Terms - Cash

All cattle will sell under the current terms and conditions of the American Angus Association.

Liability

All persons who attend the sale do so at their own risk. Hinman Angus LLC, Dave & Yvonne Hinman, William & Heidi Luloff assume no liability, legal or otherwise, for any accidents which may occur.

Trucking

Free delivery on bulls to CENTRAL POINTS (stockyards, etc) within 1000 miles, or the nearest Canadian border, on purchases of \$3000 or more. We will refund \$50 per bull on any bulls picked up sale day or within the next four days after the sale.

Bids

Sight unseen satisfaction guarantee. Call Dave or Billy prior to sale day to discuss your requirements; that will help us purchase the bulls you need.

Volume Discount

A 10% discount will be given on 10 or more bulls purchased by, transferred and delivered to one buyer.

Sale Order

Fall Bulls will sell first, followed by Lot 1 and the remaining bulls in catalog order.

EPDs

EPDs current as of February 26, 2016. Updated EPDs at www.angus.org

Bulls Born After March 14, 2015

Yearling information and actual scrotals on younger bulls will be available sale day.

Marketing Alternatives

Hinman Angus is in contact with several feedlots, order buyers and marketing consultants in order to create innovative marketing opportunities for our customers. Contact us for details.

Cattle Available For Viewing

The cattle are fed at Hould Feedlot southwest of Malta and can be seen there anytime until the weekend before the sale, at which time they are moved to the ranch.

Calving Ease Explanation

☉ - Recommended for Cows

☉☉ - Moderate Calving Ease, recommended for use mostly on cows

☉☉☉ - Superior Calving ease, should work well with most heifers

☉☉☉☉ - Excellent calving ease, use on first calf heifers

Retained Interest

Hinman Angus is retaining 1/3 semen revenue-sharing interest in each individual bull in the sale, unless otherwise announced from the block. Natural use and salvage value belong to the buyer.

Herd Health

We have an excellent whole herd health program with the help of Dr. Rick Levesque. All bulls have been tested for BVD and have had 2 shots of Fusogard.

First Year Loss of Use & Mortality Insurance

Hinman Angus is offering to pay 1/2 the cost of a full year policy covering mortality and loss of use on the bulls. The total cost of the coverage is 10% of the purchase price to be split between Hinman Angus and the buyer. Request for insurance must be made sale day to be eligible. We think this is a very fair and complete coverage and it will be the only insurance offered on the bulls. (See page 6 for more details)

AM, NH, CA, M1 and DD Guarantee

All sale bulls are pedigree free or have been tested free of these defects.

Fertility & Ultrasound

Bulls were semen evaluated and scrotal measured by Dr. Roger Baxter, and Dr. Brock Aiton, DVMs on February 24 and scanned by Sonja Gregory on February 3.

Dear Friends,

This has been a year with numerous highlights at HA, beginning with the best bull sale we have ever had. We were also extremely pleased when Ty left his other job last spring and came to the ranch full time. Yvonne and I celebrated our 50th Anniversary by taking our family to Glacier Park for a few days, which we all enjoyed very much; everything from floating the river to playing cards half the night, a good time was had by all. In the fall we were blessed with the birth of our first 'great' and Billy and Heidi's first grandson, Tavi William Luloff, who we are all very proud of.

Whenever I pick up a magazine, it seems that 'efficiency' is the new buzz word in the industry. HA has been all about efficiency for many years, but not only in cow size. We want our cows to be small enough to be efficient but large enough to have the feedlot efficiency that our industry requires. Real efficiency is measured in many different ways. We think this year's bulls are in line with our goals of efficiency in all areas more than ever. Real substance is a trait we cannot get too much of and it is sometimes over looked. Breeding the perfect animal is like trying to catch the end of the rainbow, it won't happen. But we will keep trying! By balancing all areas of production constantly, we will get closer.

We would again like to thank Bruce and Linda Hould, along with their great crew, who do such a terrific job of feeding and caring for our bulls. Bruce is constantly perfecting his tireless drive of feeding the bulls to maximize their ability to hold up to the rigors of breeding. Drive into the bull center anytime to view the bulls or give us a call and we will meet you there. We are always happy to talk about the cattle, so if you have any questions, don't hesitate to call.

All of us at Hinman Angus thank you for your past support of our program; we appreciate it and are pleased our bulls have worked for you. We invite you to join us for a presale dinner on April 4. Come that afternoon to view the bulls and visit with cattle people from all different parts of the country. Again, we look forward to greeting our friends and meeting new ones at sale time.

Sincerely,

Dave & Yvonne, Billy & Heidi

Dave and Yvonne

Billy & Heidi

Ty, Sascha & Tavi

Better bull buying – GE-EPDs and percent ranks powered by HD 50K from Zoetis

The more cow-calf producers know about the bulls they buy, the more they can take advantage of the genetic forces—selection and mating—that drive the productivity and value of each calf-crop. With genomic-enhanced expected progeny differences (GE-EPDs) and percent ranks powered by High-Density (HD) 50K from Zoetis, commercial users can unlock the power of these forces like never before.

The value of HD 50K

HD 50K for Angus includes genetic predictions in the form of percent ranks for 19 traits plus parentage verification. For most of these traits, Angus Genetics, Inc. (AGI) computes and reports weekly GE-EPDs powered by HD 50K, which are the most accurate genetic predictions possible for young bulls with limited or no progeny. The resulting EPD accuracy is generally equivalent to tested bulls having an initial progeny proof of roughly a dozen calves/carcasses/daughters with performance data contributing to their EPDs (ranges from six to 22 progeny, depending on the trait – Table 1). Increasingly, Angus bull buyers are demanding tested bulls (Figure 1).

HD 50K percent ranks, interpretation for non-GE-EPD traits

HD 50K percent ranks from Zoetis are currently based on a reference population of nearly 40,000 tested Angus animals. Ranks range from 1 to 100, with lower numbers generally favored for most traits (Table 1). Some traits for which HD 50K percent ranks are available do not yet have GE-EPDs. These include ranks for residual feed intake (RFI) and end-product tenderness (Tend).

Percent ranks for RFI provide Angus bull buyers with added feed efficiency information, while ranks for Tend explain approximately one-fourth of the genetic differences in this component of eating satisfaction!

Selection – Better bull buying for specific purposes

Higher accuracy GE-EPDs and more complete trait information from HD 50K percent ranks help Angus bull buyers more dependably select bulls for specific purposes, including:

- **Heifer bulls** – GE-EPDs for calving ease direct (CED) and birth weight (BW) have accuracies roughly equivalent to bulls with 22 and 12 progeny, respectively, with calving ease and birth weight data recorded (Table 1).
- **Growth/carcass bulls** – GE-EPDs for growth (WW & YW), feed efficiency (RADG) and carcass merit (CW, Marb, RE, Fat) have accuracies that are basically equal to bulls having 21, 17 and 10 progeny/carcasses, respectively, with performance data recorded (average of trait groupings from Table 1).
- **Maternal bulls for making replacements** – GE-EPDs for scrotal circumference (SC), docility (Doc), milk and mature size (YH and MW) deliver the rough equivalent accuracy of bulls having 12 daughters with performance/productivity information recorded for these traits (average of trait groupings from Table 1). Percent ranks from HD 50K for heifer pregnancy (HP) and calving ease maternal (CEM) provide information for these important maternal traits.
- **All-purpose bulls** – Across all applicable traits, GE-EPDs powered by HD 50K have accuracies that are approximately equal to bulls with a dozen progeny/carcasses/daughters with recorded performance (average of all traits in Table 1).

Mating

Besides selection, mating is the other genetic force that drives production. More accurately evaluated bulls may be more strategically matched with sets of females to accentuate strengths and correct weaknesses—creating more valuable progeny, carcasses and replacements. This is especially true if commercial Angus females are tested with GeneMax™ and genetic information, and assigned Angus sires are used for selection and mating (see www.genomexchange.com).

As well, HD 50K-verified parentage improves the accuracy of EPDs and the precision with which commercial producers can minimize inbreeding. It also reliably documents relationships to tested sires and dams that are proven to be free of known genetic conditions.

Summary

Angus bulls with more accurate and complete GE-EPDs powered by HD 50K from Zoetis can more dependably be selected and matched with females for specific purposes to produce progeny with increased productivity.

American Angus Association® Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which an sire’s calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire’s ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

CARCASS

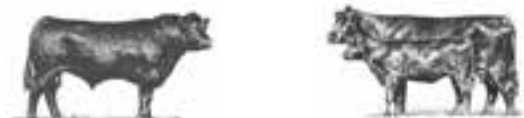

The new carcass EPDs are calculated from an integrated analysis of the Angus Herd Improvement Records (AHIR®) carcass and ultrasound phenotypic databases. The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire’s progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire’s progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire’s progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire’s progeny compared to progeny of other sires.

MATERNAL

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire’s daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire’s daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Welcome to the annual Hinman Angus bull sale. Each year breeders across the country claim that this year's offering is the greatest they have ever raised; in the case of the 2016 offering at Hinman Angus, it just might be true. I know the family is extremely proud of this class of bulls and well they should be; to raise a set like this takes a lifetime of dedication. Dave and Billy know that at the end of the day on April 5th, their peers will be the ultimate judge and jury, and it is their assessment that will tell them where this year's sale offering ranks among the 28 sets that have come before them.

Dave and I have a lot of conversations about bulls and I believe if you cut to the core of all those talks it comes down two major traits, Performance and Maternal. It is those two traits that define a cow herd. To prove that point, check out Lot #1; without generations of proven producers in the pedigree, this bull is not created. Performance and Maternal - the hallmark of a great herd.

If we can answer any questions about the upcoming sale please give us a call.

Ron Frye
406-600-7514

Bull Mortality and Loss of Use Insurance Coverage

Hinman Angus has arranged for PayneWest Insurance Agency to make available Mortality and Loss of Use Coverage for bulls sold in their sale on April 5, 2016.

Coverage

- 12 month policy term
- 100% payout for mortality
- 80% payout for loss of use claims

*Protect Your
Investment!*

Premium is 10% of the purchase price of your bull(s)

Buyer's share is 5% - Hinman's share is 5%

Hinman Angus will pay one half of the premium and the buyer will be responsible for the other half. Buyer's share will be added to the cost of the bull(s) upon settlement on sale day, if insurance is purchased.

This is the only insurance that will be offered on the bulls.

*Tom Holland, PayneWest Insurance Agent,
will be available sale day to answer any questions.*

See page 46 for more information on this insurance

Owned by Hinman Angus, Rollin' Rock, Bodner Angus, Boylan Angus, Witte Angus. Leased to ABS.

Image Maker has been a standout from day one. He was the high selling bull in the 2001 Performance Breeders Bull Sale; his EPDs were BW +2.8, WW +34, Milk 28, YW 54. Since that time his progeny have excelled him to his present numbers with high accuracy as one of the best spread bulls in the industry.

Image Maker has been used very successfully in large heifer projects all across the county. He sires extra length of body, with heavy weaning weights and extra feedlot growth along with outstanding daughters that have exceptional fertility with good udders and are very easy to be around.

0415 is homozygous for tenderness markers and homozygous SNP 530, an additional indicator of tenderness. 0415 is among the top 1% of the bulls in the breed for WW. Image Maker daughters are truly foundation females that have the unique ability to work with a wide variety of pedigrees.

Image Maker sons have also been used in many herds across the country with the same consistent results as their sire.

0415 is in the top 1% for \$W index. As you go through the catalog, you will notice many Image Maker daughters who, with their steady production of superior progeny, have made a major impact on our cowherd.

Image Maker died at home on the ranch in June 2013. His tremendous influence will live on for many generations at HA, as well as on farms and ranches, in both registered and commercial herds across our great country. He truly is **A Bull that will Keep You in the Cow Business!**

Owned by Hal & Lois Schudel, Hinman Angus, Austin Angus, Bakers LeMar Angus Ranch, SoDak Angus Ranch and ABS

Program was the high selling bull in the Performance Breeders 2006 sale, going to Hal & Lois Schudel, OR. Program is a unique spread bull that excels in all areas of production, maternal and end product traits.

Program calves have heavy weaning weights along with explosive feedlot growth. Program daughters have nearly perfect udders, with small teats and excellent front attachment, along with outstanding fertility. His daughters look like they will have very high longevity traits. They also are very good mothers with good dispositions.

Program continues to leave his mark at HA by siring sons and daughters that are very balanced trait cattle excelling in all aspects of production. When it is all said and done, Program daughters are leaving a huge impact at HA.

Semen Available

We have semen for sale on most of our bulls. Please call either Dave or Billy to inquire about it.

Owned by Hinman Angus, KG Ranch

High Regard was the high selling at the 2013 KG Ranch sale. He was one of those bulls that you just couldn't get away from, with his length of body and muscle shape blended in a structurally perfect form. He was just what we were looking for. High Regard is siring bulls and heifers with that stylish form along with true calving ease and strong performance. 2073 sons have big ribeye areas, along with good scrotal size. High Regard offers a complete outcross pedigree. His daughters have a very feminine look in a high volume package. High Regard sons and daughters are adding a new dimension that we are very excited about.

Bismarck sires very thick, deep sided, big scrotal, moderate frame sized bulls. Bismarck is a calving ease sire whose progeny show exceptional performance at both weaning and yearling. Bismarck is an outcross sire to our program that has matched up very well in all areas.

Our Bismarck daughters have awesome dispositions along with near perfect udders. We will have many more Bismarck progeny in the future.

Owned by Hinman Angus and Arntzen Angus

HA Outside 3008 was our high selling bull in the 2014 sale going to Arntzen Angus Ranch. 3008 was a very balanced bull in all areas and we used him successfully on both cows and heifers. 3008 progeny are thick made, wide topped, deep sided, long bodied, beautiful patterned cattle, in a moderate frame. 3008 has done everything we hoped he would and more. 3008 met an untimely death but we will continue to use the small supply of semen we have left. 3008's dam is becoming one of the best cows on the ranch.

Xtra X was our pick of the 2011 spring Vermilion sale. He showed that eye-catching look and he is passing on that smooth, long, shapely kind. X is siring big ribeye, high performance sons, that in turn will sire calves that will push the scale down and then have excellent feedlot performance and quality end product. We will use Xtra X heavily at HA.

The Xtra X first daughters have awesome udders with a lot of milk and look to be very good cows.

Owned by Hinman Angus and U2 Ranch, Alberta

HA Prime Cut 4493 was the high selling bull in our 2015 sale to U2 Ranch at Coaldale Alberta. 4493 is a very balanced trait bull that excels in all areas of production. It looks like 4493 will be a true calving ease bull that you can use on heifers with great confidence. With his ability to do everything very well, 4493 offers a complete package in a manageable frame size, along with sound structure and good feet. We will have over 70 Prime Cut calves this spring; he is a young bull that we will continue to use as we like what we see.

- When you stack a pedigree generation after generation with some of the best cows we have ever owned, it is very exciting to see the results. **HA Cowboy UP 5405** is a performance power house.
- He is in the top 1% of the breed in seven traits: WW, YW, RADG, CW, \$W, \$F, \$B.
- His dam's (#1602) record is 3 NR@ 119 and 3 YR@ 114.
- Grand dam 5515 has 9 NR@ 103 and 7 YR@ 103.
- Great grand dam 3833 was 7 NR@ 102 and 7 YR@ 102.
- The great-great grand dam was HA Rito Blackcap 9038, who produced over 200 progeny, including HA Image Maker 0415.
- HA Outside 3008's dam (#1575) has 3 NR@ 105 and 3YR@ 103 and is becoming one of our very top cows.
- The 8066 cow has 5 NR@ 104 and 4 YR@ 104, along with four daughters retained in our herd.
- The next cow back was HA Rito Lady 4167, who at the time we sold her, was the high ribeye area cow of the breed; she is also the dam of HA Power Alliance 1025.
- Two other notable animals in this pedigree are the dam of the 0210 cow, GDAR Forever Lady 9163, who was unquestionably one of the strongest daughters of DHD Traveler 6807.
- The paternal grand sire to the dam of Cowboy Up is HA Program 5652, who has left us with some of the most outstanding females in our herd.
- Cowboy Up has more growth performance than any bull we have ever produced and is also extremely docile.
- 5405 is as wide topped, deep sided, long bodied, wide based kind of bull as you will find.
- I named his sire Outside because he looked like he would sire progeny that could live outside in the big country and excel in all the traits that keep ranchers in business. This strong group of Outside sons looks like he has lived up to our expectations. The name, Cowboy Up, just kind of fits, as this bull has done everything we could have hoped for and more. Balanced trait qualities at their best.

We will start the High Regard group with this very complete, low birth, high growth bull. Double 07's dam is a moderate sized, perfectly made, beautifully uddered first calf heifer that bred back AI for her second calf. Top of the line performance along with very high carcass traits. Very interesting bull with unlimited potential.

Ag Ed Day at HA Sale Barn

A few years ago, we had an idea to host a field day for area school children to help them learn the importance of agriculture in their every day lives. With the assistance of PC CattleWomen and the Extension Office, we met with the Malta school administration to discuss our idea, and it became a reality. With additional help from teachers, FFA, 4-H, PC Stockgrowers, the local museum and several businesses, as well as many individuals, the day has become a success. It includes a pretend animal auction, seven varied learning stations and a cheeseburger lunch. These pictures are from September 2015, when we hosted Malta grades 1-5 and had over 235 students, teachers and volunteers.

I think 5118 could be one ripping good bull. His high producing dam is the mother of HA Outside 3008, who has sired an outstanding sire group that excels in performance, length, substance and are structurally very correct. 5118 is a wide topped, long bodied, big ribeye, high performance bull. We have flushed 1575 one time each of the past two years and have gotten her bred back AI each time. 1575 is a very structurally correct cow with a near perfect udder and that smooth made stylish look. We will use this bull in our program.

Heavy weaning heifer bull with strong marbling ability.

Why So Much Emphasis On Bulls?

Bulls have the greatest economic impact on any breeding program, thus bull selection is among the most important decisions and investments a cowman will make during the course of the year.

Scientists have long postulated that over 80% of the improvement in a herd over time is directly attributed to bull selection.

I really like this bull. Heavy weaning, high performance with low birth CED. 9255 was an awesome cow that we lost in the ditch bank. She had some real growth power, along with true calving ease in a very efficient package. Neat bull that could be really good.

Fall Born Bulls

The Fall Bulls will sell first in the sale.

We will start the sale with the Fall Bulls Lot 199, and then go to the Yearlings starting with Lot #1 and they will sell in catalog order. We like the fall program and continue to grow it each year.

NEW LABEL CLAIM Calves nursing Express® FP-vaccinated cows can now be vaccinated with Pyramid® 5 + Prespense® 5U.

IT'S CLOSING TIME FOR REPRODUCTIVE DISEASES.

Express® FP is specifically designed for cow herd protection against key reproductive diseases such as IBR and BVD. EXPRESS FP is backed by a solid foundation of proven performance that you can count on. A better vaccine means healthier cows, heifers and calves, which means the opportunity for growth is wide open.

EXPRESS® FP

Prevention Works does not imply prevention label claims for use of a vaccine/vaccines.

PREVENTION WORKS.
