# Welcome Cattlemen and Friends!

We cordially invite you to attend our annual production sale to be held here at Spickler Ranch, on Monday, May 5, 2014 at 1:00 PM CDT.

We will sell the cattle in the order they are listed in this catalog, starting with the registered heifers, followed by the fall bulls and yearling bulls. We will also provide videos of each lot in the sale through a link on our web site to Northern Livestock. The videos should be ready a couple weeks before the sale after the bulls and heifers are slick shaved. Northern will also provide internet bidding sale day for buyers unable to attend the sale.

We are pleased to present this set of bulls to you for your evaluation. There are several new sire groups, plus a complete set of coming two-year old bulls from the fall calving cowherd. Again this year we are offering open registered heifers.

The yearling bulls have been handled just like they have in past years. Upon completion of their gain test they are gradually backed off grain. Our bulls are fully guaranteed for the first breeding season and if exposed to a bull for at least 60 days the heifers are guaranteed to be pregnant.

Our family has been ranching and selling seedstock in the James River Valley since the 1940's. 2013 marked the beginning of the eighth decade that our family has been ranching at this location. The cattle industry has experienced many changes, as has Spickler Ranch. As third generation seedstock producers, we also know there are some things that do not change – sound, functional, adaptable, maternal, efficient cattle. We have taken a responsibility to you, our customer, to provide herd changing genetics that will move your program forward. Our customers are the most important aspect of our business. We value the trust you have placed in us and welcome the opportunity to serve you as one of your seedstock sources. Please, never hesitate to call us with questions and comments, especially if we are slow to contact you. We are very excited to present this sale offering for your inspection, and welcome your input throughout the year.

We also want to express our thanks to all who have invested in our program through time spent visiting our ranch as well as through the purchase of our genetics. During the last year we have had several visitors from the US and abroad. We value this time spent with cattle industry peers and have learned something from each of you.

The Angus mother cow keeps us in business and we expect our Angus cows to keep our customers in business with the trouble free genetics they provide. There are several reasons, most of which are qualities that we now seem to take for granted including: excellent udders and mothering ability, very few calving difficulties, heat and cold tolerance, the ability to forage, the ability to respond to forage changes from year to year and still becoming pregnant in a 60 day breeding season while raising the largest calf that her available resources and genetics allow.

We recognize that this is a busy time for you, but we encourage you to take a day off and spend it with us. We'll sort the bulls into small groups for ease of evaluation, and we'll make any information that didn't make the catalog available sale day. If you have any questions at any time before the sale or throughout the year please feel free to contact us and we will help you to the best of our ability.

Please join us for a complimentary beef lunch prior to the sale. The meal will be served at 11:00, so come early, look over the bulls, have lunch with us, and enjoy the sale.

The Spicklers

Justin, Sara,  
Wyatt, Will, Jessa & Watson

## About the Bulls:

- ♦ *First breeding season guaranteed!*
- ♦ *No Creep! - Bulls raised by good milking mothers on native pasture.*
- ♦ *1000 Mile Free Delivery on registered lots bringing \$2500 or more.*

**Monday, May 5, 2014**  
**1 p.m. • Glenfield, ND**

**Offering**  
**115 Yearling Angus Bulls • 50 Fall Born Coming Two's**  
**25 Registered Heifers**

**Auctioneer:**

Roger Jacobs, Billings MT  
Office/Cell Phone: (406) 698-7686

**Sale Day Phones:**

Sale Barn: (701) 674-3170      Sale Barn: (701) 674-3169  
Justin's Cell: (701) 650-8840      Nathan's Cell: (701) 650-1077  
Sara's Cell: (701) 650-9890      Emily's Cell: (701) 650-8841

**Sale Order:**

**Cattle will sell in catalog order starting with:**

Registered Heifers  
Fall Born Coming Two-Year-Old Bulls  
Yearling Bulls

**Accommodations:**

Carrington:

Cobblestone Inn & Suites.....(701) 652-3000  
Chieftain Motor Lodge.....(701) 652-3131  
Carrington Inn & Suites.....(701) 652-3982

Jamestown:

Gladstone Inn & Suites.....1-866-748-4466  
Comfort Inn.....(701) 252-7125  
Quality Inn & Suites.....(701) 252-3611

**Air Travel Information:**

Carrington Airport is located just west of Carrington and has a 3800 foot runway with 2700 feet lighted. For transportation from Carrington Airport to Spickler Ranch, call 674-3170 or 674-3169. Jamestown is 45 miles south of Spickler Ranch and is served by a commercial airline. Fargo is located approximately 120 miles southeast of Spickler Ranch and is served by several major airlines. Bismarck is located approximately 145 miles southwest of Spickler Ranch and is served by several major airlines also.

**Insurance:**

Insurance will be available sale day but is not necessary as the bulls are fully guaranteed.

**Delivery:**

1000 mile free delivery on registered lots totalling \$2500 or more. Delivery beyond at cost. Leave delivery instructions at settlement time. **If you bring your trailer and haul your purchases home sale day, we'll give you a \$50 discount per registered lot.**

**Semen Test:**

All bulls in the sale have been fertility tested and have passed a breeding soundness exam performed by Dr. Nate Ziemann.

**Ultrasound Carcass Data:**

Ultrasound carcass data collected by Dr. Bill Rotenberger, DVM, on all the bulls and registered heifers is listed with their individual lot in the catalog and has been adjusted to 365 days of age.

**Health:**

At weaning the bull calves all received Ultrabac-7 Somubac, Bovi-Shield Gold 5, Pulmogaurd, Inforce, and Dectomax dewormer. This spring the sale bulls and sale heifers were vaccinated with Bovi-shield Gold FP 5VL5 HB and poured with Ivomec, and dewormed with Safegaurd. The bulls and heifers have all been tested negative for Persistent Infected BVD and BLV. Also this year, the bulls will have had two vaccinations for foot rot. Health papers will be furnished sale day for interstate shipment.

**Guarantee:**

All cattle sell under the standard terms and conditions of the American Angus Association. All of the bulls are fully guaranteed against injury or death by Spickler Ranch for their first breeding season. All heifers selling are guaranteed pregnant if exposed with a bull for 60 days. Every individual in this sale has been determined to be free of the AM, NH, CA, DD, and M1 gene through a combination of DNA and pedigree assessment.

**Volume Discounts:**

We will discount your purchase price 2% on 2 registered Lots up to 5% on 5 or more registered Lots. Single Lot registered heifers qualify for volume discounts.

**Terms and Conditions:**

Terms of the sale are cash. Phone or mail bids are welcome and may be given to the auctioneer or any of the sale representatives. Each animal will be sold to the highest bidder. Any bidding disputes will be settled by the auctioneer. Any person attending the sale does so at his/her own risk. Neither the owners, not any person connected with this sale assumes any liability, legal or otherwise.

**Viewing:**

Viewing is welcome any time prior to the sale. On Sunday, May 4th, bulls will be sorted into sale day pens for easier evaluation. Also on Sunday we will have lunch available in the late afternoon and evening. You are welcome to come and spend the afternoon with us.

**Lunch:**

A complimentary beef lunch will be served from 11:00 a.m to 12:30 p.m.

**Internet Live Auction:**

The auction will be live on the Internet at [www.cattleusa.com](http://www.cattleusa.com).  
See page 4 for further details.

**Thank-You!**

Tyler Gleason

## Cattle Viewing

Viewing is welcome any time prior to the sale. On Sunday, May 4th, bulls will be sorted into sale day pens for easier evaluation. We will also have lunch available on Sunday in the late afternoon and evening. You are welcome to come and spend the afternoon with us.

**Angus  
Partners**  
**FEMALE SALE**

**January 17, 2015 ♦ Kist Livestock ♦ 12:00 p.m. ♦ Mandan, ND**

On behalf of Spickler Ranch and Mc Cumber Angus Ranch, we would like to thank the buyers, consignors and friends who attended the 2014 Angus Partners Sale. We were very fortunate to have an outstanding sale with:

1292 Commercial Bred Heifers averaging \$1,857  
1131 Commercial Open Heifers averaging \$1,219

The purpose of this sale is to give our customers as well as Mc Cumber Angus Ranch customers a marketing option to gain a premium on your Spickler and Mc Cumber sired females. We are committed to helping our customers gain the best value for their Angus genetics and feel that this sale is representative of that effort.

To visit about consigning your heifers that are sired by or bred to Spickler Ranch bulls to the Angus Partners Sale, contact Justin (701) 674-3170 or Nathan (701) 674-3169.

**Featuring**

**Genetics from Mc Cumber Angus Ranch  
& Spickler Ranch!**

# Terms & Abbreviations

EPDs - Expected Progeny Differences - describes genetic differences between animals within a breed and between herds. Research shows they are 7-9 times more accurate than any other measurement including individual performance data. It is the **BEST** way we have to compare animals for the genetic contribution they will make to your cowherd.

The bull's scrotal circumference measured in centimeters adjusted to one year of age. The Fall bull's scrotal measurements are taken in March.

A predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

CED is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

A predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

A predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

CEM is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires.

A predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

A predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires.

A predictor of the difference in ribeye area of a sire's progeny at a given end point compared to the progeny of other sires.

## \$ Values

\$W: an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

\$F: an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

\$B: an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

The percentage above or below average (100=average) a bull is for his 205 day weaning weight.

Yearling weight adjusted to 365 days.

The percent above or below average (100=average) a bull is for his 365 day weight.

Pounds per day a bull gains during our test period. Yearling bulls = 165 days Fall Bulls = 136 days

Weaning weight adjusted to 205 days of age

Actual birth weight.

The percent intramuscular fat (marbling) adjusted to 365 days of age.

The percent above or below average (100=average) a bull or female is for its marbling scan withing its contemporary group.

Each bull's ribeye area measured in square inches and adjusted to one year of age.

The number of calves a dam has birthed and their combined average ratio for birthweight (100=average).

The percent above or below average (100=average) a bull is for his adjusted ribeye area.

The number of calves a dam has weaned and their combined average 205 weight ratio (100=average).

The number of calves a dam has had 365 weights taken on and their combined average ratio (100=average).

The number of calves a dam has had IMF measurements taken on and their combined average ratio (100=average).

The percent above or below average (100=average) a bull is for his fat thickness.

The bull's yearling hip height measured in inches, and converted by the American Angus Association to a frame scale adjusted to 365 days of age. The fall bulls were framed scored in early March.

Chisum is the most dominant sire we have ever used. He is a powerful potent, proven sire of performance at all levels- weaning, yearling, carcass, and maternal. We will again offer a large group of his sons including ET full brothers out of S Queen Essa 208 and 3 full brothers in blood out of Game Day daughters of S Queen Essa 208. Chisum's influence is also felt throughout our sale offering through his daughters as they have raised several top bulls and heifers.

Lincoln has become one of our most popular resident sires due to his ability to consistently sire calving ease bulls, that are moderate framed, thick topped, and attractive patterned. His daughters are easy keeping young cows that raise nice calves. Lincoln's finished steer and heifer data also has him marked as a high quality carcass sire, with an outcross pedigree. We are again offering a large group of his sons, including several of the best yearling and fall born calving ease prospects.

20 sons sell May 5th!

Bred by Sinclair Cattle Co. Owned with Sinclair, Mc Cumber, ZWT, Greg Golden, & Maymont Farms.

Fortunate Son is a solid part of our breeding program. His progeny are long, thick topped, and consistent in type. We calved our first Fortunate daughters this spring. They are every bit as good as we expected. They are good mothers, have nice udders and are feeding their calves well. Look for the his sons to add performance in an outcross genetic package. 10 sons sell May 5th!

Bred by Spickler Ranch. Owned with Bar H, SK.

Semen available through Semex Beef.

**S Titlest 1145** sold in our 2012 bull sale to Bar H Land and Cattle in SK. He is an impressive Lincoln son with extra length, depth and muscle. His dam is a solid producing VRD daughter from our very productive Cora cow family. Titlest sons are solid calving ease bulls and his daughters are deep bodied, attractive young females.

**6 sons sell May 5th!**

S Gloria 316 is the top heifer of our entire 2013 calf crop. This long sided, high performing heifer is sired by our udder improving female sire, Summit, and is out of a 2- year-old dam who is a full sister to Chisum. Lot 1 is a definite sale feature with a number tabulation that is excellent and a performance profile that is unparalleled, completed with an IMF ratio of 140 and a REA ratio of 109. Her combination of attractive phenotype, genetics and maternal lineage makes Lot 1 one of the most unique heifers we have ever offered. **Retaining the right to one future flush.**

Phenotypic and genetic treasure sired by Upward. S Mayflower 3356 is a very feminine, clean fronted, sound structured, attractive ET daughter of Upward that is loaded with muscle shape and expression and this is backed up by her 137 ribeye ratio. Her dam is a cow we jointly own with Dale Edwards in Missouri and she is proving to be an elite donor. She is a good uddered, high producing, easy keeping daughter of Expedition that stems from the same highly productive Mayflower cow family that produced McCoy. Carefully evaluate this April heifer- she is one of the most unique and powerful genetic packages we have ever put through our ring.

**S Mayflower 724 -**  
WR 3/108. Featuring her ET daughter that sells as Lot 2 and her ET sons by Upward that sell as Lots 93, 162, and 163.

Sweet fronted, attractive patterned, thick quartered Summit heifer that is sure to be a favorite sale day. Lot 3 is out of a powerful Chisum x Rock dam who descends from the same cow family that produced S McCoy 124. This quality heifer is one of the most intriguing heifers in the offering with her phenotype, raw performance and excellent EPD profile across the board. This heifer would likely be competitive as a show heifer and has the maternal heritage and genetics on both sides of her pedigree to be a highly productive cow with donor potential. **Retaining the right to one future flush.**

Long bodied, angular, feminine McCoy daughter with extra depth and muscle expression. Miss Emulous 3125 has a stat line that could have her headed to the donor pen as she ratioed 109 at weaning, 113 at yearling, 118 for marbling and 119 for ribeye. Her 7/106 weaning ratio dam is a gentle VRD daughter who stems from our foundation Miss Emulous purchased from Ankony in NE. Lot 4 is the first McCoy daughter offered at auction and she's a good one at that. Don't miss her.

An extreme performance heifer sired by Whitlock and out of S Cora 331, the Pathfinder dam of the high selling Game Day heifer in 2011. This feminine, deep bodied heifer has extra frame and size just like her powerful VRD dam and also has the number profile to match. Look this good heifer up if you need one that can raise herd bulls.

The performance and carcass standout of our 2013 heifer calf crop. Lot 6 is an Elevate daughter out of a beautiful uddered young Chinook that has raised the bar for performance, rationing 131 at weaning, 124 at yearling, 112 for marbling and 128 for ribeye. She is a bigger framed heifer with extra length, depth and muscle shape, and offers as dominant of carcass EPDs as any female in this sale offering. Find Lot 6. She will add performance and carcass as well as any heifer we are selling.

Phenotypic gem sired by McCoy. S Jasmine 3177 is deep bodied, thick quartered, wide based, feminine fronted, and a joy to see on the move. She is well representative of the female siring abilities of McCoy and a favorite of many visitors to our heifer pen. Her steady producing dam is a nice uddered Right Time daughter who is also the granddam to S Anchor 2155 who we are using heavily in our program. Whether you want to put her on a halter this summer or just turn her out to pasture, Jasmine 3177 will fill both roles well.

One of the standout heifers in the entire 2013 calf crop with an outcross pedigree in the combination of Whitlock and Brooks EXT. Her dam was a nice uddered heavy milking cow with an excellent WR of 9/108, that left the herd at age 12. This powerful, complete heifer ratioed very well across the board including an IMF ratio of 141 and an REA ratio of 117. This heifer is one of our favorites and is sure to make a powerful cow that could be mated to nearly any sire with her balanced EPD profile and solid phenotype.

Our featured Fortunate daughter with big time numbers. Sasprilla 3239 is thick topped, big quartered, long bodied, yet is still very feminine in her appearance. A performance standout, she also scanned off the charts ratioing 126 for marbling and 129 for ribeye. Combine this individual performance with the maternal power of her high producing Chisum dam and we think this heifer is possibly as valuable as any heifer in this offering.

Really attractive, gentle Whitlock daughter from our Delight cow family. Lot 12's dam is a big middled, long bodied, solid producing Right Time daughter with impressive progeny ratios for carcass with a 5/111 IMF and 5/104 REA. The Whitlock daughters deserve serious consideration- they are some of the nicest young females we have ever produced.

Broody, big middled, easy keeping Chisum daughter. This above average indexing female is out of a solid producing daughter of the outcross Schaff Angus Valley herd sire, King, and backed by the maternal strength of our EXT donor Summitcrest Elite, who produced here through age 17. Elite has left her mark throughout our herd with her highly productive daughters. Elite compiled an impressive progeny record which is WR 10/104, YR 10/103, IMF 64/108, and REA 64/100. Lot 14 is royally bred to be a strong producing female.

This Titlest heifer is a sale feature. She is out of a high ratioing, second generation Pathfinder dam with a WR of 7/110. This feminine heifer's sire is a popular member of the Semex sire line up and has developed into a powerful calving ease sire. She is sure to be an excellent cow with the combination of the Cora cow family and the Primrose Lady cow family.

Grandma JoAnn and her crew - From left: Trace, Wyatt, Watson, Haylie, Jessa, Kadence, Luke, Collins & Will.

Fancy Whitlock heifer out of a Lincoln daughter who traces to a Blackbird cow from SAV. This sound structured, thick topped heifer is feminine and angular. She should make an excellent cow as the Whitlocks are one of our favorite sire groups in the replacement pen. They are wide made, deep middled females yet maintain plenty of femininity and style.

It is not very often that we part with Lincoln daughters and this April heifer was offered only as we continually strive to offer very elite registered heifers. Lot 18 is an attractive, moderate framed, feminine heifer who is a maternal sister to S John Wayne, the popular Chisum son selected by Vermilion Ranch in our 2011 bull sale. This heifer is a little younger than most but still competed well ratioing 113 for ribeye..

The last of the Whitlock heifers we will offer and a good one at that. Blackbird 3226 is deep middle, clean fronted, long bodied, and carries with her a royally bred maternal pedigree as her dam traces to Traveler T510, EXT, and Leachman Tonto. We are very excited about the maternal producing abilities of the Whitlock daughters and this 114 ribeye ratio heifer should make a top cow.

Feminine fronted, attractive patterned Titlest heifer out of a steady producing daughter of our Pathfinder female sire, Expedition. This moderate framed female gained well from weaning to yearling and scanned with extra muscle as indicated by her 108 ribeye ratio. Her level uddered, small teated dam stems from our highly productive Gloria cow family. Be sure to look this heifer over- she offers an opportunity to own one of the first daughters of the Semex calving ease sire Titlest.

Lot 27

**3/14/14 weight 1880** The only Rainmaker 9216 son we will sell this year and he has herd bull potential. Lot 27 ratioed above average at weaning and yearling, and is very complete in his design. He is clean fronted, strong topped, level hiped, and deep bodied. This gentle bull's high producing dam is a nice uddered daughter of Freightliner. Don't miss this Rainmaker 9216 - he is one of the really good bulls we will offer this year. **Suitable for heifers.**

**3/14/14 weight 1855** High performing standout sired by Dominion. This good rascal is long, deep bodied, clean fronted, big scrotaled, and powerful in his design. He excelled at weaning indexing 122 as his dam's first calf and continued to perform well as he ratioed 117 at yearling and 130 for marbling, all while only having a 71 pound birth weight. These are the first Dominion sons we will sell. They are a uniform, heavy muscled set of outcross pedigreed calving ease bulls. **Suitable for heifers.**

**3/14/14 weight 1785** This big stout Packer son is out of a productive Alliance 3313 daughter. He is a larger framed, growthy cow bull that should add length and pounds to his calves. Packer is a unique sire as his pedigree includes multigenerational strength for heifer pregnancy and fertility. Plus, his daughter reports are very favorable for udder quality and teat size.

**3/14/14 weight 1760** Long bodied, high performing Chisum son with added frame. Lot 33's dam is a low birth ratioing, high producing daughter of Extra K205. This deep sided, rugged appearing bull also should enhance carcass merit in his calves as he ratioed 115 for marbling. Chisum and his sons will increase growth and maternal production and this good bull should sire no different.

**S Camilla 6144 - WR 5/108**

Featuring the influence of this Alliance 3313 donor throughout the sale. We are offering ET full brothers out of her sired by Summit who sell as Lots 26, 30, 31, 40, 48, 49, 70, 71, and 72. Also selling out of Camilla 6144 are ET progeny sired by Capitalist, which sell as heifer Lot 7 and bull Lots 97 and 134, along with two ET McCoy sons that sell as Lots 192 and 193, and her 2013 natural calf, Lot 90, who was the high indexing bull at weaning.

**Jessa and Will**

**3/14/14 weight 1770** A very top Dominion son out of a productive Coleman Traveler daughter. This stout calving ease bull is very sound and carries himself as though he could cover a pile of cows or heifers. He ratioed very well at weaning and yearling time and was also well above average for REA. The Dominion sons offer a unique outcross calving ease option as they are square rumped, good footed, and are built to survive and adapt to nearly any environment. We intend to have many more Dominion sons in the future as he has been a main pasture sire for us due to his ability to sire cattle that excel in many of the hard to measure traits, like hoof structure, udder quality, fertility, and fleshing ability. **Suitable for heifers.**

**3/14/14 weight 1875** Massive Packer son with calving ease credentials. This 67 pound birth bull is deep bodied, large scrotaled, and gained very well ratioing 13 percent higher at yearling than he did at weaning. His low birth ratio dam is a stable producing Alliance 3313 x Freightliner. If you need a calving ease bull that will sire calves with the ability to gain and perform, then Lot 41 needs to be in your pasture. **Suitable for heifers.**

**3/14/14 weight 1620** Well balanced Summit son out of a very nice uddered Danny Boy daughter who is ratioing below average for birth on 4 calves. This long sided, calving ease bull has a negative birth weight EPD and a 13 for calving ease. He should be an excellent low birth sire for heifers or cows. **Suitable for heifers.**

**3/14/14 weight 1885** Lot 43 is a big middled, long bodied, massive son of Summit. This high performing bull grew well to weaning and yearling, scanned above average for muscle and has developed into one of the most powerful bulls in the pen. His dam is a hard working, solid indexing daughter of Rock whot traces to a VRD granddam. This bull has the look of an individual that will cover lots of cows and add pounds.

**3/14/14 weight 1660** Long sided, good gaining Summit ET bull out of S Camilla 6144. This mid framed, good scrotal bull should cover lots of heifers or cows and pass on excellent calving ease and performance genetics. The Summit progeny have excellent vigor and will get up and nurse quickly, which is obviously very valuable in the North Dakota climate and rapidly changing spring calving conditions. Full brothers include Lots 26, 30, 31, 40, 49, 70, 71 and 72. **Suitable for heifers.**

-----------	---------	----------	---------	-----------	----------

**3/14/14 weight 1490** Good looking, correct structured Dominión son with calving ease credentials. This above average weaning bull's dam is a very productive young daughter of Coleman Traveler 7136. 7136 is quickly establishing himself as a top maternal sire as his first 9 daughters are ratioing 106 on their first 15 calves. Dominión is a new sire group for us and he will continue to see use in our program. **Suitable for heifers.**

-----------	---------	----------	---------	-----------	-----------

**3/14/14 weight 1690** Big, stout Summit son out of an easy keeping Chisum daughter. This good big bull will calve easily and his calves should grow rapidly. We really like our Summit daughters. Summit improved udder structure in almost every case, his daughters ratioed well above average and all bred back. As we have begun moving our fall calving cows to spring many of the Summit yearling heifers conceived at 9.5 to 10.5 months of age and will calve this April. **Suitable for heifers.**

-----------	---------	---------	---------	----------	-----------

**3/14/14 weight 1520** Mid sized Chisum son with extra length and depth of body. This 111 ribeye ratio bull's dam is the result of flushing our Wye bred donor, Elcona, to King, a straight Canadian sire to create a total genetic outcross. If you are seeking new blood and want the reliable growth, muscle, and maternal genetics of Chisum, be sure to find this bull.

-----------	---------	----------	----------	-----------	-----------

**3/14/14 weight 1540** One of the really complete phenotypic bulls in the fall bull offering. This moderate framed bull is good footed, clean fronted, loaded with muscle expression down his top and through his quarter. He performed solidly at weaning and yearling and excelled on ultrasound day ratioing 121 for marbling and 114 for ribeye. His young Chisum dam is poised to be a major contributor in our herd as her second calf was a standout Elevate heifer. Good Bull. **Suitable for heifers.**

-----------	---------	----------	---------	-----------	----------

**3/14/14 weight 1525** Another well balanced, thick, Dominion son out of a beautiful uddered Game Day daughter from the productive Elite cow family. This calving ease bull is very complete, deep middle, moderate and should produce excellent daughters with high quality udders. The Dominion progeny are built to work in any environment with their extra muscle and thickness, moderate stature, fleshing ability and good structure. Plus we think his daughters will be some of the most productive young cows we will own, based on the strong maternal heritage Dominion claims.

**Suitable for heifers.**

**3/14/14 weight 1625** Summit calving ease bull out of a very consistent group of full brothers. This bull's dam is one of our most powerful cows. She is moderate and always in good flesh and is also one of our best uddered cows. The daughters of these full brothers should make excellent cows. Full brother to Lots 26, 30, 31, 40, 48, 49, 70, and 71. **Suitable for heifers.**

-----------	----------	---------	---------	-----------	----------

**3/14/14 weight 1310** Smooth shouldered, small headed calving ease bull sired by Dominion. This 75 pound birth weight bull is royally bred for calving ease and maternal as his dam combines Game Day, Alliance 3313, and Alliance 446N. Check out the Dominion sire group as they are a standout group of moderate framed, good footed, calving ease bulls.

**Suitable for Heifers.**

**3/14/14 weight 1535** Lot 76 is a negative birth, calving ease son of Lincoln out of a very easy keeping, nice uddered Alliance daughter who has a birth ratio of 7/95. This bull should sire calves that are born easily with excellent vigor. **Suitable for heifers.**

## Bull Development at Spickler Ranch.

The following is a quick recap of how we wintered the 2013 spring bulls as well as their ration composition. They were weaned September 21, 2013. We started them on a ration consisting of alfalfa haylage, oat hay, crp, corn silage, modified distillers, beet pulp, wheat midds, and corn which started at about 35 MCal. The ration has changed slightly from the past. We did not include oat grain in our ration as we cut and baled our oats for hay. We have substituted beet pulp pellets in the diet in place of oats. We also included corn silage in the diet this year because we were able to purchase some corn from our neighbors. We did account for the corn in the corn silage at all times and took bunk energy samples to ensure that we were not overfeeding the bulls and that the ration was maintained at 46 Mcal from December 15 until the bulls were scanned on March 11. After scanning we removed the corn from the diet and dropped the ration back to a 38 MCal diet which is what they will be on until sale time. The exception this year is that the bulls will still get a couple pounds of corn through the corn silage which we will feed until it runs out. The fall bulls have been on a 38 MCal diet most of the fall and winter after coming home from summer grass in early September. We target a 3 pound gain on the yearling bulls and their average was 3.38 on a 165 day test (the distance between weaning weight date and the yearling weight date). We target .25" back fat on the yearling bulls and they had an actual back fat of .27" with an adjusted backfat of 0.29". The fall bulls are handled similarly throughout their life although they receive even less energy than the spring bulls and it shows as their average backfat is .12". We purchase all of our corn and would much rather save that for the home raised steers in our finishing pen. Both sets of bulls are managed at the best of our ability to display genetic differences with regard to performance and carcass ultrasound, while never compromising their soundness or longevity.

One of the most massive, powerfully built calving ease bulls raised here. Lot 80 has been a standout since birth and is an easy find in our bull pen. He is thick topped, wide hiped, expressive in his stifle, and has extra depth of body and middle. His dam is one of our favorite Chisum daughters and will be added to our donor roster this year. She is feminine, quiet, and has a level udder with small teats. In addition she is a member of our highly productive Cora cow family. If you are in need of a big time calving ease bull we think Lot 80 is one of the best we have come across. When his phenotype, and individual performance is combined with a +20 CED and a -3.7 BW EPD we think he'll work. **Suitable for heifers. Selling 2/3 interest and full possession.**

Deep bodied, thick made Chisum son with herd bull figures. Lot 81 has done it all. He ratioed 117 at weaning, 111 at yearling, 116 for marbling, and 112 for ribeye, all while having a calving ease EPD profile that few can rival in this sale. His big bodied, high producing, high carcass ratioing dam is a Max 602C daughter we purchased as a bred heifer, and she has become a valuable contributor to our herd. If you need a calving ease herd bull, loaded up with muscle, maternal, and performance then this standout Chisum son should be considered. **Suitable for heifers.**

Stand out McCoy son who gained well above average at 3.79 lbs per day on a 165 day test. This attractive patterned, long bodied bull is out of a Chinook daughter from the Queen Essa cow family. She is nice uddered and milks well which is typical of the Queen Essas. This mild mannered bull has performed well at each measuring point and backs up his visual muscle shape with a ribeye of 15.2 to ratio 117. Be sure to find this bull if you need a calving ease herd bull. **Suitable for heifers.**

Complete and powerful McCoy son with the phenotype and genetics to rank him as an elite calving ease herd sire prospect. Lot 85 is clean fronted, strong topped, level hiped, and expressive in his muscle pattern. He has performed like a herd bull ratioing above average at weaning and yearling and indexing 109 for marbling and 112 for ribeye. He also has a very nice EPD spread including his +.82 ribeye EPD. His dam is a perfect uddered Summit x Chisum daughter who stems from a cow line known for their level, small teated, nearly perfect udders. This bull is a herd bull and he very well represents the progression of our breeding program.

**Suitable for heifers. Selling 2/3 interest and full possession.**

Phenotypic standout with herd bull numbers. Lot 87 is a clean fronted, correct structured, level hippped, attractive patterned, and has an EPD spread that elevates his prowess as a herd bull candidate with a +0 BW EPD to a +104 YW EPD. Sired by the very popular Select Sires bull Capitalist, he claims a herd bull producer, S Pride Anna 709, as his dam. She records an impressive 4/114 WR, is gentle and always in good flesh and has produced the herd bulls, Summit who is a Select Sires, Whitlock who we own with Wilde Angus, MN, and Rainmaker 2173 who is working in the Handy Angus herd in MT. Be sure to check out this moderate framed stud- we think he has the genetics, phenotype, and maternal heritage to add himself to the roster of herd bulls produced by Pride Anna 709.

**Suitable for heifers. Selling 2/3 interest and full possession.**

Chisum herd bull out of a Right Time 205 daughter with an excellent udder. This bull has extra length, depth and muscle. This big bull also defied the carcass antagonism ratioing above average for IMF and REA. The maternal strength of Lot 88's dam and the performance of Chisum makes this bull valuable as he sires steers for market and heifers for replacements.

-----------	----------	----------	----------	----------	-----------

Deep bodied, big middled, high gaining calving ease herd sire prospect that is an easy find in the bull pen. This above average weaning and yearling ratio Lincoln son posts a wide birth to yearling EPD spread with a -1.3 BW EPD to a +96 YW. Lot 89's young Chisum dam descends from a Rock daughter of Elcona, our foundation outcross pedigreed Wye bred donor. Be sure to find this 111 ribeye ratio Lincoln son- he is one of the standout calving ease bulls in this sale. **Suitable for heifers.**

-----------	---------	----------	----------	-----------	-----------

One of the really complete calving ease herd bull prospects in this sale. This 70 pound birth weight McCoy son has a negative birth EPD, +12 CED EPD and performed very well rationing 108 at weaning, and 110 at yearling, while also gaining 3.85 pounds per day. His tidy uddered dam is another high producing Summit daughter. If you are in need of a calving ease herd bull, Lot 91 needs to be on the short list. He's long sided, level hipped, performed well, has a nicely balanced EPD spread and scanned like a herd bull rationing above average for both marbling and ribeye. **Suitable for heifers.**

## In remembrance and appreciation...

*Early last summer the livestock industry suffered a tremendous loss with the passing of Terry Robinson. Terry was involved in our operation helping our family market cattle before either of us were old enough to know him. Terry had become a mentor and a source of marketing knowledge*

*to Nathan and I, especially in the last ten years. We developed the same level of respect for Terry as Dad and Grandpa had due to Terry's insight and positive attitude. It would be selfish of us to think that we are the only people who miss Terry as he is missed by his family, friends, marketing peers, fellow guardsmen and the entire cattle industry in North Dakota and the surrounding states. We would also be remiss not to offer our gratitude to Terry on behalf of the Spickler families for the impact and direction he provided to our operation.*

Long bodied, deep middled Summit ET bull out of S Queen Essa 208. This good bull has maternal genetics that are unparalleled with the combination of Summit and 208. The Summit daughters are very nice uddered and are ratioing 107 at weaning on their calves. 208 has very dominant genes for passing on her udder structure, attachment and small teat size. This bull also ratioed above average for IMF and REA. Full brothers include Lots 83 and 172.

Absolute powerhouse sired by Upward. Lot 93 weaned heavy, gained very well, had one of our heaviest yearling weights, and scanned with a 105 ribeye ratio. This big scrotated bull with added frame is the result of a joint embryo venture with Dale Edwards, MO. S Mayflower 724, the donor dam of this big EPD spread herd bull prospect, is owned together with Dale and is establishing herself as one of our herd's top donor females. A flush sister to this bull is the featured Lot 2 heifer in this sale that ratioed 137 for ribeye. This bull and his two flush brothers offer the only chance to purchase Upward genetics in this sale and we feel it is a real unique opportunity to purchase high powered performance genetics with this strong of a maternal heritage. ET full brothers sell as Lots 162 and 163.

High gaining Chisum son who almost hit the 4 lb per day mark in our 165 day test. His dam is a nice uddered Rock daughter that has really impressive progeny ratios across the board. The Chisum x Rock mating works very well and this bull is a good example. He ratioed well at weaning and yearling, plus he scanned significantly above average for IMF and REA.

The powerhouse Fortunate bull in this year's offering. Lot 95 is a deep bodied, thick quartered, big hipped bull loaded with muscle shape. This moderate framed, large scrotaled bull also excelled for marbling with a 139 IMF ratio. His 5/111 IMF ratio dam is yet another very solid producing mature daughter of Alliance 3313. If you need to add muscle shape, gainability, and rapidly enhance quality grade in a set of steers while not sacrificing maternal, buy lot 95- we think he'll work.

Moderate framed, big scrotaled herd bull prospect sired by Capitalist. Lot 97 has a nice birth to yearling EPD spread, scanned very well for marbling and ribeye, and has the highest marbling EPD of any bull in this sale. Furthermore, he offers an opportunity to purchase a son of Camilla 6144 who is quickly establishing herself as one of the leading females we have ever flushed. We are pleased with our Capitalist sons and they offer a unique buying opportunity as they are just about all ET bulls out of our very best females. Standout ET Full brother sells as Lot 134.

\$B	+73.26

High performing Chisum son with extra length and frame. Lot 101 is thick topped, big quartered and ratioed well above average at weaning. His Game Day sired dam is another daughter of Queen Essa 208. She is small teated, tidy uddered, and has a production record that has her poised to become one of the elite contributors in our herd. Full brothers in blood to this standout Chisum sell as Lots 131 and 138. If you need to take your performance and maternal production levels up a notch, Lot 101 might work as well as any bull in this sale. **Suitable for heifers.**

Deep middled, wide tracking Whitlock that performed very well and has a genetic tabulation that is second to none in this offering. His dam is a very solid ratioing daughter of Alliance 3313, backed by two Pathfinders, her dam and her grand dam. Look up this good bull as he offers multi-trait genetic improvement.

Moderate framed, correct structured McCoy son. Lot 103 is free moving, thick topped and expressively muscled in his quarter and down through his stifle. His dam is a solid producing, nice uddered descendant of our Jasmine cow family known for their calving ease and longevity. His grand dam posts an 11/94 BR and 3rd dam is 12/94 BR. Be sure to check out Lot 103 - he is well representative of the quality job his sire is doing as a breeding bull. **Suitable for heifers.**

Unique Chisum ET bull with a large scrotal. This good bull is a full sib to an impressive group of full sisters that are some of our most productive young cows. His dam is the Pathfinder donor, S Queen Essa 208, who has multiple generations of genetics for longevity as she is 12, her dam is 14 and her grand dam produced for us until age 15. This ET bull and his full brother Lot 135 present a unique opportunity to have a pair of full brothers out of the best cow on our ranch.

Standout Whitlock son with a no holes EPD and performance data. This long bodied, clean made calving ease bull performed well at weaning and yearling, and ultrasounded well ratioing 123 for marbling and 109 for rib-eye. His young dam is a model Lincoln daughter with a near perfect udder, who stems from a 3/90 birth ratio Game Day female out of Chisum's grand dam. If you are in need of a calving ease bull loaded with performance, carcass, and maternal merit then Lot 105 needs to be on your list. Genomic enhanced EPDs by Zoetis. **Suitable for heifers.**

This good looking rascal is one of the most impressive McCoy calving ease bulls in the sale. He is one of the youngest bulls in the offering, yet he competed well with the older bulls and has a 15" rib eye. His dam is our most moderate cow and has a beautiful udder. Lot 116 is one of the most attractive patterned calving ease prospects in the offering. **Suitable for heifers.**

Calving ease herd bull sired by Lincoln. This correct structured, well balanced bull is mid sized, big scrotaled and has impressive data for a bull with this much built in calving ease. He has a +16 CED with a -3.2 BW EPD while ratioing 119 at weaning as his dam's tenth calf, and also scanning like a herd bull indexing 115 and 107 for marbling and ribeye. His high producing, muscle adding dam is a gentle, nice uddered VRD daughter. If you are seeking a calving ease bull with top performance and carcass ratios that is backed by a super cow, find Lot 117. **Suitable for heifers.**

Good numbered Packer son who performed well across the board. His dam is also the dam of S Chisum 6175. This long bodied bull is attractive patterned and is built like a calving ease bull. With the multiple generation of fertility that is part of Packer's lineage, the maternal power of Chisum's dam and cow family, this bull is a definite herd bull prospect. **Suitable for heifers.**

Highly negative birth weight, plus 15 CED son of the standout Semex sire, S Titlest 1145. This wide tracking, thick rumped bull is out of a 10-year-old Jasmine dam who has had 9 calves ratio 91 at birth. This good bull's maternal background includes many generations of calving ease genetics and productive, good uddered females. **Suitable for heifers.**

Deep bodied, easy going ET Chisum son. Lot 135 is another son of Queen Essa 208, our benchmark for maternal superiority. This standout bull has five full sisters in production, and they are making tremendous young cows with nice udders and plenty of milk. One of those full sisters raised our high selling Fortunate Son bull in 2013. If you are looking to improve the maternal strength of your cowherd Lot 135 and his full brother Lot 104 would definitely be bulls to tie into.

-----------	----------	----------	----------	-----------	----------

This Chisum son jumped through all the hoops. He gained 3.83 lbs per day on test, has excellent growth EPDs and ratioed 135 for IMF, yet was also an above average REA bull. His Pathfinder dam is a maternal sister to the dam of the Upward progeny in this offering and also descends from the cow family that produced McCoy. Lot 144 has the genetics on both sides of his pedigree to positively change the cows he is mated to in a number of different categories from growth to carcass.

-----------	----------	---------	---------	-----------	----------

Small headed, clean fronted, thick topped, big quartered calving ease McCoy son. Lot 145 is a moderate framed, high CED bull that is loaded with carcass merit ratioing 128 for marbling and 105 for ribeye. His young Game Day dam stems from a productive, easy keeping Expedition daughter. Put a mark by this good bull - he is another phenotypic standout sired by McCoy. **Suitable for heifers.**

The last Packer son in this year's sale offering and a good one at that. Lot 161 is an ET son of Gloria 209, Chisum's 30/105 IMF ratioing granddam. This thick topped, clean fronted bull is big scrotaled, and scanned above average for muscle. If you are in need of an outcross pedigreed herd sire with a powerful maternal pedigree be sure to look up this bull.

Moderate framed Upward son whose full brothers include Lots 163 and 93 and their sister is the Lot 2 heifer that is a definite sale feature. This good bull's dam is a near perfect uddered cow who resides at Dry Fork Angus in MO in a joint embryo venture. She has a very quiet disposition and fits their environment well as she sheds out very early. 162's dam also is a member of the same cow family that produced McCoy.

Moderate framed, high CED Chisum son with a 70 pound birth weight. This big middledd, thick quartered bull's dam is a daughter of Mohnen Pioneer, who combines the ever popular Traveler 004 with the high income and herd bull producing Mohnen Jilt 910. This Chisum son should calve very easy as he stems from our very light birth Jasmine cow family. **Suitable for heifers.**

Attractive, well balanced Summit son out of a full sister to S Trailblazer 0110, the high selling Chisum son in 2011. This calving ease bull couples a light birth weight and negative birth EPD with an extremely light birth maternal heritage. His dam has two calves recorded with a 95 BR and his grand dam records a -4.7 birth EPD with a BR of 86 on 9 calves. This bull's calves should be born easily. **Suitable for heifers.**

The first of two twin McCoy bull calves out of Summit, Whitlock, and Lot 87's dam, S Pride Anna 709. This pair of bulls offers strong calving ease and maternal genetics second to none as they combine the strength of McCoy's cow family with the strong production and cow family of Pride Anna 709. Lot 177 gained very well and marbled above average. **Suitable for heifers.**

**S Pride Anna 709** - WR 4/114. Dam of Summit and Whitlock. Featuring her ET Capitalist son who sells as Lot 87 as well as her McCoy twin bulls who sell as Lots 177 and 178.

High gaining McCoy, with good depth, muscle and bone. This calving ease bull is a flushmate to Lot 193 and they are very similar in type, which is typical of the McCoy progeny. 192's donor dam is a near perfect uddered Alliance 3313 daughter with a progeny weaning ratio of 4/108. **Suitable for heifers.**

Deep middled, thick made, calving ease Chisum son who gained near the top of this entire calf crop. This negative birth EPD bull is out of a perfect uddered, solid producing 6/91 BR daughter of Connealy Forecast. Lot 195 should calve easy, sire top-notch replacement females, and fast growing steers. **Suitable for heifers.**

Thick topped, heavy muscled, ET McCoy son who is a full brother to Lot 192. This stout rascal is another son of our model Alliance 3313 donor, S Camilla 6144, whose influence is felt heavily throughout this sale. Put a mark by this bull and his full brother- they are a pair of heavy muscled, stout boned, light birth bulls, loaded with maternal genetics. **Suitable for heifers.**
