LUNCH 11:30 AM | SALE 12:30 PM

GREAT FALLS, MONTANA - WESTERN LIVESTOCK AUCTION

B

| SELLING

180 BULLS

1,000 FEMALES

Welcome

Welcome to our 21st Annual Production Sale

As the calendar nears the end of another year, we look back with gratitude. We appreciate your interest in our program and hope that our offering of bulls and females will fit your needs. We feel fortunate to have the opportunity to provide our customers with a varied offering of bulls and females while keeping our customers preferences in mind.

This year's offering has a large group of Ellingson Prolific sons along with a nice highlight of bull calves out of Boyd Bedrock, a son of Prolific. We feel this line of cattle meets our breeding philosophy of sound structured and powerful cattle that have a balanced set of EPDs. In our coming two year old bulls, we have sons from GMAR Power Guard, Carter Power Surge, Circle L Gus, and Mohnen Upstream. These are bulls that we own and have bred to our commercial herd for many years, and they continue to make quality sons and females that perform well on our operation.

We are very proud of our offering of bred females. A large group of the heifers are bred to Raven Unite. We have a large group of calves out of him that we raised and are feeding. To say the least, we are very pleased with the calving ease, growth, and look of the calves.

We hope everyone has enjoyed the good fortune of the cattle market this past year. We appreciate your continued support. Please join us for our pre-sale dinner Wednesday, December 17th at the Elks Lodge in Great Falls. Cocktails will be at 5:30 p.m. and dinner will follow at 6 p.m. Lunch will be served on sale day at 11:30 a.m. Come early and take a look at the sale offering. Lodging is available at the O'Haire Motor Inn. Please call 406-450-2141 to reserve your room and mention the Bobcat Angus room block.

Sincerely,
Bryan and Cathy and family
Ernie and Jayne and family

CATTLE WILL SELL IN CATALOG ORDER

First Breeding Season Guarantee

All bulls selling for \$3,500 or more will be covered 50% by Bobcat Angus, if they are injured during their first breeding season. This guarantee does not include death as that can be insured for. Breeding season is defined as a 60 day period following the first turnout of bulls. Fifty percent of the value of the injured bull, minus one-half the salvage value, will be given credit in a future Bobcat Angus sale or toward a replacement bull if one is available. Salvage value, if any, will be split equally between Bobcat Angus and the buyer. All injured bulls must be diagnosed by a veterinarian. We also reserve the right to a second opinion by a veterinarian of our choice. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2026.

Genomic Enhanced EPDs

ANGUSGS
Powered by NEOGEN

EPDs are current as of November 7, 2025

Updated EPDs available at www.Angus.org

Most bulls have been DNA tested

See page 60 and the inside back cover for more information

Welcome to the Annual Bobcat Angus Production Sale

The Ratzburg family's dedication to farming and ranching runs deep — built on generations of hard work, a shared passion for Angus cattle, and a steadfast commitment to their customers. What began as a vision to raise high-quality cattle that thrive in the extreme northern environment has become one of the most respected Angus programs in the region.

At Bobcat Angus, the cow herd is a true labor of love. Every breeding decision is made with purpose — to strengthen maternal traits, enhance performance, and maintain the kind of structural integrity required to excel in Montana's rugged conditions. It's this disciplined approach that allows the Bobcat program to consistently deliver cattle that not only work here, but anywhere. The Ratzburg family's philosophy has always been "customer first." They value the relationships built through this business and take great pride in helping others succeed. That commitment has fostered trust and loyalty among their many repeat buyers, who recognize that the Bobcat brand stands for quality and dependability.

This year's offering is exceptional — **1,000 bred Angus females**, representing depth, uniformity, and power rarely found in one place. Whether you're expanding your herd or making your first investment in Bobcat genetics, there's never been a better time. In today's favorable cattle market, high-quality females are one of the most solid investments you can make.

On behalf of the Ratzburg family and everyone at Bobcat Angus, thank you for your continued confidence and support. I look forward to visiting with you sale day.

— Ron Frye, Ron Frye Marketing

Bid through Northern Livestock Video Auction's NEW Online Bidding Platform! Desktop and Mobile Friendly

For the Desktop:

1. It is best to use the Google Chrome web browser.
2. **Pre-Register at least one day prior to the sale.**
3. Go to bid.northernlivestockvideo.com and click "Get Approved to Bid".
4. Doing this will prompt you to create an account, after which you will fill out a bidder approval application.
5. Once Approved, an email will be sent to the email account provided, please click the link in that email to activate your account and a buyer number will be provided.
6. On sale day (after approval), visit www.northernlivestockvideo.com to view and bid!

For the Mobile:

Use your mobile device to download the Northern App and follow the above steps to get approved.

There is an instructional video on how to register to bid on our website, www.northernlivestockvideo.com if you have any questions.

For technical assistance with Internet Viewing and Bidding Questions, call Sam Fraser 406-860-0590.

Phone Bidding:

Anyone wanting to use the Northern Livestock phone bank to bid must pre-register and have a bid number to bid on the phone.

To register with NLVA call 866-616-5035 Before Sale Day.

View the Online CATALOG and VIDEO CLIP of each BULL selling at www.northernlivestockvideo.com.

Bidders who are successful in making purchases will be contacted following the sale to make payment and delivery arrangements.

Northern Livestock's Sale Day Bid Line: **1-406-245-0889.**

Lot 15 OUT OF SALE

Driving the science of better breeding

There's little room for error in the cattle business. You need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI®) provides it through genomically-enhanced expected progeny differences (GE-EPDs).

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same level of accuracy as if they have recorded 7-33 progeny, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation at www.angus.org.

How do you know if EPDs are genomically-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by Neogen or the HD50K® by Zoetis.

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

Combined Value (\$C), an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

BRED IN THE BIG SKY- 800 COMMERCIAL BRED HEIFERS

We are offering 800 bred heifers. Of these, 270 are no brand heifers. These have all been purchased from long standing customers that have a heavy influence of Bobcat Angus in their herd. They have been AI bred to Raven Unite and Circle L Unified. All of the heifers are ultrasound pregnancy tested by Ultrasound pregnancy tested by Dr. Ralph Miller and Dr. Kamron Ratzburg for calving dates and sex. They have been vaccinated with Virashield 6 VL, Scour Boss 4, and Ivomec.

LOT 231 18 HEIFERS

Bred to sons of Mohnen Upstream and Circle L Gus
Due to calve February 29th-March 22nd
Carrying heifer calves

EARTAG: RED AND ORANGE

LOT 232 17 HEIFERS

Bred to sons of Mohnen Upstream and Circle L Gus
Due to calve March 6th-April 2nd
Carrying heifer and bull calves

EARTAG: WHITE

LOT 233 35 HEIFERS

Bred to sons of Mohnen Upstream and Circle L Gus
Due to calve March 20th-April 20th
Carrying heifer and bull calves

EARTAG: BLUE

LOT 234 37 HEIFERS

Bred to sons of Mohnen Upstream and Circle L Gus
Due to calve March 20th-April 20th
Carrying heifer and bull calves

EARTAG: PURPLE

LOT 235 26 HEIFERS

Bred to sons of Mohnen Upstream and Circle L Gus
Due to calve March 20th-April 20th
Carrying heifer and bull calves

EARTAG: RED AND ORANGE

LOT 236 8 HEIFERS

Bred to sons of Mohnen Upstream and Circle L Gus
Due to calve April 2nd-April 25th
Carrying heifer and bull calves

EARTAG: WHITE

LOT 237 12 HEIFERS

AI/Bull Bred - Late Ultrasound
Due to calve February 15th-March 22nd
Carrying bull and heifer calves

EARTAG: MIXED

LOT 238 27 HEIFERS

Bred to sons of Mohnen Upstream and Circle L Gus
Due to calve April 15th-May 5th
Carrying bull and heifer calves

**EARTAG: GREEN WITH WHITE NUMBERS
MULTIPLE BRANDS**

LOT 239 HOME RAISED COWS

Ten- Year- Old Cows 34 COWS

AI Bred to GMAR Power Guard and bull bred to
sons of Bobcat Blue Sky
Due to calve March 1st-May15th
Carrying bull and heifer calves

EARTAG: BLUE

A Guide to Genomic Enhanced EPDs

Most bulls have been AngusGS tested. To assist your selection, below is an explanation of each EPD.

Production EPDs

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Maternal EPDS

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Carcass EPDs

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$ Value EPDs

\$Value indexes, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Feedlot Value (\$F), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics for postweaning feedlot merit compared to the progeny of other sires. The underlying objective assumes producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis, but with no consideration of premiums or discounts for quality and yield grade. Traits contributing directly to the index are as follows: yearling weight (gain), carcass weight and dry-matter intake.

Grid Value (\$G), an index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for carcass grid merit compared to progeny of other sires. The underlying objective assumes producers will market cattle on an above-industry-average carcass grid. Traits included in the index are as follows (in no particular order): carcass weight, marbling, ribeye area, and fat.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).
