GUARANTEE

All bulls selling for \$2,000 or more will be covered 50% by **Redland Black Angus** if they are injured during their first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls.

50% of the value of the injured bull, minus one-half salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. Salvage value, if any, will be split equally between **Redland Black Angus** and the buyer. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2015.

Example 1: A \$5,000 bull is injured and will not heal. A credit of \$2,500 minus one-half any salvage value will be given to the buyer.

Example 2: A \$2,000 bull is injured and will not heal. A credit of \$1,000 minus one-half of any salvage value will be given to the buyer.

Example 3: A \$1,750 bull is injured and will not heal. No credit is given. Buyer retains all salvage value.

This is not a mortality policy. Mortality coverage can be purchased sale day.

Marketing Option

Redland Angus and Bo Bevis with Northern Livestock Video Auction are pleased to announce their "Redland-Sired Marketing partnership".

Feeders throughout the country are looking for the deep-ribbed, heavy-muscled traits that Redland Angus sired feeder calves possess. That, along with their consistent uniformity, demand that Redland Angus sired calves bring a premium on sale day.

The females sired by Redland Angus bulls are also sought after by heifer developers and ranchers alike. Their volume and fleshing ability make a cow that is not only profitable on the ranch but also produces offspring that are profitable in the feedlot.

We are excited about the opportunity to bring Redland Angus customers together with feeders and buyers all over the country to help get the premiums for your Redland Angus sired calves that the program you have in place deserves.

Calving Ease Bulls Raised

Spring Calving Cows

Late Fall - trailing to winter range.

Cows on Winter Range.

Spring calving time.

Spring Cows on mountain Summer Range.

the Commercial Man's Way

A Ranch's Profit Starts With A Live Calf

Following the same philosophy of the summer calving Range Calved - Range Raised® program. All spring cows calve out on their own with a focus on lighter birthweight genetics. They are bred to sire progeny that survive and thrive on native forage and practical management to increase your profitability and lower your production costs.

COST EFFICIENCY = PROFITABILITY

For a commercial operation to generate a high level of cost efficient production, it must have a cow herd which will cope with fluctuating nutritional conditions and still be productive without requiring high levels of supplemental feeding. A low maintenance, productive cow herd that can efficiently utilize available resources is the key. This is a function of body type and not EPD's or other numbers.

All cattle do well when fed grain as it is an environment providing a constant level of ideal nutrition. Not all cattle do well in a grass-based environment with fluctuating levels of nutrition. Any stand alone commercial breeding operation targeting maximum sustainable net profit is virtually a total grass based production system. At Redland Angus we are raising our cattle in the same method most of our commercial customers do and have found that only generations of cows bred to meet these requirements stand the test.

A commercial producers net profit is tied to their herds ability to efficiently utilize what grass is available throughout the year. The same is true for us and the cattle we produce and offer for sale.

Cedar Ridge is proving to be a good addition to our Range Calved-Range Raised® program. He is a proven calving ease sire that transmits excellent vigor in his new born calves. Daughters are going to make good range cows with very good udder quality.

What it's all about. Fertile, moderate framed low input cows raising big calves.

Calves pictured at 5 months of age.

THE ANGUS FEMALE IS THE HEART OF OUR PROGRAM

These high capacity, deep-ribbed, easy-fleshing females have been raised and sorted on native range and have answered the challenge of being cost efficient producers. In an entirely forage based program, they have raised heavy calves, stayed in condition and bred back early with low input costs and minimal labor.
