SITZ *Angus*

51st Annual Fall Bull Sale

We welcome you to our 51st Fall Bull and Heifer Sale. We wouldn't be here without you, our customer. Thank You!

We at SITZ Angus are excited about the cattle industry. This year, Certified Angus Beef will sell over a billion pounds of beef. What an accomplishment! With the welcomed news that China has opened its markets and will again trade with the U.S., we are hopeful the market will rebound.

At SITZ Angus, our main goal is to add value to your operation. Our program is focused on balance and efficiency. We run our cowherd much like a commercial operation with little to no pampering. Our cow/calf pairs summer around 6,000 ft on forest permits much like many of our commercial customers. They return home and run on winter pastures until the snow runs us out.

SITZ bulls are weaned on grass then developed in the feedyard on a modest gain ration, returning to grass pastures throughout the summer to develop as nature intended. We strongly believe pasture grazing enhances the overall soundness and efficiency of the bulls, which in turn improves your bottom line. With production costs on the rise, we realize one of the most important economic decisions you will make is your bull selection; it is vital to the profitability of your operation. We offer tools like PAP testing and genomic enhanced EPDs to help you make the most accurate and profitable decision. Our program has not wavered for 93 years with the same goals in mind to provide you with top quality, functional cattle that meet industry needs.

We are offering 440 coming 2-year old bulls that are solid, functional, and fault free. We are proud of this offering and are confident these bulls will work for you and we will stand behind them 100%. We are also offering 350 Commercial Bred Heifers and 120 Commercial Bred Cows straight out of our purebred herd. Many of these females are mates or mothers to the bulls selling. They have worked for us and they will work for you. All bred to some of the industries best sires and cleaned up with top end SITZ bulls.

We are humbled by your continued confidence in our program and are proud to be your seedstock source. We don't take this opportunity lightly and we are committed to offering you the very best genetics. If we can assist you in any way, please don't hesitate to call. The cattle can be viewed at the Harrison ranch at anytime. This year's sale will be broadcast on Northern Video and can be viewed on channel 998 of Dish Network. Please join us for the presale dinner and entertainment at the ranch on the eve of the sale. Thanks again for your support, hope to see you sale day.

Sincerely,

The Sitz Family

Utilization of the PAP Measurement For Sitz Angus Elevation 5,000 Feet

Clinically, the pulmonary hypertension seen at high altitude and the severity of clinical High Mountain Disease (HMD) appear to have a significant individual variability. Some cattle appear to be prone to developing congestive right heart failure, whereas others live at high altitude with a documented elevated PAP and never have a clinical problem. It is of major concern that even though these animals may not develop clinical HMD, they still pass the genetic predisposition to their offspring. These types of animals tend to be the most costly to the rancher who is not performing PAP testing. This variable expression of clinical disease and the variable penetrance of the gene makes PAP testing challenging at all elevations and becomes an even greater concern at lower elevations (5,000 ft.).

The hypoxic conditions needed to stimulate a pulmonary response are not seen until approximately 5,000 ft. It is for this reason that PAP measurements taken at low elevations (less than 5,000 ft.) are not used as a positive selection tool but only to identify those animals that are sensitive to hypoxic conditions and hypertensive at these lower elevations. Cattle moved from low elevations to high elevations should remain at the altitude for a period of 3 weeks or more to PAP test accurately for adaptation to high altitude. Hypoxic pulmonary changes have been seen immediately in cattle as they have been moved to high altitude. However, to test most accurately those that are to be used for breeding, a longer stay at high altitude before PAP testing is recommended.

In practicality, it is important for the rancher to know at what elevation the PAP measurement was performed because it has been shown that the PAP measurement increases as the animal is moved or travels to higher elevations. It is not uncommon to see clinical HMD in animals that have a PAP measurement of greater than 49 mmHg. Based on repeated PAP testing of animals at different altitudes, it has been observed that the PAP measurement increases 1 to 2 mmHg per 1,000-ft. rise in elevation. Therefore, a rancher can predict what a purchased animal's PAP measurement might be at the elevation of their ranch if the PAP measurement was taken at a lower altitude. For simple guidelines to the rancher and veterinarian, an animal should be tested at an elevation of at least 5,000 ft. The higher the elevation, the more accurate and reliable test results will be.

In Summary:

1. Guidelines for the rancher and veterinarian contemplating PAP testing should include:
Test cattle at an altitude of at least 5,000 ft.
2. **The higher the altitude, the more accurate and reliable test results will be. Any PAP measurement taken at or near 5,000 ft. should be utilized only as a screening tool to eliminate extremely susceptible animals before they are taken to altitude rather than for genetic selection. Cattle tested at elevations at or less than 5,000 feet should always be retested at elevation if they are intended for breeding purposes.**
3. Testing cattle less than a year of age should be done only as a screening tool to eliminate extremely susceptible animals. PAP measurements in young cattle are not always predictive of PAP measurements as adults. It is advisable to retest these cattle at high altitude and after 12 months of age. This is especially important for cattle that will be used as breeding stock. The accuracy of the test does increase with the age of the animal up to 18 months of age. At this time it appears as though the PAP score is stable related to age.

4. Summary Statement:

PAP measurements taken at or near 5,000 feet elevation appear to have around a 70% accuracy level. This means that this score is utilized in directing the buyer which animals to avoid for use in high elevations (PAP Measurements >49). Since the accuracy is around 70% this, in turn, means that 30% of the low PAP measurements have potential of increasing once the animal is moved to a higher elevation. It is recommended that any animal being tested at lower elevations should be retested after 3-4 weeks at the elevation in which the animal will be used.

BULL MANAGEMENT AND DEVELOPMENT

Throughout calthood our bull calves while nursing their mothers are summered on high mountain pasture, they receive no creep feed as calves. At weaning our bull calves are weaned on pasture utilizing our field aftermath from Oct 1—Nov 15. They are then brought into the feed yard as a healthy weaned bull calf and fed a growing ration to gain 2.75-3 lbs./day. They remain in the feed yard and are evaluated amongst their contemporary groups until the end of May. While in the feed lot the bulls are fed a low starch ration consisting of grain silage, alfalfa, grass hay, straw, grain by-products and a customized vitamin mineral pack. They are fed in such a way that their genetic potential can be expressed, while always maintain structural integrity and overall animal health. They are then turned out on summer pastures as yearling bulls to further their development on pasture as nature intended, thus increasing structural soundness. While on grass the bulls are on a complete mineral supplement. In September the bulls are brought back into the feed yard as long yearling bulls where they will remain until sale and fed a high roughage ration to gain 2.5-2.75 lbs./day. The bulls are weighed multiple times, DNA parentage tested with genomic enhanced epd's, semen tested with scrotal measurements, and PAP tested for altitude, as well as visually appraised and scored for multiple traits.

350 BRED HEIFERS STRAIGHT OUT OF SITZ COWHERD

The Sitz Bred Heifers selling are straight out of the Sitz registered herd. They are the heifer mates to the bulls selling. Every year, these heifers are sought after by producers from all over the country because of the bred-in genetic power. The heifers are moderate framed, easy fleshing, deep bodied and have the famous Sitz female look. The heifers have all been ultrasound tested by Dr. Chuck Gue and Travis Cline and will be rechecked again prior to sale and are guaranteed bred when loaded for shipment. They are all current on their shots, but purchaser must implement their own scour guard program. They will be sorted by weight and similar calving dates to make lots as uniform as possible. They will be broken down into load lots and the purchaser will have the option of taking a minimum of 10 head or up to the entire lot. Sitz Angus will help arrange trucking for these heifers at the buyer's expense. All health requirements will be met prior to shipping. A complete lot breakdown will be available on our website or mailed at request prior to the sale. Videos will be available on all lots.

ALL HEIFERS WILL SELL AS COMMERCIAL HEIFERS WITH PAPERS AVAILABLE AT BUYER'S REQUEST FOR \$250 + TRANSFER FEES ABOVE PURCHASE PRICE. TRANSFER REQUESTS MUST BE MADE WITHIN A YEAR OF PURCHASE.

- Lots 1-3 are safe in calf to the AI sires Sensation, Dividend, Powerball, Atlas, Investment, Rampage, Commando, Broken Bow
- Lot 4 are bred to Logo, Powerball, Commando, and Sitz calving-ease bulls
- Lots 5-9 are bred to low birth weight Sitz calving-ease bulls

120 BRED RANGE READY COWS STRAIGHT OUT OF THE REGISTERED COWHERD

ALL COWS WILL SELL AS COMMERCIAL COWS, WITH PAPERS AVAILABLE AT BUYERS REQUEST FOR \$250 + TRANSFER FEES ABOVE PURCHASE PRICE. TRANSFER REQUESTS MUST BE MADE WITHIN A YEAR OF PURCHASE.

This year's sale will feature 100+ bred cows of mixed ages straight from the Sitz Angus Ranch registered cowherd and bred with the same focus and commitment the Sitz program is known for. They are bred to the same breed leading industry sires that are utilized within the Sitz program. The maternal strengths of the Sitz cow herd has become nationally recognized and sought after by many top breeders. These cows have proven themselves at Sitz Angus Ranch amongst some of the top cows in the Angus breed. They worked for us and they will work for you. These cows have met the stringent criteria of fleshing ability, udder quality, and the ability to raise a big calf year in and year out. These cows were all pregnancy ultra-sounded by Dr. Chuck Gue and Travis Cline and will be re-pregnancy checked prior to the sale. The sale offering will include running age cows aging from 2008-2013 sorted by weight and similar calving periods. All cows are on a complete herd health program. Delivery arrangements will be made on females after sale at buyers expense. A complete Lot breakdown will be available on our website or mailed at request prior to the sale. Videos will be available on all lots.

Upcoming Herd Sires

Logo

SITZ Logo 12964 | Reg # 17746620

Logo was the high selling bull in the 2015 Fall Sale, selling for \$100,000. Logo was admired by many for his impressive phenotype, displaying a tremendous rear quarter, bold rib shape, and extra base width, all in a calving ease package. Logo's mother is one of the great young donor cows in the SITZ program. Logo was used heavily in the SITZ AI program this spring. Semen available through SITZ Angus Ranch.

Asset

SITZ Asset 402C | Reg # 18220552

Asset was a crowd favorite and one of the top sellers in the 2016 Spring Sale. Asset has seen heavy use in the SITZ AI program this spring due his impressive phenotype, pedigree, and sound feet and legs. Asset's dam has proven herself many times as she is also the dam of Investment, Reinvested, and Response. Asset offers the same astounding muscle expression, base width and breed character as his sire, Resource, with a little more frame and performance than his sire. Semen available through SITZ Angus Ranch.

Atlas

Koupals B&B Atlas 4061 | Reg # 17893917

We first saw Atlas as a calf at his mother's side on the South Dakota Angus tour, and were very impressed with both Atlas and his near perfect dam. We continued to monitor his development throughout the year as he outperformed his contemporaries and it became an easy decision to acquire an interest in this young sire. Atlas is a performance bull with extra skeletal dimension, tremendous base width and eye appeal. Atlas saw heavy use as an AI sire this spring in the SITZ program. Semen available through Semex.

Paygrade

Spring Cove Paygrade 5064 | Reg # 18251392

Paygrade is a neat young sire we acquired with ABS. A son of 1682, who is one of the hottest sires going today. Many astute breeders have regarded Paygrade as the best son of 1682 to date phenotypically. Paygrade has explosive muscle pattern and rear quarter, is very strong topped with a lot of breed character. His mother is a near perfect young cow that is moderately framed, has a beautiful udder, and is off to a great start in her production record. Paygrade saw heavy use in the SITZ AI program last spring. Semen available through ABS.

Response

SITZ Response 405C | Reg # 18219638

Response was another one of the favorites and top selling bulls in the 2016 Spring Sale. Response is a full brother to Asset and a maternal brother to Investment and Reinvested. Response offers more calving ease than most Resource sons. Response has tremendous phenotype and data set tying everything together in a neat package. Response seen use in the SITZ AI program this spring. Semen available through ST Genetics.

Reputation

SITZ Reputation 689C | Reg # 18077651

Reputation was acquired in our 2016 Spring Sale by ST Genetics and Chet Adams. Reputation's mother is a full sister to the famous SITZ Top Game 561X who is dominant for his ability to sire explosive growth and breed leading ribeye. Couple that with the ability of Powerball (Reputation's sire) to increase marbling, and the end result is bound to be favorable. Semen available through ST Genetics.
