers I meet in my travels that come up to me and tell me how "Doc" is the best bull they have ever seen, regardless of any breed. He truly is one in a million. His rookie year progeny data couldn't be any more impressive with 29 herds BW@100, 20 herds for WW@104, 9 herds for YW@104, 7 herds for IMF@105 and 7 herds for RE@103. We have one regret, and that is we didn't breed everything to him his first year. There is new front runner in the Angus breed and your first chance to buy his sons is right here.

FLUSH BROTHERS LOTS 1-4

When we envisioned what Doc Ryan would do, this is the flush we dreamed of. All year long we have gone back and forth on who we think should be Lot 1 and it was a daily mental battle and that's the point of a great flush, when they are all elite it's hard to decide who has the "Most of the Best". The answer is all of them though. "556" is proving to be one of the elite donors in the program with many high sellers already and a production record of 5BW@95, 5WW@104 and 5YW@102. Every heifer mate to this flush will be retained in the herd.

Sustainable Beef Founding Families

FLUSH BROTHERS LOTS 21-22

Progressive mating here out of the 2021 high selling heifer, "0399" who sold for \$21,000. She has a royal pedigree being the only Exclusive daughter out of the matriarch of the herd in Cavalry's mother, "W857", who produced well into her teens and is in hundreds of pedigrees not only here but all over the country. Balanced trait flush here that does a lot for calving ease to growth and carcass merit and the replacement heifers out of this mating will be elite.

Cool pedigree here that has a herd bull EPD profile. Mother was born out of our ET program and every cow on the bottom side of the pedigree was a donor in their own right. Heifer safe with top 5% of the breed growth, huge heifer pregnancy, breed leading carcass quality. There is just a lot to like here all wrapped up in a top 2% of the breed \$C.

FLUSH BROTHERS LOTS 30-31

First flush offered by new donor in the program. Her first bull calf sold to one of the great cattlemen in the breed in Larry Patterson of BoPat Farms in Bradford, Tennessee who is making a mark on their program. Both sisters to this flush were retained in the replacement pen as well.

Big time growth bull here out of a first calf "Charm" daughter. He has a massive ribeye EPD in the top 1% of the breed and killed it on growth and carcass with ratios of WW@104, YW@105, IMF@122 and RE@113. If you need to increase yield grade, he will do it. After all it could win you \$5 in the TD Feed Test!

Stud out of one of the promising young cows on the place that's begging to be flushed. She raised one of the heaviest heifer calves last year as a first calf heifer and like every good cow bred right back and raised another one. He has a ratio of 115 for weaning and hasn't let off the gas yet with a YW@110, IMF@126 and RE@104. Elite carcass merit with a +1.18 marbling EPD and goes back to the calf raising donor "149".

The first offering by this rookie sire to the program. A complete outcross to the entire program, he was purchased with a wide arranged buyer group of progressive breeders throughout the country who admired him for his length of body, moderate and masculine make, real soundness and his elite EPD profile and sold for an astounding \$280,000. His progeny have a show ring presence about them and carry themselves very well and have absolutely exploded on feed. He is one of most attractive bulls in the business today that reads elite with a proven double digit calving ease and top 5% of the breed in carcass merit in marbling, ribeye, \$G, \$B and \$Combined. His progeny are scanning well also with 6 herds ratio 105 for IMF and 103 for ribeye. We have several bulls in this freshman sire group that could be herd bulls and used back in the program.

More moderate, calving ease son of the flush. Still packs a punch with awesome carcass merit with both marbling and ribeye EPDs over a +1.0 and he backed it up with a 104 IMF and 103 ribeye ratio. Should also work at elevation with a negative PAP EPD.

71

72

FLUSH BROTHERS LOTS 71-72

Nice flush here that compliments each other well. 8306 is an up-and-coming donor that is the full sister to one of the high selling bulls in the 2020 sale, T/D Midwest who went to good cattleman and program, Jason Jagels at Cattleman Cut in Brewster, NE. She is a massive middled female that is stout as could be and a perfect udder and it shouldn't surprise anybody as her pedigree is packed with maternal excellence with two of the most influential cows on the place in "1551" and "3210" who are all still producing today in the donor pen. Lots to like here.

Herd bull with an elite pedigree and out of one of the hottest cows going in the breed, "F047". One of the only "Whitewater" sons in the breed to be both 1% weaning and yearling weight and crazy carcass qualities with both marbling and ribeye both in the top 3% of the breed. This bull has done it all. Wild \$Values with 4 of the 6 in the top 2% of the breed or better. One of a kind here.

SUPPLY CHAIN PANEL

MARCH 16, 2023 at 6:00 PM

Please join us the night before the sale for the first time we sit down with leaders and customers from all aspects of the industry, from conception to consumer, and discuss what the TD Angus to Sustainable Beef supply chain looks like. This will be in an interactive discussion that for the first time we have everyone along the beef supply chain in the same room, discussing the same goals for all involved to be profitable and truly sustainable.

Panelists

**ANDREW WASSERBURGER - Cow Calf Producer | CASSIE LAPASEOTES - Cattle Feeder
BILL RUPP - Sustainable Beef | GRANT KEENAN - Walmart Procurement**

FLUSH BROTHERS LOTS 74-76

Once in a lifetime opportunity out of a flush out of one of the matriarchs of the breed in Casino Bomber N33's dam, the \$190,000 selection by Vermilion Ranch who has left a mark on the breed and especially here at the Most of the Best. Bomber has had sons and grandsons top the sale the last three years, including the record setting \$525,000 T/D Doc Ryan 049 who will have his sire unveiling during this year's sale. Progressive mating here that will make beautiful replacement heifers, but still keep carcass merit in them at the same time.

Progressive pedigree out of one of the longtime donors on the place and he will fit the modern industry.

FLUSH BROTHERS LOTS 84-85

One of last flushes out of one of the up-and-coming donors in the program that died unexpectedly in the Sandhills last summer. She left her mark on the herd though with her first calf, T/D Tiger 8106 topping the sale in 2020 and an elite production record of 4BW@102, 4WW@106, 4YW@106, 10IMF@103 and 10RE@100 and maintained a great calving interval while being flushed of 4@373 days. Growth, performance and carcass out of a great cow here.

First offering by Doubt Me Now who is doing a phenomenal job as a herd bull at the Most of the Best. He sold in our 2021 sale for \$30,000 to good friends and cattlemen at McWherter Farms in Dresden, Tennessee and has been used heavily in both our program and theirs. He was selected as the No Doubt son to move on with because he kept the stoutness, good feet and carcass quality that No Doubt did but he is more calving ease, higher heifer pregnancy and a low PAP bull for a better immune system and can work at elevation than his sire. His progeny are fault free and we have had multiple visitors see his heifers in the replacement pen and they are some of the best fronted and smoothest in the pen, they look to be real momma cows. It shouldn't surprise anybody coming from his cow family and mother who produced until her 14th birthday with an elite progeny record of 11BW@101, 11WW@103, 11YW@103, 11IMF@101, 11RE@107 with a calving interval of 11@366 days while being flushed and put 6 natural daughters in the replacement pen.

Awesome EPD profile on this herd bull. Calving ease, explosive growth, top 1% of the breed for heifer pregnancy, top 10% of the breed for every carcass quality and top 10% of the breed in every \$Value in the top 10% of the breed or better. Phenomenal cow family, as you'll notice the "442" at the bottom of the pedigree who is the mother of 2022 high-seller, T/D Troubadour 159. Most of the Best.

very well balanced
FLUSH BROTHERS

FLUSH BROTHERS LOTS 89-90

Neat flush here with both cows close up on the pedigree were long time producing cows and donors here that both produced well into their teens. We expect longevity and long-lasting females will come out of this flush for that reason without sacrificing foot and udder quality and keeping carcass merit in them. Very well-balanced flush that checks a lot of boxes.

We like this bull and he checks a lot of boxes to sire elite feeder cattle and leave beautiful replacements. Wonderful cross at the ranch for bulls and heifers with Doubt Me Now and Playbook daughters. Grandmother was the elite "1117" cow who was a donor here and one of the high selling females of the Mature Cow Dispersion in 2021 going to our friends, ELK Angus in Buffalo, WY. Full sister to the mother of this bull sold to Bill and Barb Rishel's granddaughter's Tatum Terwilliger. Think she has an eye for a good one?

This should be the easiest footnote to write, but it's coming the hardest. This bull means so much to our family. I have never, I mean never, used a bull that I couldn't find something I would tweak or change. Exclusive is that bull. This bull is the epitome of all that is great in Angus genetics and is the most of the best. Our program strives to do it all. Our bulls must sire great long-lasting cows and heavy weighing feeder cattle that have a chance at prime. With the tens of thousands of Angus bulls produced every year, very few can pass that test. Exclusive sold the high selling fall bull last year to the historic and maternally driven Sitz Angus for \$40,000 and another herd bull to Krebs Ranch of Gordon, NE, all in his first offering. I can confidently tell our customers this bull will improve your bottom line and I'm proud to offer his sons for your program to do just that. Daughters in production

are long bodied, great uddered and great mothers and are starting to make their mark. The proof is in the data with a miraculous 560 herds BW@100, 462 herds for WW@100, 278 herds for YW@100, 157 herds for IMF and RE@100 and 86 herds with daughters in production with a nursing ratio of 101.

FLUSH BROTHERS LOTS 105-108

Front end mating here out of one of the stoutest MVP daughters on the planet that went to good program, Lylester Ranch. The Exclusive x MVP mating really works well and compliments each other well and the cow power between the two is Angus elite. 803 was the high selling heifer from 2019 and was one of the first MVP daughters to ever be offered and she will really rung the bell and continues too as a donor.

Cool mating here out of the high selling heifer calf going to good friends Lylester Ranch from 2019. Long bodied and good footed bull. Can be used on heifers and give you all the growth and carcass value you will need without throwing your cow herd away. Powerful feeder cattle and daughters that will raise the same here.

DAM OF LOT 105-108 T/D Rita 803 #19097305

FLUSH BROTHERS LOTS 109-110

Angus elite here. F047 is proving to be one of the most sought-after donors in the entire breed and just last summer sold for \$195,000 for half interest at the Baldridge Performance Female Sale and recently sold 1/2 interest to \$100,000 to good friends and cattleman, Kern Cattle Company. This is a very young flush that won't be a year old at sale time, but by the time green grass comes they will be every bit as powerful as the early born bulls. Angus breed elite here.

DAM OF LOT 109-110 Baldridge Isabel F047 #19235220

FLUSH BROTHERS LOTS 111-112

First flush offered by new donor in the program who came from our good friends, Bobcat Angus in Galata, Montana. She has already produced a big-time herd bull with "Bobcat Blue Sky" who sold for \$50,000 to ST Genetics and this set of flush brothers fit the bill with length of body and plenty of marbling. She is also a half-sister to T/D herd sire Basin Deposit dam. The "Denvers" are phenomenal cows and look for a large amount of progeny next year as well.

Exciting new sire group of our newly acquired Herd Bull in Basin Deposit 6249. Trey found this bull on his travels through Montana after seeing his sons at Basin Angus who impressed him with their incredible length of body, perfect foot, stoutness, heavy muscled and sound all while being the top 1% of the breed for weaning weight, yearling weight and marbling. Deposit has already sired sons selling to semen companies and females that have topped many elite sales throughout the country. Deposit has sired calves in 18 herds that ratio 103 for weaning weight, 10 herds that ratio 103 for yearling weight and 9 herds that ratio 104 for IMF. The data and the phenotype of this sire group looks promising at the #mostofthebest and we are excited to offer our first set to our customers.

FLUSH BROTHERS LOTS 142-143

Lots of power in the flush out of the mother to 2020 high selling bull, T/D Tribute 8351, that sold to good cattleman and friend, Randall Grimmus. She is quickly becoming one of the elite donors of the program and has a great production record so far of 5BW@95, 5WW@104 and 5YW@102 and both heifer mates to this flush were retained in the program. The cow power in this flush is as good as it gets with "556" and "4288" and "1037" behind them.

Calving ease son of Deposit who can be used on heifers and has a balanced set of EPDs to sire a great set of feeder cattle and beautiful replacements.

FLUSH BROTHERS LOTS 147-148

Once in a lifetime opportunity out of a flush out of one of the matriarchs of the breed in Casino Bomber N33's dam, the \$190,000 selection by Vermilion Ranch who has left a mark on the breed and especially here at the Most of the Best. Bomber has had sons and grandsons top the sale the last three years, including the record setting \$525,000 T/D Doc Ryan 049, who will have his sire unveiling during this year's sale. Progressive mating here that will make beautiful replacement heifers, but still keep carcass merit in them.

Rare double digit calving ease son of "Deposit" with a big heifer pregnancy in the top 2% of the breed and every \$Value in the top 30% of the breed or better. Keep every replacement here that is going to raise high primes in the near big market for premiums.

149

150

FLUSH BROTHERS LOTS 149-150

Deposit was specifically purchased to be used on Cavalry daughters and this is a good example of that. The young 742 donor is doing a good job in her young career with 3WW@112 and 3YW@109. She is always admired on green grass in the sandhills with her big middled powerful build with a perfect udder and always dragging around a big calf. Her mother, the "31" cow, was a donor here as well and was sold to HI/ Cattle Co and is working as a donor there as well. Power and performance here.

 Heifer bull that does a lot right. Out of a great young cow that is really making her mark on the herd with a great start to her career and did a great job with this calf with a BW@100, WW@117, YW@116, IMF@120 and RE@110 and laid down 355 days later and had a full sister to this beast that will be kept in the replacement pen. Breed leading growth and carcass in a long bodied and sound package. Most of the Best.

T/D TRIBUTE 8351 #19218761

CED	BW	WW	YW	DOC	HP	CEM	MILK
9	-0.7	84	141	14	13.3	11	24
CW	MARB	RE	SM	SW	SF	SB	SC
74	0.93	1.10	69	80	120	193	319

We are really excited to offer this first time set of sons out of the 2020 high selling herd sire to a great customer and more importantly good friend in Grimmus Cattle Co for \$36,000. Tribute was a fan favorite for his tremendous length of body, bold sprung soundness and tremendous picture-perfect front end. Tribute broke every record for Grimmus Cattle Co for semen production by making an incredible 52,000 units in one year, that's 1,000 units a week. Unheard of in the Angus breed. Randall Grimmus told me one time that "The Angus breed needs this bull and they don't even know it yet." By his first calf crop I would say that he is correct. His lead off son, T/D Troubadour 159 was the \$56,000 high selling son last year and his full brother will highlight this year's sale. Tribute not only is a phenotypic specimen but we also wanted to inject the historic and legendary Ruby of Tiffany cow family back into the program. He is backed by eight generations of "Ruby's" that were all born and raised here right on this ranch. His mother has moved into the donor pen after a great start to her young career with 4 BW@96, WW4@103 and YW4@102. She is a full made, powerful big bodied female that is really sound on her feet and legs and we think Tribute will sire the same. Beautiful feminine replacement heifers and heavy weighing feeder cattle that can make prime. That is the most of the best. Great progeny ratios of 14 herds BW@100, 13 herds for WW@101, 6 herds for YW@100, 5 herds for IMF@101 and 5 herds RE@101. Due to his passing last fall, this will be some of the last progeny to sell but his legacy lives on with his elite daughters now retained in the cow herd.

168

FLUSH BROTHERS LOTS 168-175

Large flush of brothers that really did it and have been admired in the big pen all year long. This mating produced as much length as any flush we have ever had on the place. Mother is known on the ranch and throughout the industry as the mother to B/R MVP 5247 who was used widely in the program and was one of the most consistent sire groups in the last decade and also used on many commercial ranches in large AI heifer projects with raving results. MVP daughters are some of the best uddered females on the place as well and we expect this big flush of brothers to do the same.

Full brother to last year's high seller, T/D Troubadour 159 who sold to astute cattleman in California. This bull is a carbon copy of his brother with his tremendous length of body, beautiful front end and great feet. His EPD profile is elite in its own right with 16 EPDs in the top 10% of the breed or better and every \$Index as well. He is making his case to be used back in the program. Is he better than his brother? We will let our customers decide!

full brother to the

\$57,500

TROUBADOUR!

DAM OF LOT 176 Spring Cove Laura 442 #17930539

**FULL BROTHER OF LOT 176 T/D Troubadour 159 #19967392
High Selling Bull at \$57,500 in 2022**

FLUSH BROTHERS LOTS 177-178

Timeless flush here with one of the longtime donors in the program who is known on the ranch and throughout the industry as Cavalry's Mother. She could be one of the most influential cows in the program and could be in more pedigrees than any other cow on the place. Cavalry daughters have raised high sellers here and continue to impact the program and the breed with 671 daughters in 16 herds with a collective nursing ratio of 101.

Heifer bull out of the famed "Miss Alpine" cow family that raised the herd sire "Right Cross" who left tremendous daughters in the herd. Mother is fertile and always catches to the AI with an average calving interval of 4@371 days with a good carcass profile to go with him to make daughters and feeder cattle. Mother sold a stud to the historic Pioneer Ranch of Tryon, NE last year.

SPRING COVE CROSSFIRE 26H #19716901

CED	BW	WW	YW	DOC	HP	CEM	MILK
10	-0.6	65	120	12	11.4	8	23
CW	MARB	RE	\$M	\$W	\$F	\$B	\$C
53	1.11	0.46	44	58	96	168	262

First offering by T/D herd sire, Spring Cove Crossfire 26H who is the all-time high seller of \$125,000, who we partnered with Sitz Angus of Dillon, MT and Triple L Livestock in Bliss, Idaho. We were watching his sire Crossbow closely as we have seen daughters in production and admired them for their femineity, easy fleshing and great udders, but we wanted a son with more gas in the tank in weaning and yearling weight and added carcass merit and Crossfire came along and checked all the boxes. Crossfire was stout, good footed, big crested and masculine and super sound. He is a sure shot calving ease bull with 14 herds ratio 99 for birthweight. They are smooth and complete cattle and they scan good as well as his marbling continues to rise with more data and ratio 102 for IMF in 5 herds. His cow family is second to none with his mother being the most powerful and productive

cow at Spring Cove and the grandmother being none other than 442, who resides here at TD Angus and was the mother to last year's high seller in T/D Troubadour. 442 has an elite production record of 5BW@94, 5WW@112, 5YW@108 and has kept a consistent calving interval while being flushed of 7@366 days. We expect his females to make phenomenal mother cows.

FLUSH BROTHERS LOTS 204-205

One of the up-and-coming donors in the herd who is owned by herdsman, Kenny Hanson and is the mother to our second high seller last year, T/D Hanson, going to great cattleman, Randall Grimmus. She is a massive made "Cavalry" daughter with a legendary pedigree full of maternal excellence that goes back eight generations of the "Lady Ida" cow family. The grandmother, "9068", was an elite cow with an amazing performance record and produced well into her teens and still maintained her flesh and great udder. Replacements out of this mating will be the "Most of the Best".

One of our favorite sire groups the last couple years and many customers and fans of the program will agree. MVP was leased to ST Genetics and became popular rather quickly for his elite ability to consistently stamp his calves with uniformity, stoutness and a gentle demeanor. Many of our customers have chosen to use him in their AI program on heifers with raving results. The MVP cow family is elite in all aspects, in production and phenotype. His wet daughters are some of our favorites on the ranch and they are incredibly gentle and have some of the best udders on young females we have ever seen. No surprise, MVP daughters are currently sitting at a 101 Nursing ratio. We knew he was an elite sire, and the data has proved that.

46	0.89	0.52	65	63	94	157	269

Outcross bull we used in the program to add phenotype and calving ease while still keeping the carcass merit in them. Thunderball was the top selling bull at the 2018 Sitz Spring sale and after seeing him at the stud we were one of the first to purchase semen. He sired a nice set of sons that are very sound, full made, and big nuted. His daughters in production are feminine made, easy fleshing and good uddered. Due to his untimely death and limited semen only a select few sons will be sold across the nation and most of his progeny this year are embryos out of our ET program.

A timeless sire here who at the ancient Angus age of 10 years old was used here in the program after Trey saw his daughters out working in commercial herds and he was amazed by their feminine cow look, length of body, perfect udder and calf raising ability. Today his daughters are in over 30 herds and have an incredible 104 nursing ratio and their phenotype is second to none and he puts it all together with being moderate birthweight, great growth, big and proven heifer pregnancy, adequate carcass merit and every \$Value in the top 20% of the breed or better including top 3% \$Maternal and top 3% \$Combined. He was specifically used here in the program to make replacement females but in true herd bull fashion he sired a masculine, stout set of sons as well. Bill Rishel would say, 'his hormones are right.' Most of the Best!

WE APPRECIATE YOUR BUSINESS AND
GUARANTEE BUYER SATISFACTION ON ALL BULLS.

FLUSH BROTHERS LOTS 251-252

A mating specifically made to make females and these sons should sire the same. One of the stoutest cows on the place that lays a huge swath when she walks. She has put a miraculous 15 females in the replacement pen making her one of the most prominent donors on the place. She has a record of 6WW@102, 6YW@102, 28IMF@101, 28RE@100. All of the heifers in this flush will be retained in the herd.

29	0.96	0.85	71	51	83	154	271

One of the most popular bulls used in the Angus breed. The cow family behind Plus One is an outcross to our program and his mother is a Pathfinder dam who has a nursing ratio on six calves of 108. She is a powerhouse female with length, soundness and a perfect udder. Plus One daughters are type and jet black in the replacement pen and should make functional cows.

FLUSH BROTHERS LOTS 255-256

This is not your average Plus One flush and that needs to be attributed to the cow and the cow family behind it. Mother is known throughout the program and the breed as the mother to ST Genetics sire, B/R MVP 5247 who has been used widely throughout the industry in the commercial world and has been one of the most consistent sire groups in the last decade and could be some of the best uddered young females on the place. We expect this flush to sire the same.

Return sire group from the \$30,000 T/D Bootheel 7 from the 2020 sale. He was affectionally named after one of the most progressive and two-time TD Feed Test champions, Bootheel 7 ranch because he fits their very tight specs on a herd bull with calving ease, powerful growth, high heifer pregnancy, elite carcass merit and out of a power cow. His progeny are very promising with big time growth ratios of weaning at 103 and yearling at 103. His mother was one of the high selling donors of our Mature Cow Dispersion at \$20,000 going to Jocko Valley Cattle at Arlee, MT who has placed multiple bulls in studs and has an elite production record. Wet daughters look just like his mother, the perennial X374 donor cow. His progeny are excelling in growth with 6 herds BW@100, 4 herds WW@103 and 4 herds YW@102.

DAM OF LOTS 268-269 JVC Forever Lady B444 #18064361

FLUSH BROTHERS LOTS 268-269

One of the last flushes out of one of the powerful donors in the program who sold in our Mature Cow Dispersion to two different registered herds. She is a showstopper in the pasture and was always admired for her capacity, big hip and perfect udder. She has placed a son in a stud at Select Sires and is making her mark in the replacement pen with many daughters. She has an incredible production record of 4WW@106, 4YW@109, 4IMF@112 and 4RE@109 and an average calving interval of 6@363 days. Keep every replacement out of this flush.

Fall Bull Management

This year we have never developed these fall bulls and made them do more with less. They ran on Sandhill grass from May until September where they were brought in and weighed and ultrasound scanned for carcass data. You will notice throughout the catalog each bull has an actual rib fat number. The average on all bulls was .10 inch of backfat and many are under that. Industry standard for fat cattle is .48 inch of back fat. That is a huge, huge difference. Bulls then went back to grass from September and we brought them home on December 11th when the snow brought them in for one of the worst winters we've experienced in a decade.

These bulls are not developed for ego boasting weaning and yearling weights and massive scan numbers, that only hamper longevity and fertility of a bull and add red ink to our customers' profit. We do not creep feed and they are raised on Sandhill grass and their mother's milk. That is it. Bill Rishel has always told us this cow herd must be ran like if they took our registered papers and we could still survive. This cow herd does that. These bulls will do that for our customers. Judge them how they are, not what they can be. Have complete faith and confidence that these bulls will hold up and breed more cows than ever before, because they were developed that way.

This should be the easiest footnote to write, but it's coming the hardest. This bull means so much to our family. I have never, I mean never, used a bull that I couldn't find something I would tweak or change. Exclusive is that bull. This bull is the epitome of all that is great in Angus genetics and is the most of the best. Our program strives to do it all. Our bulls must sire great long-lasting cows and heavy weighing feeder cattle that have a chance at prime. With the tens of thousands of Angus bulls produced every year, very few can pass that test. Exclusive sold the high selling Fall bull last year to the historic and maternally driven Sitz Angus for \$40,000 and another herd bull to Krebs Ranch of Gordon, NE, all in his first offering. I can confidently tell our customers this bull will improve your bottom line and I'm proud to offer his sons for your program to do just that. Daughters in production are long bodied, great uddered and great mothers and are starting to make their mark. The proof is in the data with a miraculous 560 herds BW@100, 462 herds for WW@100, 278 herds for YW@100, 157 herds for IMF and RE@100 and 86 herds with daughters in production with a nursing ratio of 101.

Power growth bull here out of a first calf heifer that put it all into her calf with a weaning ratio of 118 and yearling ratio of 124 and a ribeye ratio of 114 respectively. Like a good heifer she raised a good one and bred right back and laid down and had a Doc Ryan bull calf 368 days later that looks great. Love the maternal sire Playbook in the bottom of the pedigree.

Really like this pedigree. Every cow on the paper has been a productive cow here and it shows in this bull. Phenomenal growth with a 116 weaning weight ratio and it shows with top 1% of the breed for weaning and yearling weight EPD. Huge IMF ratio of 116, he will make heavy weighing feeder cattle that will grade too. Bulls like this are how producers win the TD Feed Test.

One of our favorite sire groups the last couple years and many customers and fans of the program will agree. MVP was leased to ST Genetics and became popular rather quickly for his elite ability to consistently stamp his calves with uniformity, stoutness and a gentle demeanor. Many of our customers have chosen to use him in their AI program on heifers with raving results. The MVP cow family is elite in all aspects, in production and phenotype. His wet daughters are some of our favorites on the ranch and they are incredibly gentle and have some of the best udders on young females we have ever seen. No surprise, MVP daughters are currently sitting at a 101 Nursing ratio. We knew he was an elite sire, and the data has proved that.

We are really excited to offer this first time set of sons out of the 2020 high selling herd sire to a great customer and more importantly good friend in Grimmus Cattle Co for \$36,000. Tribute was a fan favorite for his tremendous length of body, bold sprung soundness and tremendous picture-perfect front end. Tribute broke every record for Grimmus Cattle Co for semen production by making an incredible 52,000 units in one year, that's 1,000 units a week. Unheard of in the Angus breed. Randall Grimmus told me one time that "The Angus breed needs this bull and they don't even know it yet." By his first calf crop I would say that he is correct. His lead off son, T/D Troubadour 159 was the \$56,000 high selling son last year and his full brother will highlight this year's sale. Tribute not only is a phenotypic specimen but we also wanted to inject the historic and legendary Ruby of Tiffany cow family back into the program. He is backed by eight generations of "Ruby's" that were all born and raised here right on this ranch. His mother has moved into the donor pen after a great start to her young career with 4 BW@96, WW4@103 and YW4@102. She is a full made, powerful big bodied female that is really sound on her feet and legs and we think Tribute will sire the same. Beautiful feminine replacement heifers and heavy weighing feeder cattle that can make prime. That is the most of the best. Great progeny ratios of 14 herds BW@100, 13 herds for WW@101, 6 herds for YW@100, 5 herds for IMF@101 and 5 herds RE@101. Due to his passing last fall, this will be some of the last progeny to sell but his legacy lives on with his elite daughters now retained in the cow herd.

Exciting new sire group of our newly acquired Herd Bull in Basin Deposit 6249. They found this bull on his travels through Montana after seeing his sons at Basin Angus who impressed him with their incredible length of body, perfect foot, stoutness, heavy muscled and sound all while being the top 1% of the breed for weaning weight, yearling weight and marbling. Deposit has already sired sons selling to semen companies and females that have topped many elite sales throughout the country. Deposit has sired calves in 18 herds that ratio 103 for weaning weight, 10 herds that ratio 103 for yearling weight and 9 herds that ratio 104 for IMF. The data and the phenotype of this sire group looks promising at the #mostofthebest and we are excited to offer our first set to our customers.

We specifically bought Deposit to put on our Cavalry daughters and here is a classic example why. Heifer safe that will make heavy weighing feeder cattle with a chance at prime and leave you a set of beautiful replacement females.

A lot to like here. Mother is a product of our embryo transfer program who is out of the matriarch of the herd, simply known as "1421" who was one of the high selling females in our Mature Cow dispersion sale in 2021. Breed leading growth and both \$Weaning and \$Beef in the top 5% of the breed or better. Feeder cattle and replacement heifer maker here.

THE STORY BEHIND THE MANTRA

MOST OF THE BEST

We often get asked from customers about our manta "the most of the best" and the story behind it. When Dayna and I first bought the Rishel herd, we had not owned a registered female before, all our experience was in the commercial cow/calf sector and feedlot industry. I, like many of our customers, was torn between evaluating cattle based on their phenotype and genotype/EPDs. It was a struggle for me.

One day we were sorting replacement heifers in the alley and I had asked Bill how do we go about this with all the pedigrees and data available and still keep them structurally and fundamentally correct and he simply stated, "Make her have the most of the best." It is by far the most profound and impactful statement I have ever been told and it covers all aspects of life as well.

These cattle look, act and perform the way they do because with that statement that is how they've been bred and designed for 40 plus years. "Most of the best" is not a factual statement, it is a pledge to a strategic and disciplined breeding program that puts it all together with phenotype and genotype. It is not a statement of who and where we are, it is a statement of where were going. It is a journey, not a destination. Welcome to a journey to be and provide the "most of the best" where you, our costumer, is where this program will be tested and excel.

A timeless sire here who at the ancient Angus age of 10 years old was used here in the program after Trey saw his daughters out working in commercial herds and he was amazed by their feminine cow look, length of body, perfect udder and calf raising ability. Today his daughters are in over 30 herds and have an incredible 104 nursing ratio and their phenotype is second to none and he puts it all together with being moderate birthweight, great growth, big and proven heifer pregnancy, adequate carcass merit and every \$Value in the top 20% of the breed or better including top 3% \$Maternal and top 3% \$Combined. He was specifically used here in the program to make replacement females but in true herd bull fashion he sired a masculine, stout set of sons as well. Bill Rishel would say, 'his hormones are right.' Most of the Best!

 Love this mating here with cow royalty all the way through the pedigree. We probably said a prayer when we AI this cow that this mating would be a heifer, but God has a sense of humor thankfully and now one of our customers will get to make elite replacement heifers. Also did it all on performance with growth ratios of WW@128 and YW@106.

Outcross bull to the program, No Doubt has a phenomenal job adding stoutness and density to his calves. They are tremendously wide with chest floor and bring a lot of pounds to the scale. Many visitors to the ranch this winter have loved this sire group. He consistently sires calves that are gentle and great demeanor and his wet daughters are some of our favorites on the ranch. They are great to work with, have just enough mothering ability and great udders. This is our last year offering No Doubt sons as he is now deceased but his legacy lives on in T/D herd sire, T/D Doubt Me Now who has his first sire group selling this year.

Return sire group from the \$30,000 T/D Bootheel 7 from the 2020 sale. He was affectionally named after one of the most progressive and two-time TD Feed Test champions, Bootheel 7 ranch because he fits their very tight specs on a herd bull with calving ease, powerful growth, high heifer pregnancy, elite carcass merit and out of a power cow. His progeny are very promising with big time growth ratios of weaning at 103 and yearling at 103. His mother was one of the high selling donors of our Mature Cow Dispersion at \$20,000 going to Jocko Valley Cattle at Arlee, MT who has placed multiple bulls in studs and has an elite production record. Wet daughters look just like his mother, the perennial X374 donor cow. His progeny are excelling in growth with 6 herds BW@100, 4 herds WW@103 and 4 herds YW@102.

FEEDER CALF BUY BACK PROGRAM

Trey Wasserburger 307-660-8650

Here at TD Angus we recognize and appreciate the genetic value these cattle have and most importantly how they can perform in the feedyard, specifically on the grid evaluation. As the seedstock producer, we believe our job does not end when the bull leaves the ranch and our commitment to our customer continues from the pasture to the plate.

As in past years, we would continue to encourage our customers to contact us at anytime when they decide to market their calf crop so we can assist as representatives or most importantly as potential buyers. There is no fee or any hidden commissions to enter this program, we don't need to run them through a chute or put a special tag in their ear to estimate or understand their value. Any weight, any sex, at any time of year we are continually looking for cattle that fulfill the "most of the best" in the feedyard or as replacement heifers. Feel free to contact us at any time.

A heifer bull with tremendous birthweight to growth spread with CED, BW, WW and YW all being in the top 15% of the breed or better. This Cavalry x Full Power cross is one of our favorites on the ranch and has left us with some of the best females on the place and this bull will sire the same for replacement heifers.

Herd bull out of a first calf heifer who is owned by two special little cowboys, Westyn Wasserburger and Bo Patterson. These two boys teamed up on a female with a great maternal pedigree with Playbook who is one of the best sires in the Angus breed for \$Maternal and Innovation who makes beautiful females and she did a great job on her first calf. Elite EPD profile with 17 EPDs in the top 10%.

WE GREATLY APPRECIATE YOUR INTEREST IN OUR PROGRAM!

COMMERCIAL HEIFERS

We have a limited offering of replacement heifers this year because of such high demand for quality and uniform groups sired by our bulls. More importantly, many replacement heifers that we are usually offered on an annual basis were not offered for sale by our customers because we strongly advised them if they had the feed that they needed to hold onto them and retain all the heifers they could. It is no secret this cow market is in a drastic decline, with a 2% decrease since last year and we now have the lowest numbers of cows in production that has ever been recorded, levels never seen before. Going forward the elite Angus female that can sire heavy weighing calves that have a chance at hitting a prime grade and will also put replacements in the pen will never be more valuable. These commercial heifers will do just that. TD Angus and it's crew will also come AI breed these heifers free of charge upon purchase.

**LOT A: 50 head of Heifer Pairs from Bootheel 7 Livestock
May 1-10 Delivery - North Platte, NE**

Rare opportunity here to buy a one iron set of heifer pairs from Certified Angus Beef Commercial Ranch of the Year, Bootheel 7 Livestock, one of the most coveted awards in the industry given to one ranch every year that exhibits innovation, adversity and stewardship to the land and cow herd with exceptional marbling and carcass quality. These heifers were AI to B/R MVP 5247 and then cleaned up with TD Angus bulls to start calving mid-March and be done by May 1. Heifers will be front end kind and have not been sorted or topped. They will deliver at green grass time and be ready to turn out and go to work on the lowest cow numbers since 1962. Females of this kind don't come up for sale often, especially this in this kind of market. Opportunity knocks.

**LOT B: 75 head of Angus Replacement Heifers from Bootheel 7 Livestock
March 20-31 Delivery - Lusk, WY - 650lbs**

Another opportunity to buy a front end set of replacement females from Certified Angus Beef Commercial Ranch, Bootheel 7 Livestock. They have not been topped or sorted and will be out of some of the best bulls in the industry. Bootheel 7 comes second to none in a bull battery, where we have seen them outrun multiple registered ranches for bulls. They have used MVP, Exclusive, Demand and GPS all AI within their herd who were all herd bulls at TD Angus. This is one of the most hard-working cow herds in one of the harshest environments I have ever seen. I always tell customers if they are going through Lusk, WY to stop in and view the cow herd because it is not only one of the largest in the region, but one of the best. Awesome opportunity to dig into hundreds of years of genetics from the 2022 CAB Ranch of the Year!

Trey Wasserburger 307-660-8650

LOT C: 120 head of Angus Replacement Heifers from Bryan and Ami Hauxwell**March 20-31 Delivery – McCook, NE – 800lbs**

Always a sale highlight, the Hauxwell replacements return to blow the doors off. This is easily the stoutest and most even set of replacements they have ever offered and this is a very rare opportunity to buy the front end of over 600 heifer calves that have not been topped. Past customers have bought these and we always get calls about their success and just recently this year topped the Iowa bred heifer market this winter. Hauxwell's are cattle people and know what a good one looks like and their bull battery is second to nobody. They like them big, stout and long and these heifers are all of that. With cow supply where it is, this is a huge chance to buy not only an elite set but from even better people. We have done business with this family for generations and we do not see that changing. More than once the Hauxwell family has been our first call when we are in a bind and they always deliver. Good people, good cattle and a good market. That is the Most of the Best. #WMFO.

LOT D: 120 Angus Replacement Heifers from Tom Walz**March 20-31 Delivery – North Platte, NE – 750lbs**

This is the first time we have offered these for sale. We are really proud to offer this front end set of heifers coming from one of the best commercial cattlemen we have ever been around. Front end set of heifers that have not been topped or sorted through and even better they are NO BRANDS to fit even the strictest of regimens for replacement heifer buyers. For fans of the program, Tom bought legendary herd sire B/R MVP dam's sire in the sale and we used him back in the program and it worked out rather well. Tom has one of the best eyes for cattle we have ever seen and we rely on him quite heavily when we evaluate our cow herd and bull sale offering. Commercial cattlemen are the smartest guys in the room when it comes to what the industry needs and when guys like Tom speak, we listen. Most of the Best here.

LOT E: 150 head Angus Replacement Heifers from Alyward Ranch**March 20-31 Delivery – North Platte, NE – 750lbs**

Happy to bring back the Alyward heifers again for our customers. This is a good working cow herd that thrives in the southern Sandhills and routinely brings in a #600 calf at weaning. No replacements have been kept and this will be the front end of the cow herd. Jeff always comes to the bull sale and routinely finds herd bulls that are some of the stoutest in the pen and these heifers reflect that kind of bull selection. We have bought and bred these heifers the last couple of years and they are routinely 92% or better bred in a short calving season. With the lowest cow numbers in history, a front end set of cows will pay for themselves very quickly.

LOT F: 70 head of Angus Replacement Heifers from Justin Homen**March 20-31 Delivery – North Platte, NE – 750lbs**

Front end set of a good cow herd that is meticulous in its culling strategies and for years have always brought in a #650 steer calf. These heifers have not been topped or sorted and will be as even and consistent as they come. They are extremely gentle, easy fleshing and very feminine in their make. They were raised in tough country and come from a cow herd that knows how to work for a living and has generations of TD/Rishel genetics running through them. Steers off this cow herd routinely weigh heavy and will be 100% choice and prime. Big, stout feeder cattle that can hit prime and females that can raise the same, Most of the Best!

**BUCKSKIN
GELDING**

One of, if not the prettiest horses we have ever sold. Out of the up-and-coming sires of performance horses Irish Pay who has sired progeny into the NFR, The American, and every other elite level in the horse industry. This horse is not only drop dead gorgeous but is also as broke as a wood watch. Drop your hand type and will work a cow, run to a cow and hit a hard stop. He has spent the last two years with NRCHA trainer and futurity finalist Jeremy Knoles who has done everything on him on the ranch from dragging calves to the fire to shipping yearlings. Gentle every day and will be one of the prettiest horses you will have ever in your pasture. These kind don't come around often. If our girls were old enough to show, this horse would never leave here. He is that kind of horse. Most of the Best. Contact Jeremy Knoles at (806) 330-1701 for more information.

Stout made ranch gelding that stands 14.1 hh. Built like a tank and really cowy. First one to meet you at the gate every time. Been used in the feedyard to ride pens, sort cattle and ship fat cattle. Jared used him here at the ranch and he was his go to when he needed something with extra cow and athletic ability to sort and pull cattle. He was used all last summer and fall to doctor fall cattle on wheat and through weaning. He is strong from the horn and great to rope on and can handle anything you get your loop on. We have rode a ton of these Sophisticated Cats and love their trainability and mind. He is out of NCHA Freshman Sire of the Year Sophisticated Catt who won \$192k NCHA and has a black type pedigree on the bottom out of an own daughter of Hall of Famer CD Olena and the legendary Freckles Playboy on the third dam. Contact Jeremy Knoles at (806) 330-1701 or Jared Cox at (308) 530-0425 for more information.

GELDING**

Sad to see this one go. He has been the varsity string with Jared since he was a three year old and has done anything and everything on the ranch you can do a horseback. He was used exclusively in the sale barn and has sorted thousands of cattle. Really, really broke for his age and he is even easier to look at with his true blue roan color. Gentle every day, you can walk right up to him in the pen and catch him and cinches up and walks right off. Drug hundreds of calves on him at the brandings in the spring and has shipped thousands in the fall. He is just an all-around, you name it he can do it gelding. Most of the Best kind of horse here. Good home only. Contact Jeremy Knoles at (806) 330-1701 or Jared Cox at (308) 530-0425 for more information.

MVP is a solidified, calving ease sire with incredible fertility and muscle. He combines conservative stature and superior fleshing ability while maintaining a smooth shoulder, superior foot quality, and genuine hip shape. Backed by some of the great B/R females, he stems from a respected performance herds in the Angus breed, and produces stout sons and productive daughters.

WE LOVE SEEING YOUR PHOTOS OF THE #MOSTOFTHEBEST YOUTH!

“WHILE WE TRY TO TEACH OUR CHILDREN ALL ABOUT LIFE, THE FARM TEACHES US WHAT LIFE IS ALL ABOUT.”

TD Angus hosted the entire McDaid Elementary Kindergarten for a day of learning about livestock and what life on the ranch looks like. The students learned about where their food comes from and how ranchers tend and care for their livestock. During the day they explored the ranch and got their hands dirty! They were able to ride “Slow Eddie”, learned how to swing a rope, crawled up and explored the cab of tractor, milked a milk cow, fed and pet bottle lambs and bucket calves, indulged in delicious and nutritious homegrown beef and even were able to experience a mock-auction, auctioneered by our very own, Westyn Wasserburger. The day was full of fun, learning and interesting questions—a day well spent. We would like to give special thanks to our crew at TD Angus, White Ranch, Becky Wise, and FNBO for helping make this day a success for our community students and their parents.

THANK YOU to our crew

Here at TD Angus, it takes a village to bring some of the most elite genetics the industry can offer from conception to turn out time. This is a grind, one that takes meticulous care and effort by all involved. We have told many people that a registered ranch is 4 times of the work of a commercial ranch and nobody could have prepared for the extra care that it takes to produce breed leading bulls for the commercial industry both physically and on paper. For that, we are forever grateful for our team for without them there would be none of this. This is the greatest team of cowboys we have ever had the pleasure of working with. If you see them throughout the year or at the sale, thank them. It is because of them that we have the most of the best. **THIS IS OUR TEAM.**

KENNY HANSON

Known by those who know the program as the boss. He is one of the greatest cattlemen we have ever had the honor of working with and we continually are asking for his advice on which sires are doing their job and which cows are doing their job in the pasture and he has taught us a lot about being a cowman. We lean on him continually for breeding decisions. He is one of the hardest workers we have ever been around, period, and he will outwork men half his age. He is the greatest breeder we have ever met and he has passed on that knowledge to not only us, but the rest of our team. He is a great representation of our program as a cowboy and as a man and he not only treats these cattle like his own, but more importantly he treats our children like his own. We would put any herdsman in any breed up against Mr. Hanson and he could teach them all a thing or two. 20 plus years of service here and for that we are grateful.

NICK KUNZ

One to not be out worked. Multiple visitors to the ranch or when Nick comes to help ship or AI all our customers comment on his work ethic. Nick was here before we bought the place and he is a staple and somebody you can always count on to get the job done and with a great attitude. He does all the night calving, by himself, and of all the cowboys we have worked with he is the best cow hand we have ever employed. In a blizzard or in any tough situation, with our backs against the wall this is the guy you want with you. He has an incredible memory and we constantly ask him about a cow and what he thinks of her and he can rattle off all of her calves by tattoo and tell me how good of a job she is doing. We trust his judgment for good reason. Nick also tags all the calves the past 7 years and he is the best we have ever seen in identifying a great one at birth. Nick does all the night calving and there is no situation he can't handle.

JARED COX

Jared and Trey have been friends and worked together for over 10 years. They have gathered cattle all over the Sandhills together and he is the guy you want when you have a big gather on your hands or any kind of cattle work. He is one of the best cowboys we have ever been around and we trust his judgement and lean on him pretty hard in terms of animal health and the performance of these cattle. We talk almost every morning and he is always honest and transparent with us about the happenings around the ranch and it is one of the things we admire about him. No matter how bad it is, he always keeps us in the loop. He can rope as good as anybody and he has taken this horse program to a new level and this year's horse sale is of it's caliber is because of him. We are very lucky to have him and his fiancé, Alex and their daughter, Clara, who frequents the ranch often, on our team.

PEYTON KOTTWITZ

Our newest member of the team and has been a great addition. Peyton has a stellar resume and pedigree to boot—she comes from great stock. She can work right alongside the boys and she really took the calving job under her wing. In one of the worst winters we have ever experienced, it hasn't been easy for a girl that might weigh 100 lbs soaking wet with pennies in her pocket. She is an outstanding cowgirl that really sits a horse well and she can rope with the best of them. Our girls love her especially and we cannot wait until warmer weather when she can take them riding. We have yet to hear her complain about anything. She will scoop bunks, clean stalls and even change a diaper! One of the kind.
