BAR JV ANGUS

Tuesday, **March 24, 2026**

1 p.m. MDT :: Bar JV Sale Barn :: North of Sidney, Montana

Selling: 106 :: Angus Bulls
70 :: Commercial Angus Heifers

Bar JV Angus would like to welcome you to our 2026 production sale. We want to take this opportunity to thank you for your continued support and interest in our program.

We have been focused on raising functional and efficient cows for 50 years now. In reflecting on the changes that have occurred over that long, we are reminded of the fact that the environment is the biggest factor in determining the success and performance of the cattle. Unfortunately, it is also the one thing that you cannot control. Our ideal is for them to stay in the herd for many years and raise a big calf with little maintenance. We are proud of the fact that we have numerous cows that are ten plus years old and are still productive, proving longevity and performance in our herd. With all the new technologies available to us, our selection criteria continue to remain the same. We put an emphasis on calving ease, length and bone in our cattle along with good feet and udder quality.

A little about this year's offering of bulls. I know every year it is said this is the best set we've ever raised. Well, I'm not going to lie, we really feel like this bunch is that good. They are very uniform and you will find good bulls from the beginning all the way to the end of the sale. The herd bulls we are using right now are doing an outstanding job for us. You will find some new bloodlines to complement the sires that we've been using. We are leading off the sale with a pair of 3/4 brother Eternity sons that are very impressive. Their dams are picture perfect cows with superb udders and near perfect feet. If you have time, come early and check out the dams to all the bulls selling. We believe in the cattle we are raising and stand behind them 100%. This year we will sell about 40 head of replacement heifers straight out of the registered herd. These heifers will make a nice set of mother cows. Papers are available for \$200/head. We will also have 20-30 head of heifers from our commercial herd. This will be the top of the heifers as we don't retain any for ourselves. We would love to have you come and check out our operation and look forward to the opportunity to visit with you about your individual needs for your herd.

We worked with Derik Pierce and Colton Oney of Anipro to develop our feed ration for us again this year. We fed the bulls a high roughage ration consisting of alfalfa, grain hay, silage, whole corn and oats in our own feedlot here at the ranch. We choose not to push our bulls on feed. We want them to gain about 2.75 to 3 lbs./day. This ensures that they will last for many years. Flax-Lic tubs are also offered to improve semen quality.

Our bulls are fertility tested by Dr. Gary Scheiber of High Plains Veterinary Clinic in Sidney, MT. A supplement sheet with yearling weights and scrotal information will be available on sale day. All bulls have been DNA tested with Zoetis HD50K test. We expect these results to be available on sale day. We encourage you to go to www.barjvangus.com to view videos of the bulls.

You are welcome to come by the ranch anytime to evaluate the bulls, heifers or the cows. We would love to show you our operation and offer help with selections. We are always happy to discuss any questions you may have about our program or the cattle. If you are unable to attend, please do not hesitate to call us or one of the representatives to help you with bull selection or your bids. The sale will be broadcast live on Northern Livestock Video Auction. You have the option to register and bid with them as well.

If you are interested in assistance marketing your calves, Dale is a representative for Northern Livestock Video Auction.

Thank you for your continued loyalty. We value your trust and confidence in us here at Bar JV Angus. We look forward to seeing you on sale day.

The Vitt Family,

Jim and Loretta :: Dale and Jill :: Cody and Sierra

Guarantee

Bar JV Angus are providing a first-year breeding season guarantee on all bulls selling for \$3,000 or more. Breeding season is defined as the 90-day period following turnout. While we do everything within our power to ensure the bulls are sound breeders, sometimes things happen. If a bull is found to be an unsound breeder, a replacement will be provided if one is available. Otherwise full credit will be given in the following year's sale. Other injuries will be covered 50% of the value of the bull less salvage value to be used the following year. All injured bulls must be diagnosed by a licensed veterinarian. The owners reserve the right to have our vet inspect the injured bull. Please notify the owner as soon as possible should injury occur and prior to the bull being sold for salvage. The guarantee does not cover any treatable condition such as foot rot, pinkeye, etc. If neglect by the owner is shown on a treatable injury, no credit will be given. All claims must be made by September 30.

Liability:

All persons who attend the sale do so at their own risk. Bar JV Angus assumes no liability, legal or otherwise, for any accidents which may occur.

Registration Papers

All bulls selling are registered. Papers on the bulls will be transferred upon request.

Bar JV Angus reserves the right to retain a 1/3 semen revenue sharing interest in any of the bulls selling. Full salvage value belongs to the buyer. If the seller would wish to collect semen on any of these bulls, it would be at Bar JV's expense and the buyer's convenience.

Fertility and Physical Exam

Complete breeding soundness exams and semen evaluations have been conducted by High Plains Veterinary Clinic. Exam reports are available for inspection. Yearling information, scrotal measurements and ultrasound data will be available sale day.

Crew Out Back:

Logan Kjos, Casey Denowh, Tyler Thiessen, Kelly Vitt,
Shawn Shipman, Jim Buckley, Colin Gartner,
Alex Young, Josh Smith, Alex Villareal

Delivery:

Free delivery for the first 750 miles. A \$100 credit per bull will be given if you take your purchases home with you sale day.

Heifers are responsibility of buyer as soon as sold. If you need help with trucking we can be of assistance.

Sight-Unseen Purchase Guarantee

Buyers unable to attend the sale may call or send their bids in to Dale or Jim or any of the representatives listed. If the bull(s) purchased are not as presented, the purchased bull(s) can be returned to the owner at no cost to the buyer.

EPDs:

The EPDs are current as of February 14, 2026.

American Angus Association Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

FOOT SCORE

Claw Set (Claw), is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle), is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass traits where the units of measure are in trait format and analyzed on an age-constant basis.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on \$W increases weaning and maternal milk traits while increasing mature cow size.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.

COMMERCIAL HEIFERS

Bar JV Angus Heifers

40 Head Commercial Angus Heifers

These heifers are right out of our registered herd. They have the same sires as the bulls in the sale. They will have a prebreeding shot and will weigh 750-800 pounds by sale day. Papers are available for \$200/hd. These heifers are not branded.

Bar JV Angus Heifers

30 Head Commercial Angus Heifers

These heifers come out of our commercial herd and are sired by our bulls. We don't keep any heifers back – this is the top end. They will have a vibrio/lepto shot and should weigh about 750# by sale day. There are no brands on these heifers.

The heifers will sell before the bulls.
