

A CENTENNIAL HERD OF EXCELLENCE — **EST. 1923**

60th *Annual*
Fall Bull and Female Sale
December 4, 2025 | Harrison, MT

December 4, 2025 | 11 AM (MST) | At the Ranch - Harrison, MT

Welcome to SITZ Angus Ranch

Hello friends! We hope this letter finds you and yours doing well. God willing, the fall has treated you with safe and efficient cattle working days, heavy weaning weights, a bit of moisture, and a few days to do more relaxing than working around the ranch.

We are pleased to invite you to our 60th Annual Production Sale! As we reflect on past sales, what stands out most is you—our incredible customers. Your loyalty, trust, and partnership over the years mean more than words can say. We understand that purchasing a bull is more than just adding to your herd. It's an investment in your future. At SITZ Angus, we want you to know that we are just as committed to your success as you are—because when you succeed, we all grow stronger together. Thank you for believing in our program, and for allowing us to play a role in the genetic future of your cow herd.

This year's fall sale is topped off with a standout group of bulls that we're truly proud to offer. This includes sons of SITZ Heritage 8732, SITZ Threshold 9901, SITZ Resilient 10208, SITZ Logo 8148, SITZ Prodigy 12000, SITZ Continuity, Spickler Architect, and Schiefelbein Top Gun, as well as several other notable herd sires, all with the same SITZ look. Developed on pasture, our bulls are carefully managed with a strong emphasis on sound structure and foot quality. As Bob Sitz Sr. used to say, "If you breed for the cow – the bulls will follow," and these bulls are the product of quality cows in the SITZ program.

Our cow herd runs in big country under tough environmental, structural, and production pressures. We manage our cow herd very similarly to our commercial customers. During the summer, our cows graze Forest Service allotments that climb to elevations of 8,000 feet. They're expected to raise a calf at their side while coexisting with grizzlies and wolves, and after they wean that calf in the fall, the cows are kept out grazing as long as possible. The SITZ cow herd is the product of a century of purposeful breeding, with females that consistently rank among the best in the breed for udder quality, fertility, production, and \$M.

The next generation at SITZ Angus is eager to support our customers in every way possible. Just as we're preparing the next generation of the SITZ family to carry on the legacy, the next generation of SITZ cattle is ready to meet the demands of the industry—today, tomorrow, and beyond. By embracing new technologies and innovations, we're better equipped to meet the evolving needs of our customers well into the future. Our participation in the Maternal Plus® reporting program, along with extensive phenotypic data collection and submission, positions us at the forefront of the Angus breed as progressive, data-driven breeders. Each of the bulls in this sale offering is supported by comprehensive phenotypic records and genomic testing, ensuring reliable, data-driven EPDs. Our mission is to provide you, our customer, with exceptional service—because, as we like to say, people don't just buy bulls; people buy from people. Our goal is to deliver bulls that go to work—siring progeny that perform and prosper across all segments of the beef industry.

Please feel free to call or visit anytime if you'd like to see the cattle or have any questions. We would be honored to have you join us for all of the sale festivities, and we look forward to seeing you on sale day!

Sincerely,

The SITZ Family

PAP Tested for Over 20 Years

Pulmonary Arterial Pressure (PAP):

Pulmonary Arterial Pressure (PAP) testing is used in cattle as a predictor of susceptibility of High Mountain Disease (HMD). There are many factors that can lead to the presentation of disease in individual animals, but the PAP test currently is the gold standard for testing genetic and environmental components of the disease as all animals with a high PAP test may not show outward signs. Sitz Angus Ranch has seen improvement in our cowherd utilizing the technology and believe if you use the PAP score in conjunction with the PAP EPD that you can put adequate selection pressure on HMD.

Key Factors in Understanding PAP Scores:

Elevation does matter: As elevation increases, the likelihood of cattle becoming hypoxic and elevating their PAP score increases. Scores taken below 5000ft are less reliable than scores taken over 5000ft as a small number of cattle are hypoxic at lower elevations. As cattle increase elevation over 5000ft, the hypoxic state of their lungs increases therefore increasing the reliability of the PAP score. The longer the cattle live at those elevations, the more reliable the test becomes. Generally, tests given to animals living at increased elevations for less than 30 days are not considered reliable. Ideally, animals to be tested at elevation will be in that environment for a minimum of 45-60 days.

Age does matter: As cattle mature they undergo many changes in their cardiopulmonary system affecting the PAP score. These changes can positively or negatively influence the PAP score. Testing of cattle at young ages should only be used as a management tool; it has more variability and less reliability and accuracy than testing of older cattle. It is ideal to test cattle that are at least 12 months old and as cattle reach 18-24 months of age there is an increased reliability of the test for that animal at that elevation. Once cattle are over 2 years of age, there is typically very little change in their PAP score unless other environmental factors have contributed to an increase. (Respiratory infections, intensive feeding programs, cardio toxic plants, etc.)

Picking your ideal animal based on PAP Score: PAP-scored animals should be evaluated in ranges rather than in specific numbers. Through testing we have found that for similar elevations many animals over a score range (2-4pts) have the same likelihood of succumbing to HMD. Furthermore the accuracy of the testing equipment is +/- 1 point. Don't let your ideal animal get away for a few points on the PAP score. If the ideal score for your elevation is a 42, consider all animals below and up to a few points above that score. Animals that score 50 and above should not be used in higher elevation settings as they are highly likely to contract HMD. Even at higher elevations there is a percentage of lower testing animals that will have increased scores and show outward signs of HMD. As the elevation increases this percentage decreases and improves the accuracy of the score.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

SITZ Resilient 10208

Reg# 19057457

Resilient has been one of the most popular sires in the breed over the last few years, siring as many sale-toppers around the country as any other sire. Resilient sires the same overall foot quality and maternal function of his sire, Stellar, with a little more carcass merit and end product. He is putting together one of the most well-rounded EPD tabulations in the Angus breed, excelling in functional traits like heifer pregnancy (HP), foot quality, and PAP, while also providing genetic improvement in traditional traits of calving ease, growth, and carcass merit. Couple that with his eye-appealing type and kind, and Resilient is truly a must-use sire.

SITZ Logo 8148

Reg# 19087441

Logo 8148 is the epitome of sustainable genetics—excelling in fertility, function, and longevity. His 13-year-old dam continues to make an impact in the Sitz program, maintaining a 374-day calving interval while being flushed as a donor and raising a natural calf every year. She posts progeny averages of 98 for birth ratio (BR) and 107 for weaning ratio (WR). We chose to carry on the Logo lineage with 8148, as he offers the same fertility and maternal characteristics as his sire while adding a little more skeleton and performance. 8148 was the top bull in the newly released Teat and Udder EPDs, defining the impeccable udders we've seen in his daughters—truly top-notch females.

SITZ LT Virtue 8092

Reg# 20345806

With tremendous respect for his highly productive dam, who has stood the test of time, remaining in the Sitz herd for 12 years with a 370-day calving interval and posting progeny weaning ratios (WR) of 111—we bring you Virtue 8092. If the old adage "Good bulls come from good cows" resonates with you, take a hard look at this no-nonsense sire group.

S Architect 9501

Reg# 19437622

We have great admiration for Architect's ability to enhance maternal profitability through his combination of calving ease, performance, fertility, and foot structure—traits that rank him as one of the top bulls in the breed for \$M. The Architect progeny are high-performing, long-bodied, smooth-made, and balanced in their pattern. His daughters excel in femininity and appear to be the productive kind.

Sire: SydGen Blueprint

Raven Republic I564

Reg# 20143727

We enlisted the services of Republic with great admiration for the overall rib shape and body mass he provides in a true calving-ease package. He is produced from the dam of Sitz Tebow—a front-pasture female at Sitz Angus Ranch. Republic offers a sensibly balanced EPD profile that allows you to maintain maternal integrity, increase marbling, and calve with ease.

SITZ Threshold 9901

Reg# 20043616

One of the best-kept secrets at Sitz Angus. If you're looking to add look and performance, then look no further! This first crop of Thresholds rose straight to the top in both performance and kind. We are excited about the future use of this great sire and his son, Apex—the Lot 1 feature bull of this offering.

300 SITZ-Bred Heifers

From the Heart of the SITZ Registered Cow Herd

Updated lot information and head count will be available prior to the sale.

The SITZ bred heifers offered are straight out of the heart of the SITZ registered Angus herd and are the mates to the bulls selling. Every year, these heifers are sought after by producers from all over the country because of the bred-in genetic power.

These heifers are moderate framed, easy fleshing, deep bodied and have the famous SITZ female look. They have all been ultrasound tested by Dr. Liam Robbins and will be rechecked prior to sale day. They will be guaranteed bred when loaded for shipment. They are all current on their shots, however the purchaser must implement their own ScourGuard® program. All health requirements will be met prior to shipping. SITZ Angus will help arrange trucking for these heifers at the buyer's expense.

All heifers sell as commercial heifers with papers available at buyer's request for a \$350 if transferred within six months and \$400 after six months. An addition transfer fees charged by the American Angus Association will also apply.

Transfer request must be made by November 1, 2026.

A complete lot breakdown will be available in early November on our website (SITZAngus.com) or mailed at request prior to the sale. Videos will also be available on all lots.

- Sorted by calving date, weight and uniformity
- Bred to leading AI SITZ calving ease sires and cleaned up with SITZ calving ease bulls
- Ultrasound tested for tight calving window
- Generations of SITZ bloodlines
- AI bred heifers will calve in January and February
- Bull bred heifers will calve in March and April

Updated lot information and head count will be available prior to the sale. Call 406-683-5277 to request the information.

Grouped in load lots. Buyer has the option to take a minimum of 10 head or up to the entire load lot.

This is just an approximate break down on the heifers. Please request an updated lot list prior to the sale or look for one sale day. We are happy to email or mail you a copy once the lot details are finalized.

**Detailed list
will be available
by November 15th on

Running-Age, Range-Ready, **SITZ-Bred Cows**

This offering of 100 bred cows of mixed ages (2017-2023) is straight from the SITZ Angus registered cow herd and bred with the same focus and commitment the SITZ program is nationally recognized for. These cows have proven themselves within our herd and we feel they are some of the top cows in the breed. They have worked for us and they will work for you! This offering has been met by our stringent criteria of fleshing ability, udder quality and the ability to raise a big calf year-in and year-out. They are bred to the same breed-leading sires that are utilized throughout our program.

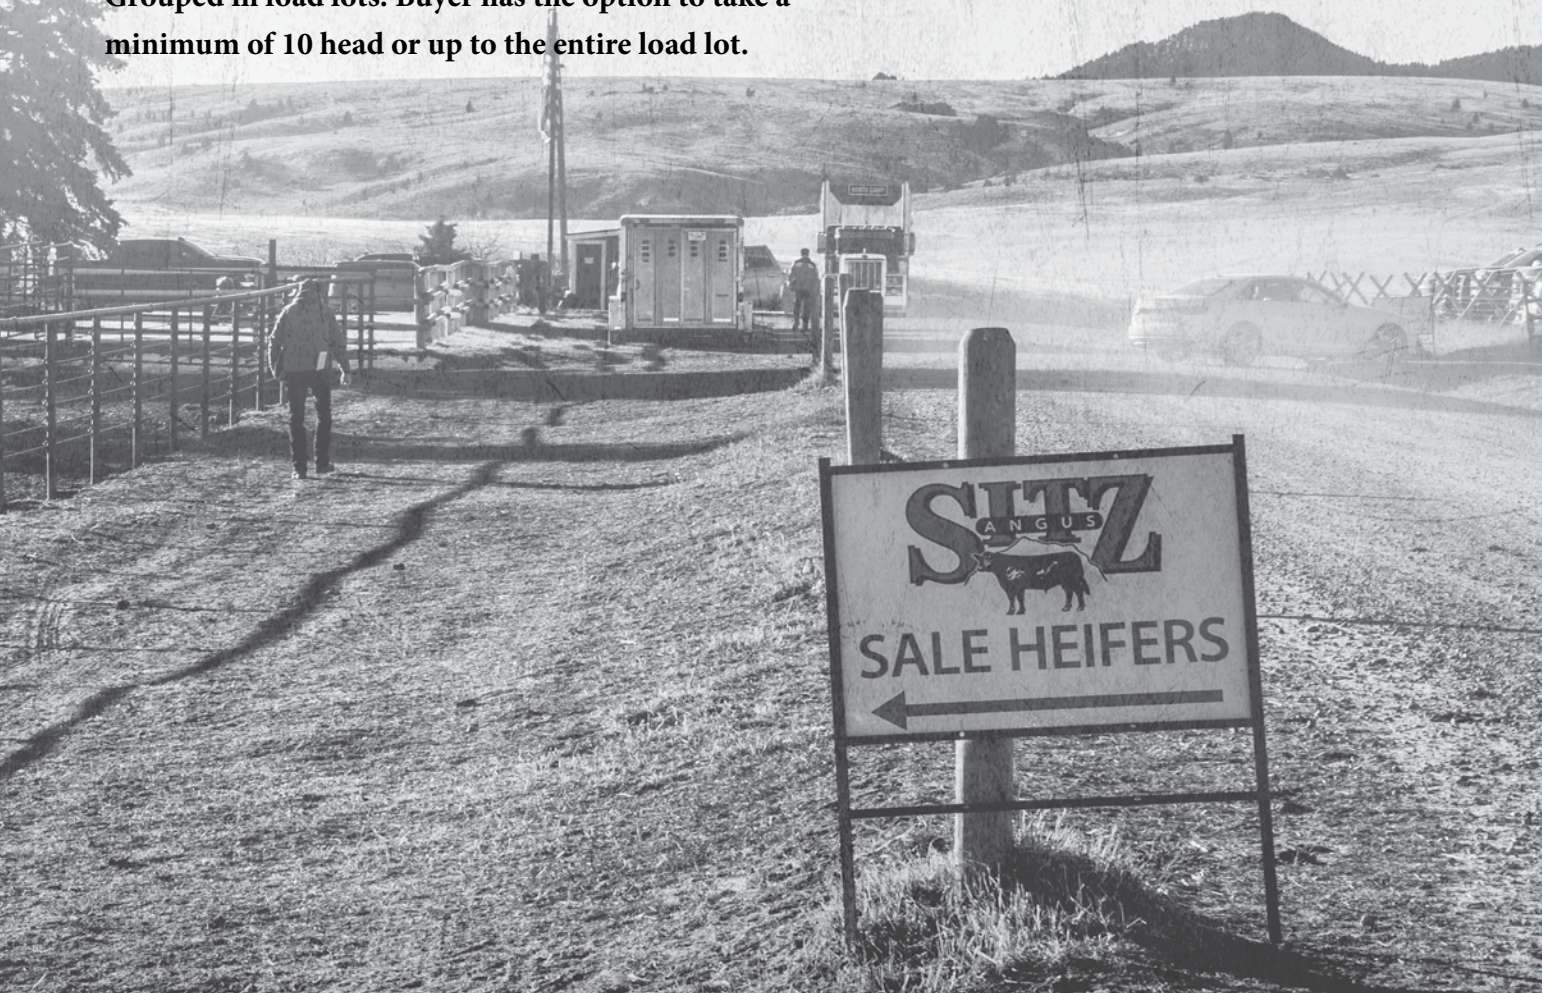

These cows have been ultrasound tested by Dr. Liam Robbins and are safe in calf and will be rechecked prior to sale day. They will be guaranteed bred when loaded for shipment. These cows are on a complete health program and all health requirements will be met prior to shipping. SITZ Angus will help arrange trucking for these females at the buyer's expense.

Grouped in load lots. Buyer has the option to take a minimum of 10 head or up to the entire load lot.

All females sell as commercial cows with papers available at buyers' request for a \$350 if transferred within six months and \$400 after six months. An additional transfer fee charged by the American Angus Association will also apply. Transfer request must be made within one year of purchase.

A complete lot breakdown will be available in early November on our website (SITZAngus.com) or mailed at request prior to the sale. Videos will also be available on all lots.
