 WWW.MUSGRAVEANGUS.COM

Dear Fellow Cattlemen,

All of us here at Bobcat Angus sincerely thank you for your interest in our 10th Annual Production Sale. Seems like time just continues to fly by. Wasn't it just yesterday that all of us were attending Montana State – this is certainly not the case...but the tradition continues at MSU as some of the next generation of our families are attending school there now!

The bulls will sell in catalog order. Starting with the Two's then the Fall Yearlings and finishing up with the bull calves.

We are definitely proud of these bulls and females and are anxious for all of you to evaluate them. Throughout the years we have sought out herd bulls with growth, length & muscle that have the carcass and maternal traits to go with it and as much calving ease as we can get in a big, stout package.

With that said, we found exactly the kind of bull we have been looking a long time for this past March at Musgrave Angus in Illinois. Musgrave Big Sky is a bull that we have a lot of cattle bred to right now and we were fortunate enough to sell a volume amount of semen on him this past spring. We truly feel that this bull will be a "Breed-Changer!" The Two-Coming-Three Year Old cows in this sale were A.I. bred to Big Sky and cleaned-up with a powerful set of bulls. Ultrasound showed there will be one full load of cows selling A.I. bred to Big Sky; One load to first cycle after A.I; and one load to the second cycle.

The Commercial Bred Heifers are absolutely fantastic and should be weighing on top of 1100 pounds sale day. Once again they were A.I. bred to WK Bobcat and ultrasounded by Dr. Ralph Miller for calving dates and sex.

The Registered Bred Cows in the sale are all of our cows that were born in 2007 – nothing held back. They are big, broody females that have done a fantastic job for us, but we sell this age group every year to make room for the next generation. Many of these cows sell A.I. bred to Big Sky!

We truly appreciate your interest in our program. You can view the cattle online at northernlivestockvideo.com or on our website at bobcatangus.com. Once again we will have a little get-together the night before the sale so please let us know if you will be around and wish to attend.

Thanks Again,
THE BOBCAT CREW

Northern Livestock's Sale Day Bid Line: 1-406-245-0889

You must have a Pre-Registered number to bid.

Sale can be viewed at www.cattleusa.com

For more information call Northern Livestock Video Auction at 1-866-616-5035

First Breeding Season Guarantee

All bulls selling for \$2,000 or more will be covered 50% by Bobcat Angus, if they are injured during their first breeding season. This guarantee does not include death as that can be insured for. Breeding season is defined as a 60 day period following the first turnout of bulls. Fifty percent of the value of the injured bull, minus one-half the salvage value, will be given credit in a future Bobcat Angus sale or toward a replacement bull if one is available. Salvage value, if any, will be split equally between Bobcat Angus and the buyer. All injured bulls must be diagnosed by a veterinarian. We also reserve the right to a second opinion by a veterinarian of our choice. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2015.

Focus on females: Percent ranks and GE-EPDs powered by HD 50K

The more Angus breeders know about the genetics of their replacements and cows, the more they can take advantage of the genetic forces — selection and mating — that drive the genetic merit and value of progeny. With genomic-enhanced expected progeny differences (GE-EPDs) powered by High-Density (HD) 50K and percent ranks, Angus seedstock producers can unlock these forces like never before.

The value of GE-EPDs powered by HD 50K

GE-EPDs powered by HD 50K for Angus include genetic predictions in the form of percent ranks for 19 traits plus parentage verification. For most of these traits, Angus Genetics, Inc. (AGI), a subsidiary of the American Angus Association, computes and reports weekly GE-EPDs, which are the most dependable predictions of genetic merit for animals with limited or no progeny. The accuracy from authenticated pedigree and GE-EPDs powered by HD 50K is generally equivalent to tested animals having roughly a dozen progeny (ranges from 6 to 22 progeny, depending upon the trait — see Table 1). It follows that for females, GE-EPDs immediately deliver more accuracy than a typical lifetime of natural progeny (8 to 9)¹ evaluated in groups and included in genetic evaluation. Increasingly, Angus breeders are realizing the value of testing females as well as bulls (Figure 1).

Percent Ranks for Non-GE-EPD Traits

Percent ranks from Zoetis are currently based on a reference population of more than 15,000 tested Angus animals. Ranks range from 1 to 100, with lower numbers generally favored for most traits (see Table 1). In addition, percent ranks are available for several traits for which GE-EPDs are not derived. These include ranks for heifer pregnancy, measures of feed efficiency and end-product tenderness, which are relevant to Angus breeders as well as their bull customers, cattle feeders and consumers.

Selection

Selection of females in Angus seedstock herds occurs at a number of levels:

- Which heifers to keep and breed for replacements, sell as seedstock or cull
- Whether or not to retain or sell certain cows of various ages, or possibly use them as recipients
- Which specific heifers and cows to breed to conventional versus sexed male/female semen
- Identification of elite females for embryo transfer (ET) or in-vitro fertilization (IVF)

Higher accuracy GE-EPDs powered by HD 50K and more complete trait information from percent ranks help breeders produce more valuable progeny and reduce risks and costs, including more dependable selection and use, earlier and throughout a cow's productive life.

Mating

Besides selection, mating is the other force that drives genetic improvement. Regardless of the breeding objectives (desired performance of progeny across relevant traits), more accurately evaluated females may be more dependably matched to artificial insemination and/or natural service sires that accentuate strengths and correct weaknesses — creating more valuable progeny aligned with breeding objectives. More dependable and comprehensive mating decisions go beyond increasing the value of progeny, and include enhancing the value of bred females, embryos and pregnant recipients.

Also, pedigree information verified by GE-EPDs powered by HD 50K reduces the liability associated with incorrect parentage and improves the accuracy of EPDs and precision with which breeders can mate cows to either avoid or exploit planned line-breeding. Verified parentage also reliably documents pedigree relationships to immediate ancestors that are proven to be free of known genetic conditions.

Summary

Angus females with more accurate and complete genetic information from GE-EPDs powered by HD 50K can more dependably be selected and mated for a lifetime of progeny that possess greater genetic value. The more Angus breeders know about the genetics of their females, the more they can competitively take advantage of the forces of selection, mating and complementary reproductive technologies.

To learn more, visit zoetisUS.com/genetics or angus.org or contact your Zoetis or American Angus Association representative.

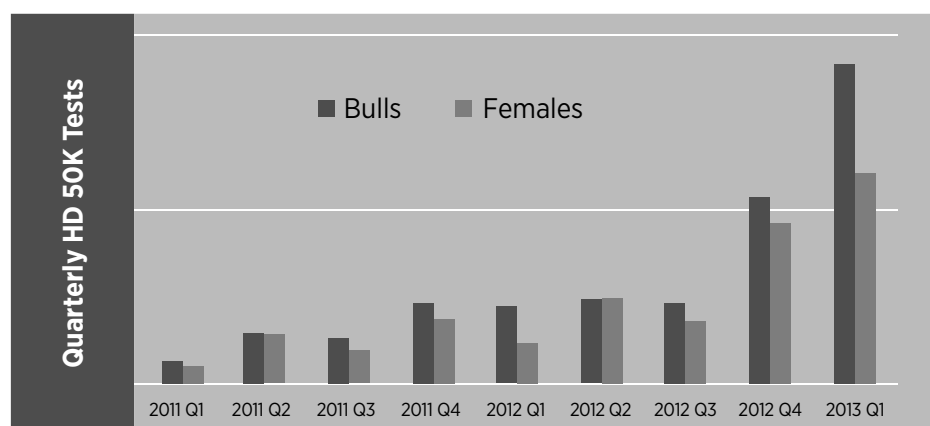

GE-EPDs powered by HD 50K for Angus

Table 1. GE-EPDs powered by HD 50K for Angus — Impact on EPDs, accuracy values, associated progeny equivalents and interpretation of percent ranks.

Trait	Correlation (%GV) for GE-EPDs ²	Average (+/-) EPD change ³	Average accuracy ⁴	Progeny equivalents ⁵	Percent rank interpretation
CED	.61 (37)	3.0	.31	21	Lower number, easier calving
BW	.64 (41)	0.8	.35	11	Lower number, lower BW
WW	.54 (29)	3.0	.29	19	Lower number, heavier WW
YW	.66 (44)	5.0	.32	22	Lower number, heavier YW
DMI (RADG)	.59 (35)	0.03	.26	10	Lower number, higher RADG
RFI	NA	NA	NA	NA	Lower number, more efficient
YH	.70 (49)	0.13	.35	9	Lower number, taller YH
SC	.73 (53)	0.23	.36	11	Lower number, larger SC
Doc	.67 (45)	5.0	.30	10	Lower number, calmer Doc
HP	NA	NA	NA	NA	Lower number, higher HP
CEM	NA	NA	NA	NA	Lower number, easier calving
Milk	.38 (14)	2.0	.20	15	Lower number, more milk
MW	.51 (26)	11.0	.25	7	Lower number, heavier MW
MH	NA	NA	NA	NA	Lower number, taller MH
CW	.57 (32)	5.0	.19	6	Lower number, heavier CW
Marb	.63 (40)	0.12	.31	16	Lower number, more Marb
RE	.63 (40)	0.10	.25	9	Lower number, larger REA
Fat	.53 (28)	0.01	.25	11	Lower number, less fat
Tend	NA	NA	NA	NA	Lower number, more tender

NA (Not Available), designates that either an EPD is not available for the trait (RFI, Tend) or that HD 50K information for the trait is not yet directly integrated into the EPD (HP, CEM, MH).

Figure 1. Quarterly GE-EPDs powered by HD 50K for Angus tests by sex distributed by AGI.

DD Explanation: All of the bulls in this year's catalog have had either Zoetis 50K or Igenty genomic tests run. An explanation of 50K has been included in the catalog. Also all of the potential carriers for the various genetic conditions have also been tested.

In August of this year the American Angus Association announced a genetic condition known as Developmental Duplication (DD). In very rare circumstances there have been animals born that have an extra limb. The Angus Association is not limiting registrations of animals in any way, and thus are not requiring a potential carrier animal to be tested in order to receive registration papers. The Angus Association realizes that DD will have a very, very low economic impact to the commercial cattle industry. All the animals in this sale that were determined free of DD either by pedigree or DNA test, will not have any abbreviations at the top of their pedigrees. Any animals with a "DDC" at the top of their pedigrees were determined to be a single copy carrier of the DD gene.

Also any animals tested positive for single copy carrier of the double muscling gene (M1) will have the designation M1C on their pedigrees.

² Correlation between HD 50K genomic predictions and performance, and associated percent explained genetic variation (GV). Genomic Update. American Angus Association and Angus Genetics, Inc., 2013.

³ Data on file. Average absolute change in EPD versus GE-EPDs powered by HD 50K for non-parent animals. Zoetis.

⁴ Data on file. Average accuracy of GE-EPDs powered by HD 50K based on verified pedigree and HD 50K information. Zoetis.

⁵ Approximate progeny equivalents associated with accuracy of GE-EPDs powered by HD 50K based on verified pedigree and HD 50K information. Progeny equivalents for carcass traits are actual progeny carcass records — equates to ultrasound scans from approximately 30 progeny.

This embryo calf was orphaned and did not produce very well on weaning and yearling weights. The bull has come on very strong since weaning and we feel he is worthy of selling.

2 COMING 3-YEAR OLD ANGUS BRED COWS

Musgrave Big Sky

We are offering a first time opportunity of 2 coming 3-year old cows that are AI bred to Musgrave Big Sky. Lot 191 offers the only commercial cows bred to Musgrave Big Sky. Now is the time to get in on this Breed Changer!

LOT 191 52 COWS

2 coming 3-year old bred Black Angus Cows
AI bred to Musgrave Big Sky on May 29th
due to calve March 1-12

LOT 192 55 COWS

2 coming 3-year old Black Angus Cows
Natural service to Sons of X Factor and Bobcat
Due to calve March 15 to April 15

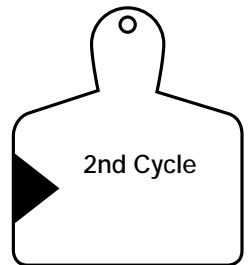

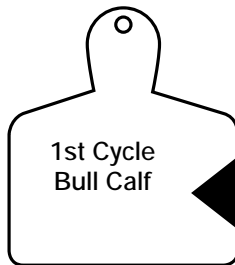

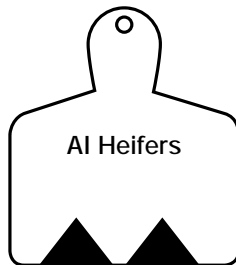

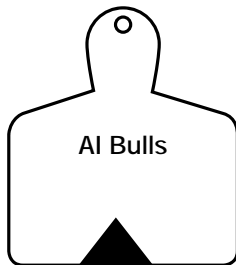

LOT 193 32 COWS

2 coming 3-year old Black Angus Cows
Natural service to Sons of X Factor and Bobcat
Due to calve April 5 to May 10

WK Bobcat

We are offering 550 heifers that are bred to WK Bobcat. Of these heifers, 230 are one-iron, home raised from our commercial Angus herd. In addition, there are 270- No Brand heifers that were AI bred two weeks later on June 1st. We purchased these heifers from herds of producers that have been in the business many years. Seventy five percent of our commercial cows are the result of 20 years of an extensive A.I. program. They are sired by Sons of VRD, Vermillion Yellowstone and Nebraska, and WK Bobcat who has become an integral part of our cow herd. They are a very fancy set of heifers which will raise A.I. sired calves that will wean off 700-750 pound steer calves and 600-650 heifer calves, depending upon environment. The heifers have been ultrasound pregnancy tested by Dr. Ralph Miller. They have been vaccinated with Virashield 6, Scour Bos 4 and Ivomec.

194 73 HEIFERS
 AI to WK Bobcat on 5-18-2014
 Due to calve Feb. 12-24
 Carrying bull calves
 Eartag : yellow with black numbers

197 76 HEIFERS - NO BRANDS
 AI bred to WK Bobcat on 6-1-2014
 Due to calve Feb. 26-March 6
 Carrying heifer calves
 Eartag : yellow with white numbers

195 65 HEIFERS
 AI to WK Bobcat on 5-18-2014
 Due to calve Feb. 12-24
 Carrying heifer calves
 Eartag : yellow with black numbers

198 30 HEIFERS
 Bred to sons of WK Bobcat
 Due to calve March 5-30
 Carrying bull calves
 Eartag : yellow with black numbers

196 105 HEIFERS - NO BRANDS
 AI bred to WK Bobcat on 6-1-2014
 Due to calve Feb. 26-March 6
 Carrying bull calves
 Eartag : yellow with white numbers

199 32 HEIFERS
 Bred to sons of WK Bobcat
 Due to calve March 5-30
 Carrying heifer calves
 Eartag : yellow with black numbers

550 BRED COMMERCIAL HEIFERS

200 25 HEIFERS- NO BRANDS
Bred to sons of WK Bobcat
Due to calve March 5-30
Carrying bull and heifer calves
Eartag : yellow with white numbers

201 29 HEIFERS
Bred to sons of WK Bobcat
Due to calve April 1-30
Carrying bull and heifer calves
Eartag : yellow with black

202 63 HEIFERS -NO BRAND
Bred to sons of WK Bobcat
Due to calve April 1-30
Carrying bull and heifer calves
Eartag : yellow with white

203 15 HEIFERS
Bred to sons of WK Bobcat
Due to calve April 1-30
Carrying bull and heifer calves
Eartag : blue

204 14 COWS
3 to 7-year old cows
Bred to X Factor Sons
Due to calve May 1 - June 1
Carrying bull and heifer calves
Eartag : red

205 28 COWS
Ten-year old cows
AI bred to Bobcat Tundra-
Approximately 60 percent AI service
Bred on June 1st
Due to calve Feb. 26-April 30
Eartag : blue

If, for any reason, the buyer should like to use their own veterinarian, Bobcat Angus will reimburse any open cows within fifteen days of the sale. Bobcat Angus will not be liable for any open females more than fifteen days past the sale date.

American Angus Association® Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docity (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Fleatlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
