120 Yearling Angus
Range Bulls

Ox Bow Ranch

Chris and Nora Hohenlohe

P.O. Box 215 • Wolf Creek, MT 59648
oxbow@3riversdbs.net

Hello Everyone,

Welcome to our annual ranch production sale. I want to thank past customers for your continued support and confidence in our program. We appreciate your business and hope you can join us again this year. For those of you new to our program, I look forward to meeting you!

Over the past year we have witnessed record high cattle prices, angus and angus influenced genetics continue to demand the highest value in the industry. Input costs are also at all time record levels. We continue to select genetic combinations that produce balanced trait cattle with the ability to improve your bottom line. I firmly believe that our genetics will increase pounds, improve efficiency, reduce your labor and input costs, and provide you with great replacement females.

Our young, all ranch-raised cow herd has produced the strongest and most uniform set of breeding bulls we've ever offered. They offer a tremendous balance of fertility, efficiency, maternal, performance and carcass value. These bulls will produce cattle that are moderately framed, easy fleshing, and super efficient on grass. We develop the bulls on a feed ration that ensures properly conditioned, sound individuals that will give you years of service.

Once again, George Marcy is on board to help with the management of the sale. George will be arriving several days prior to the sale. He and I will both be on hand to take your calls and help you evaluate our offering prior to sale day. I also encourage you to make plans to visit us in the days prior to the sale to check out our cow herd. Give me a call and I will be here to take you through the herd and talk cows.

Please plan to attend our sale on March 6th. If you are unable to attend the sale, please remember you can bid live on the phone on Northern Livestock Video Auction. Please see details on the next page. Give us a call. Buy with confidence; we stand behind our cattle. I trust you will find great genetic value for your dollar spent.

If I can be of any assistance, I can be reached at the listed phone numbers or e-mail address. Hope to see you at the sale!

Chris & Nora Hohenlohe and Family

Ben, Anne and Ken Cook

Ox Bow Ranch...Efficient Maternal Angus Excelling in a Demanding Environment

We hope to see you March 6th at the Ox Bow sale to view an exceptional group of consistent, efficient, easy doing bulls. If you cannot attend & I can assist you in any way please give me a call & I will represent the cattle exactly as I see them.

These bulls are bred deep in the traits of low birth-weight Angus cattle with strong performance that will leave easy fleshing, great uddered females that can produce in rough country. Over 80 of these bulls are suitable for use on heifers. The sires groups include a large offering of SAV Final Answer, GDAR Game Day, Cole Creek Cedar Ridge & Emblazon blood.

These moderate framed, deep ribbed, easy fleshing bulls are from one of the great maternal cowherds in the state of Montana. Ken Cook has bred a cow herd that revolves around what Angus cattle are meant to do in a demanding environment, be efficient, deep ribbed, easy doing cattle with excellent udders. This is one of the best uddered cow herds you will find anywhere and the cattle are exceptional on their feet and legs. They have to be athletes to run on the steep mountain terrain that is their summer pasture.

If you cannot attend Northern Livestock Video Auction will be broadcasting the sale live on the internet and you can bid over the phone if you wish. Please register before sale day to bid.

Please give me a call if I can help you with your selections in any way. I will be there Sunday March 3rd through the sale.
George Marcy, Marcy Livestock Services 308/430-2005

Sale Location: Paved road to the sale site! The sale site is conveniently located at Ox Bow Ranch's Sentinel Rock Ranch just off I-15 at Wolf Creek then 2 miles east on Holter Lake Frontage Road. See map on below.

Bids: For buyers unable to attend the sale we will offer a satisfaction guarantee on your purchases. Contact Ken Cook or George Marcy for details.

Retained Ownership: Ox Bow Ranch is retaining 1/3 revenue sharing semen interest in all bulls. Full possession sells on all bulls.

Terms and Conditions: The cattle will sell under the terms & conditions recommended by the American Angus Association. All bulls with potential defect carrier pedigrees have been tested free.

Fertility: All bulls were palpated, semen tested and scrotal measured by Dr. Clint Hilt.

Herd Health: All cattle have had a complete vaccination program prescribed by Dr. Clint Hilt. All bulls were vaccinated and received pour-on last fall. Bulls have been vaccinated for footrot, we would recommend a yearly booster shot be given. **All bulls have tested negative for persistent BVD infection.**

Delivery: Free delivery up to 500 miles to central points with total purchases of \$4000 or more and up to 800 miles to central points on purchases of \$7500 or more. Bulls will be delivered as soon as arrangements can be made. \$50 discount on bulls picked up sale day or the following week.

Wintering Arrangements: If you desire, bulls will be hauled back to the Broken O feedlot. Feed will be billed to you at a rate of no more than \$3.50 per day. Please make arrangements to pick up bulls from the feedlot prior to 4/15/13. **Bulls are kept at buyer's risk. Please make arrangements when settling up on your purchases.**

Performance data: All performance data will be available sale day and will also be posted on our web site at **www.OxBowRanchAngus.com** as soon as it becomes available. This includes ultrasound, final weights and scrotals.

Current EPDs can be viewed at www.angus.org

Volume discounts: We will offer volume discounts starting with 3 bulls at 3%, up to 10% on 10 bulls or more.

Liability: All persons attending this sale do so at their own risk and responsibility without liability on the part of the ranch owners or their employees.

Cattle Inspection: Cattle are available for inspection prior to the sale at the Broken O feedlot located 10 miles west of Simms, MT on Hwy 21, then 1 mile north across the river. Cattle will arrive at the sale site on March 2.

Accommodations:

Numerous nice motels are available in Helena (35 miles south) & Great Falls (58 miles north)
Comfort Suites, Helena 406-495-0505

Bulls designed to be more profitable!

American Angus Association \$Value Indexes

\$Values are multi-trait selection indexes expressed in dollars per head, to assist commercial beef producers by adding simplicity to genetic selection decisions. A \$Value has meaning only when used in comparison to the \$Value of another animal. For example, just as with EPDs, variation in \$Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment.

How do I use them?

\$Values should be used to complement the criteria that producers already use when selecting bulls.

The \$Values are not designed to be driven by a single trait, as an index is multi-trait by design. These selection tools are the result of the application of industry-relevant market values to Angus genetics for preweaning, feedlot, and carcass merit.

The \$W, \$F, \$G and \$B values on individual animals and the Sire Evaluation Report may be viewed at www.angus.org.

Calving Ease Direct (CED): expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers

Cow Energy Value (\$EN): an index expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Weaned Calf Value (\$W): an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F): an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires.

Grid Value (\$G): an index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B): an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The \$B value combines the contributions of \$F and \$G.

A big thank-you to everyone who has helped us through the years.

Special thanks:

My ranch assistants Ivan Negri and Justin Scott for their huge part in the day to day operation of the ranch;

Nancy Phillips for her fine office assistance;

Dr. Clint Hilt for vet work, herd health consulting and fertility testing;

Russ & Barb Pepper for watching health on the bulls;

Dan Freeman and his crew at the Broken O for feeding the bulls;

Jon Bouma for clipping the bulls;

Dr. Maureen Dietz for carcass ultrasounding the bulls;

Chili OBrien's for preparing the lunch; and

Gerri and John Campbell and crew at Ballyhoo Printing for preparing a great sale catalogue.

Ivan and Jennifer Negri

Also thanks to all our friends and neighbors for their help on sale day and your friendship and support throughout the years.

Cedar Ridge offers exceptional outcross calving ease. Calves are short gestation and come extremely easy. Sons are deep and easy doing with an attractive and expressive muscle pattern. A good bull to help moderate frame size and add fleshing ability and quality muscle. High docility and scrotal as well.

Efficient Maternal Angus Excelli

Over the past 20 years, Ox Bow Ranch has worked to develop a uniform, efficient, performance-oriented, maternal cow herd bred to meet the challenges of our rough country. This environment creates opportunities to identify the superior genetics needed to work when times are tough.

Low rainfall and rocky, coarse soils frequently require our cow herd to work under drought or near drought conditions. Our cattle must possess sound foot and leg structure to travel long distances over rough and rocky terrain between water and grass. The cow herd is managed to maximize grazing days and minimize stored forage use. This low input philosophy requires that the females be moderate-framed and deep-ribbed. We select for broody individuals with the fertility and fleshing ability to maintain a strong pregnancy during lactation, and gain afterward on dry, low quality forage.

Our cow herd is one of the most predictable and reliable purebred range cow herds you will find, the end result of our intensive A.I. program. We consistently use high accuracy proven sires and time-tested bloodlines. The durability of our genetic base is the result of blending advanced Emulation EXT and Traveler 6807 lines. These sires set the industry standard for balance and efficiency. We have strongly embraced genetic advancements in low birth-weight/high-performance cattle with strong carcass merit. These cattle will reduce your labor input, add pounds of profit, and provide you with great replacement females.

Few purebred ranch environments challenge the cow herd like ours does. When you buy a bull from us, you are buying 20 years of strong selection pressure for moderately sized, low input, heavily muscled, performance cattle.

A whole genetic package - balanced for profit.

X**

Special thanks to all our buyers and bidders and a big thank you to all our past bull buyers. We really appreciate your business and friendship. May you have a healthy, happy and prosperous year!

FIRST YEAR BREEDING GUARANTEE

With the reality that sometimes young bulls become injured during their first breeding season, we have worked to come up with a fair and reasonable way to share this risk with our bull customers. With customers that wanted the insurance, we shared one-half the premium cost for coverage on the bulls to lower your risk. We have decided to continue sharing one-half the risk during this transitional period with the following breeding guarantee.

GUARANTEE

All bulls selling for \$2000 or more will be covered 50% by Ox Bow Ranch if they are injured during their first breeding season and not able to return to service during that first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls.

50% of the value of the injured bull, minus one-half salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. Salvage value, if any, will be split equally between Ox Bow Ranch and the buyer. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2013.

- Example 1: A \$5,000 bull is injured, a credit of \$2,500 minus one-half any salvage value will be given to the buyer.
 Example 2: A \$2,000 bull is injured, a credit of \$1,000 minus one-half of any salvage value will be given to the buyer.
 Example 3: A \$1,750 bull is injured, no credit is given. Buyer retains all salvage value.

We hope to see you **October 7, 2013** for our Female Production Sale
Includes a dispersion of our 2006 - 2007 born cows
plus bred heifers, heifer calves and embryos

**Thanks for
Coming!**
